The First Really Small Melon

MIDGET WATERMELON

711—An improved icebox style of melon developed by Dr. Yeager at New Hampshire Experiment Station. The fruit is 7 to 8 in. long. Just right for individual serving and to fit the refrigerator. Rinds very thin. "Rattlesnake" markings. Flesh rich, crispy red, small seeds. The seed is still very scarce. Pkt. 25c; 3 for 69c, postpaid.

MONTMORE CHERRIES

New Early-Bearing Montmorency

AN54—Early—often bears 1st year. Low growing—only 10 to 12 ft. tall, but spreads out 15 to 25 ft., making it easy to pick from the ground. Larger fruit than Montmorency—black-red and better quality. Do not pick until dark red, as they put on size and flavor the last 2 weeks. 3 to 4 ft. \$1.49 each; 3 for \$4.38; 5 for \$7.18 postpaid.
4 to 5 ft. \$2.10 each; 3 for \$5.08; 5 for \$9.75 exp. not prepaid.

Make Money Growing

POPCORN

I imagine I have tried about as many different kinds of popcorn as any other fellow in this part of the country. As soon as something new comes out, I try it. If it is worth putting in the catalog you will find it listed here.

The culture of popcorn is about the same as field corn. Plant it after frost danger is past; the first part of May is about right here. If you want to put it in hills you can put three or four kernels to the hill and space the hills about 15 inches apart, with the width of rows 2 or 2½ feet apart depending on how you are going to tend it. If you plant by the acre you will need 5 or 6 pounds per A.

Be sure to try some of the new Hybrid South American. It has everything, yield, volume and flavor.

Henry Field's

HYBRID SOUTH AMERICAN POPCORN

194—(110 days). Here it is—the Popcorn you have all been waiting for. The new Hybrid South American. You all know about the regular South American Popcorn—how it pops up in such large creamy yellow grains, is a vigorous grower, makes splendid yields, and all that—well, you can say all that and a lot more for the NEW HYBRID SOUTH AMERICAN. The added hybrid vigor gives this corn the largest and most uniform ears. Its yields are terrific, a vigorous grower, and best of all the corn pops out with a tremendous volume. Seed limited.

IT POPS BETTER

Price: Triple size (3 oz.) Pkt. 15c; ½ lb. 35c; 1 lb. 60c; 3 lbs. \$1.50; 10 lbs. \$4.50, postpaid, 50 lbs. \$20.00, F.O.B. Shenandoah; 100 lbs. \$38.00, F.O.B. Shenandoah.

UNITED U-500

198—(115 days). This is our newest and best hybrid popcorn South American type. A four way cross involving three South American inbreds and one Super Gold inbred. This one stands exceptionally well. It carries two big ears to the stalk, has a tremendous popping volume. Price: Triple size packet 15c; ½ lb. 35c; 1 lb. 60c; 3 lbs. \$1.50; 10 lbs. \$4.80, postpaid, 50 lbs. \$22.50, F.O.B. Shenandoah. 100 lbs. \$42.50, F.O.B. Shenandoah.

8 REASONS WHY HYBRID IS BEST

1. GREATER YIELDS—60 to 70 bu. to acre.
2. DROUGHT RESISTANT—Long roots go deep for moisture and plant food.
3. RESISTS COLD—Can be planted early.
4. DISEASE RESISTANT—Vigorous plants.
5. FARMER STYLE CORN—Big yields of big, round ears.
6. STIFF STALKS—Stand like a ramrod. Can be picked with a mechanical picker.
7. GREATER POPPING VOLUME—Round cap kernels pop bigger—has better flavor, too.
8. MULTIPLE EARS—Two good ears to stalk.

MINN. HYBRID 250

193—Originated by Minnesota Experiment Station. It has 16% greater yield and 29% greater popping volume than ordinary open pollinated Jap Hulless. You can't beat it for flavor and tenderness. Price: Triple size (3 oz.) packet 15c; ½ lb. 35c; 1 lb. 60c; 3 lbs. \$1.45, postpaid, 50 lbs. \$26.00; 100 lbs. \$50, F.O.B. Shenandoah.

GIANT POPCORN

197—(110 days). SOUTH AMERICAN (ARGENTINE GIANT). Here's the giant. Pops out in large, creamy-yellow grains. Large ears and smooth grain. Yields heavily. A vigorous grower. Price: Triple size (3 oz.) Pkt., 9c; ½ lb., 20c; 1 lb., 30c; 3 lbs., 75c, p.p.d.

WHITE HULLESS

195—(100 days). Recognized for years as the standard variety of popping corn. Pops out snowy white, very tender and without annoying hulls. A sharp pointed, deep grained corn, with short chunky ears. Price: Triple size (3 oz.) Pkt., 10c; ½ lb., 20c; 1 lb., 34c; 3 lbs., 92c, postpaid, 100 lbs., \$20.00, F.O.B. Shenandoah.

HYBRID WHITE HULLESS

196 — UNITED U-300 — (105 days). A new white rice hybrid. Much larger than the old fashioned Jap type. It stands better, yields big, pops with a tremendous volume. The most tender and best tasting of all. Only a limited amount of seed available this year. Price: Triple size packet (3 oz.), 20c; ½ lb. 45c; 1 lb. 75c; 3 lbs. \$2.10; 10 lbs. \$6.50, postpaid, 50 lbs. \$26.00, F.O.B. Shenandoah; 100 lbs. \$50.00 F. O. B. Shenandoah.

A Letter from "Henry Himself"

MRS. FIELD AND MYSELF

Yes, this is just how we look. A little older, a little grayer, slowing up a little. But still able to work and to enjoy it, and able to eat and sleep, and thankful that we can, and can help others. H.F.

Well, here we are again at the start of another garden year, with a new catalog, and a chance to plan a better garden than ever. And I have a chance to have another little visit with you, as I have on this page for over 50 years.

First, I want to say that we should all be thankful that we have come through this past year as well as we have. I know I am, and I think most of you are. We came through better than we had any right to expect. And we should all thank the good Lord that he has put up with us in spite of our craziness, and has given us food and flowers and all good things in abundance. Little short of a miracle.

I don't know what's ahead of us for this year, any more than you do. I hope it's good, as good as the past year—but good or bad, it's up to us to make the best use we can of our opportunities. We should be prepared, whatever happens, to feed ourselves—be independent—be friendly, and helpful, and neighborly, and honest, and decent.

Yes, I know it's the same old story I've preached to you all my life, but it's just as true as ever, and like the old fashioned Gospel it will bear telling over and over.

Plan to have a bigger and better garden than ever. Plenty for yourself and some over for those not so fortunate—or to sell to bring in extra cash. It's amazing what an amount of food—the best food in the world—can be grown on even a very small piece of ground. And how good it does taste, and how proud and happy and reliant it makes you feel.

And encourage the children to have gardens of their own. There's no better training in the world for them. Try it. They can plan and work and achieve and have something of their very own. And that's what we all want.

And don't overlook flowers—lots of flowers. What kind? Just whatever you like best. You will succeed best with what you love and are happy with. Me, I love Roses, and Gladiolus, Lilies, and Iris, and Peonies, and I want plenty of all the old fashioned flowers such as Zinnias, and Marigolds, and Asters, and Pansies, and Pefunias, and Day Lilies, and all those. They grow so easily and always bloom anywhere and for anyone. Maybe you like something else in flowers, but whatever it is, plant plenty, and care for them, and love them. They make a happier brighter home, and make life more worth living.

And of course plan to have plenty of fruit. All kinds of fruit. My personal favorite is strawberries. They grow so easy, and will grow anywhere, and they taste so good—especially the ones you grow yourself. In 70 years I haven't missed a single spring set—and roses—and I don't intend to stop it as long as I live.

ting out strawberries and peaches and pansies

Whatever you like best in fruit, plant it and care for it, and glory in the good food you will have—and the fun you will have growing it. Nothing like it. Last summer, in my own garden, off a little strawberry patch only 11 ft. square I had over 50 quarts of better berries than you could possibly buy. And how I did eat. And you can do the same thing.

I expect you get tired of my preaching at you, and talking about garden and fruit and flowers—but I really believe that if anything will save this country of ours and keep it safe and sane and sound, it's just such things. That, and hard intelligent work, and a policy of peace and decency, and the rest of the old fashioned God-fearing, hard headed ideas of our earlier days.

And I practice what I preach, too—always have and have never regretted it.

Just a word about business—. We have a fine catalog again this year. A plain, practical, helpful, friendly book. It is meant to be a help to you. To help you to raise a better garden and live a happier life. We give more space to that than to selling. But we really can do you a lot of good on the selling end. I believe we can give you better seeds and plants than most places, and at very reasonable prices. Read it all through and make out your order.

And send your order in early so it will get filled in plenty of time. Seeds we send at once, plants and trees and bulbs when weather is safe. If you want them shipped at a certain date—say so.

Henry Field

500 YEARS OF HARD WORK AND HAPPY LIVING

Here are the seven brothers and sisters of us, all together after an average of about 70 years apiece of busy happy useful life, and all still working. We have, amongst us a total of about 100 descendants, all living—never a death among them. That's some record. From the left, Susan (Conrad), Leanna (Driftmier), Sol Field, Jessie (Shambaugh), Martha (Eaton), Helen (Fischer), and Henry Field. Our philosophy of life seems to work out pretty well with us. H.F.

P.S. Just a final word about Mrs. Field and myself. We are hard at work as always, but slowing up a little. And we are happy with our garden and children and friends and fruit and flowers. We are thankful that we are able to work. So goodbye for now. H.F.

Apple Picking Time

Mrs. Fred J. Pugh, Box 114A, Riner, Virginia, sends this snapshot of her two small sons, Larry age 4 and Dale age 17 mos. picking Red Delicious apples last fall. Mrs. Pugh says, "We sure enjoyed eating them last winter."

Proud of Both

"Dear Sir: Here is a picture of our 22 mos. old daughter, Rosalie, taken with her bouquet of H. F. beets. We were proud of our beets this year and are proud of our little daughter, so are sending a picture of the two together."—Mrs. Orville Austin, Rt. 2, Box 225, Grand Ledge, Michigan.

A Satisfied Customer

"Dear Mr. Field: We were well pleased with all our garden seed. Certainly like your catalogs."—Mr. & Mrs. Fred Kidd, Marietta, Ohio.

H. F. Customer 38 Yrs.

"Dear Mr. Field: I am enclosing a snapshot of two of my grandchildren and myself in my Henry Field garden. Have planted your seeds 38 yrs. and always have a wonderful garden. Find your seeds the best from every standpoint."—Mrs. W. T. McArty, Box 581, Marietta, Oklahoma.

An H. F. Wedding

"Dear Mr. Field: We are enclosing a wedding picture of our daughter and husband, Mr. & Mrs. Frank D. Easley, Gravette, Arkansas. They would like the rose you offer. We have bought shrubs, trees and seeds from you and have always been well pleased. Our lawn is beautifully shaded on the south and west by your Chinese Elm trees."—Mr. & Mrs. M. C. Boyd, Gravette, Arkansas.

Congratulations Mr. and Mrs. Easley and a fine rose will be sent to you at the proper planting time.

I Want Your Snapshots

I always need pictures. Can't put out a Seed Sense or Catalog without them. Especially of your garden and flowers, and children and family groups or snaps of anything interesting.

If I can use them in the catalog or Seed Sense, I still pay 50c each when I do. The only rule is, they must be extra prints that you don't want back for I never know which I can use till each Seed Sense time. You enjoy seeing what others are doing—well, they enjoy seeing what you are doing just as much.

Glad Bulblets

ABG360—I always sell scads of Gladiolus bulblets each year. They sell like hotcakes. It's a good way to get a glad garden cheap, too. Same size as I plant for growing my own bulbs here. If you are willing to wait a year for a part of your flowers (20% will bloom the first year) plant these bulblets. Bulblets are simply small bulbs not yet grown to the largest blooming size. 1000 for \$2.50; 500 for \$1.50; 300 for 90c; 100 for 35c, all postpaid.

SAMPLE COPY OF SEED SENSE

These 3 pages are a sample of my little private gardening magazine, Seed Sense, that I publish from time to time throughout the year and send free to all my garden seed, nursery, baby chick, and field seed customers. That's the subscription price—an order from you now and then so if you'd like to get a copy, get your order in as early as you can, and I'll see that you get one.

Henry Field.

Flowers Bring Real Joy

"Dear Mr. Field: I am sending you one of my pictures for your Seed Sense. There is nothing I enjoy more than cutting a bouquet of my beautiful Regal Lilies for a sick neighbor or friend, many thanks to you."—Mrs. W. M. Morrall, 921 Kentucky Avenue, Bristol, Tennessee.

The Different Seed Catalog

I don't know how many people have written in and said, "Henry, we certainly enjoy your catalog. Somehow, it's more friendly and honest than the usual run."

Those are letters I'm mighty proud of. It's what I've tried to make my seed book—an honest, helpful aid to gardeners—something different than they usually find in seed catalogs.

Seed catalogs, as a general rule, are fancy advertising agents' dreams of what a garden should look like. They spend a lot of money painting up pictures of things you couldn't grow even if you lived in the garden of Eden. And most gardeners are expert enough to realize that and they resent it.

To make my catalog different, I try to use honest photographs—not fancy drawings or "retouched" pictures. I try to make my descriptions honest and to tell you the bad things about a variety as well as the good ones. If a variety isn't so good or if another one is better, I try to give you my opinion on the subject.

When I was a market gardener years ago, folks used to come to me to get seed "to grow things like you grow, Henry." And I gave them the actual seed and a little honest help. I found it paid, and I haven't given up the policy since.

We're just folks like you and think we know a little more about seeds and plants than most. We want you to feel at home, and if you believe that here, at last, is an "honest," "different," "homey" catalog, that's just right.

Tell Your Neighbor

If you like what you get from Henry Field's, tell your neighbor about it. My business here at Shenandoah has doubled a good many times in 60 yrs. because you good friends told your friends about me.

FREE FOR 1c FOR KIDS ONLY

This is for the kids and how they love it. They can't buy everything they'd like to raise so I've rolled 100 packets into one and made a big mixture of every kind of garden and flower seed imaginable.

It's a giant packet. It costs 1c. But it must be your own penny. Don't ask the folks for it.

Write "Conglomeration Packet" on your folks' order, slide in your 1c, and you'll be buying your OWN garden. This must come with your folks' order.

Henry Field.

Golden Wedding

"Dear Mr. Field: Here is a snapshot of my parents, Mr. & Mrs. Ross Strawn, Beloit, Kansas, taken on their 50th wedding anniversary. They have used a lot of your seed. My father won several blue ribbons at the fair on his watermelons grown from your seed."—Mrs. Walter Way, Rt. 2, Beloit, Kansas.

Congratulations to you, Mr. & Mrs. Strawn. A fine rose will be sent to you in remembrance of this happy occasion.—H.F.

Gorgeous Glads from Bulblets

"Dear Sir: Planted some of your gladiolus bulblets and they were the most successful bulbs I ever planted."—Amelia, Filmer, 1321 Bay St., Alameda, California.

Loves Her Flowers

"Dear Mr. Field: I am sending you a snapshot of myself taken in my flower garden which I love very much. Thanks also for the wonderful nursery stock which I have received from you. Have a lot of wonderful vegetables, too. My fruit trees are all growing fine."—Mrs. Ina Pennell, Box 296, Rt. 5, Lenoir, North Carolina.

Likes "Green Thumb" Collection

"Dear Mr. Field: I purchased your "Green Thumb" Perennial envelope collection and just wanted to tell you how fine they are all growing. The Phlox is now blooming and is the most beautiful color and has the largest blooms I have ever seen. Many have asked me where I got it."—Charles Wray, Barnes, Kansas.

On a Carpet of Green

"Dear Mr. Field: This is our little 5 mos. old daughter, Marilyn Kay, on a rug of green thanks to your grass seed we sowed this spring. Our yard had just been filled in and in a very few weeks was a carpet of beautiful green grass."—Mrs. C. V. Heintzelman, Leavenworth, Kansas.

FREE GIFTS with Your Order at Field's

You always get a free gift at Henry Fields. It's been a policy of mine for more years than I can remember to give full measure and then some. Some years in the past I've said just what the free gifts would be. This year I'm making it my choice, and I know you like what I send you.

Remember, there's always a free gift—with every order—the bigger the order, the more free gifts, or the bigger the gift.

Henry Field Seed & Nursery Co., "MIDWEST'S LEADING SEEDHOUSE," Shenandoah, Iowa

A New Gardener

"Dear Mr. Field: Here is a picture of myself and part of the onions I raised from a qt. of your onion sets. It was my first garden. I used your seeds and had a wonderful garden. Mother always used your seeds, too. Sure like your Bug Dust, but the bugs don't."—Mrs. Floyd A. Gee, Linden, Indiana.

Easter Lily for Outdoors

(Estate Lily) I've been wanting to offer you a hardy Easter Lily for 50 years. It's something we all want in our gardens. And here it is. A beauty as delicate and wonderful as any grown in a greenhouse. And you can have it right in your own backyard. Plant it this spring and you'll have blooms year in and year out. It grows 2½ to 3 ft. tall. Just like what you pay \$3 to \$5 for at the florists. And I'm pricing it right in line with any of my other lilies. BAN-11—59c each; 2 for \$1.00; 5 for \$2.29, postpaid.

Pleased with Shipment

"Dear Henry: Want to compliment you on my shipment of trees. I've ordered from nurseries all over the country but never before have I received trees in such good condition. For the first time, I've received Evergreens that I am sure will grow. They arrived in fine shape."—O. Ziegler, Grubville, Missouri.

How I Ship Nursery

Every year there are a few customers who write in to say that some of their nursery order is missing. What usually happens is that the order is split up according to when the nursery should be planted. Take a Spring order, for instance. Let's say the order was for garden seed, trees and perennials. We'd divide such an order into three shipments. The garden seed would leave Shenandoah the day after your order arrived. The trees would be shipped at the best time to plant them for your neighborhood. The perennials, because they are so small and need very careful packing, would be sent in a separate package. So don't worry about your order if everything doesn't come in one package. Look over the papers in the order carefully. They'll tell you about it. And anyway, you can depend on Henry Field to send good stock, on time, and at a fair price.

Good Luck with All

"Dear Mr. Field: Last spring I ordered several bargain orders from you. They were so cheap and always extras came, too. Wanted you to know of the good luck I had with them, and in every case it couldn't have been better. The rose is gorgeous, the Regal Lily has the largest flower I have ever seen and the 2 Bleeding Hearts have been in flower almost since planted. Thanks for everything."—Mrs. Tom Curtis, Odell, Illinois.

Don't Send C.O.D.'s

A few of you customers write in wanting me to send out nursery stock C.O.D. I just can't do it. What with all the delays concerned in the shipping of C.O.D.'s it isn't practical. Nursery stock should be planted the day received if it is to do best for you.

Off for the Hunt

"Dear Mr. Field: Just had to write and tell you how much I like your seeds. Have planted them for 3 yrs. and think they are wonderful. Am sending a picture of my 5 yr. old son, Paul, and his dog, Scottie. As you can see, they are out for a good hunt."—Mrs. John Voss, Rt. 1, St. Elizabeth, Missouri.

The Policy of the House

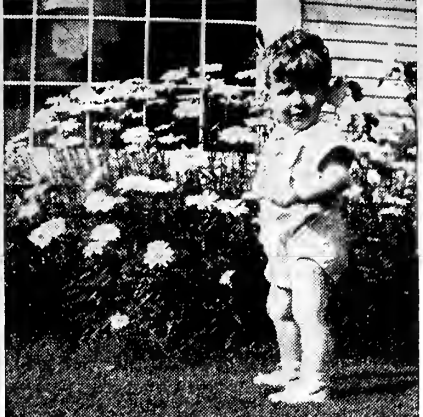

This "policy of the house" are the rules I set up for my helpers in the business way back some 30 or 40 years ago. It still is our guiding set of principles for our business dealings and holds good without the change of a word or a comma.
In all dealings with customers we keep in mind these general rules that have been the settled policy of the business from the start.
1. **Be Helpful**—Answer the customers' questions kindly, intelligently, fairly and carefully, whether there is an order in it for us or not.
2. **Don't Suss Back**—If the customer gets sassy, be patient, explain, and take the blame. It is natural to want to sass back, but it never got anyone anywhere.
3. **Give the Customer the Benefit of the Doubt**—It is generally safe to leave it to him and put him on his honor. Show him we want to be fair, and he will always come back in the same spirit.
4. **We believe in liberal treatment of customers**, extra seeds, extra care in packing, promptness, better measure and certainty in filling orders.
5. **We don't believe in hot air, big words, penny saving, trickery, carelessness or ill humor.** Cut them out.

Five-in-One Apple

Don't know how it happened but I clean forgot to put my famous 5-IN-ONE Apples on the apple page, so am telling you about them here. Everybody should have at least one.
AN20—The miracle tree. It bears 5 different Apples (that come on all season long) ON ONE TREE! Think of it! An ideal tree for the small yard, but thoroughly practical anywhere. Bears these five choice varieties on one tree:
● **YELLOW TRANSPARENT**
● **DOUBLE RED DELICIOUS**
● **STAYMAN'S WINESAP**
● **ANOKA**
● **YELLOW DELICIOUS**
Think of it! An ideal tree for the small yard, young. Supply short but while they last will sell them cheap. Last year sold out before April 1st, so order early. Fine heavy trees. Each, \$2.98; 2 for \$5.69. Express not prepaid.
3 VARIETIES ON TREE—AN19
Prices: Each, \$1.98; 2 for \$3.79. Express Not Prepaid.

A New Customer Writes

"Dear Mr. Field: This was our first year to order from you but will certainly not be the last. I think every seed grew. Got 6 rose bushes this spring and everyone bloomed during the summer."—Mrs. M. C. Raab, Dorn, Michigan.

Daisies Won't Tell

"Dear Mr. Field: Just received my new Seed Sense and sure enjoyed it. I'm sending a picture of my small son, Butch, picking my Shasta Daisies. Will send my fall bulb order in a few days."—Mrs. C. D. Jenkins, 8017 E. Florence Avenue, Downey, California.

My Nursery Guarantee

My nursery stock is all state inspected, free from disease, of the heaviest quality, and first class in every way or I don't send it out. That's why I can guarantee it. I also guarantee my stock to be absolutely true to name. If it proves otherwise, you can have your choice of replacement free or a full refund on the entire purchase price.
If you are not pleased in every way with my nursery stock when you receive it, return it promptly at my expense and I will replace it at once or refund your money, as you prefer. I guarantee it to reach you in first class live, growing condition. After you have planted it, if it fails to grow, I think we ought to divide up on the blame. I'll take one half and you and the weather take the other, and I'll replace at half price anything unsatisfactory through any fault of the stock. Fair enough?

Everlasting Farm Fence

For years I have been looking for a plant that was thorny enough to fence in animals, hardy enough to live under all conditions, and that didn't spread and be a nuisance. Think I've found it, and it's a beautiful thing, too. Can be used for all above, or as a snow barrier, for erosion condition, a wild life sanctuary. That's a big order.
I really didn't find it. The U. S. Dept. of Agriculture did, and most of the local conservation men are recommending it.
It's called ROSA MULTIFLORA, the wild rose of China that most of the hybrid tea roses are grafted on to make them hardy enough to live through tough conditions.
Here's my low prices: AN393—12 to 18 in. stock. 12 for \$4c; 25 for \$1.65; 50 for \$3.25; 100 for \$5.75; 200 for \$9.98, postpaid. 500 for \$20.95 exp. not prepaid.

Do not thaw frozen vegetables before cooking them.

Write Me a Letter

I always like to hear from my friends who grow my seed and nursery stock, so write me a letter. Tell me how things did for you. And if there's anything I can help you with, don't hesitate to ask. Advice, such as we can give, is free for the asking at Henry Fields.

82 Yr. Old Gardener

Mrs. Marguerite Krause, Palmyra, Missouri, sends this picture of her neighbor, Mr. Jefferson Davis Triplett. She says, "He is standing by the Stowell's Evergreen Sweet Corn purchased from you and raised in his backyard garden. The tallest stalks measured over 10 ft. This was taken a few days before his 82nd birthday."

From a Conglomeration Packet

"Dear Sir: This is my two oldest children, Nancy and Harold, with some of the things they grew from their conglomeration packets. They were so proud of their corner of the garden. Of course, we always use Henry Field seeds, too."—Mrs. Ollie H. Pickering, Brewster, Nebraska.

"Tomato King"

"Dear Henry: Here is a snapshot of myself with 3 of your tomatoes. I bought one of your 3c trial pkts. and raised the best and most tomatoes I ever raised. I am the tomato king of Dodge City. The 3 I am holding are worth 3c, so the hundreds I raised are clear profit."—Don Garver, Dodge City, Kansas.

Garden Planting Tips

BE SURE TO SAVE

These two pages may help you when you order your seed, and plant your garden, in the spring. They also may help answer some questions during the growing season. But if you have more questions, now or later, please write us. We always like to hear from you.

A SUGGESTED GARDEN PLAN

LOCATION OF GARDEN. The kitchen garden should be located close to the house. This gives protection against animals and thieves (makes it a lot handier too if you have a few odd moments to spend in it). The main or big garden should be so located and planned that it can be cultivated with regular farm tools. It saves a lot of weeding.

SOILS AND SHADE. Don't make your garden in the shade of big trees or in soils full of tree roots if you can avoid it. Most garden crops like sunshine and all of them appreciate and respond to good soil. Stony land and poorly drained soil are not the best.

FITTING THE SOIL. Plow or spade deeply in the fall, especially where there is sod to be turned under. Do a good job. Leave the land rough to hold snow and moisture. Harrow or rake thoroughly before planting. Good preparation will save a lot of cultivation.

SIZE OF GARDEN. There is only one rule I would give and that is to "Plant Plenty." What you do not need for the day to day table needs, can.

General Tips

Before plowing burn the rubbish and dead vegetable vines as they may carry disease or injurious insects.

Apply a good coating of manure if you can get it. Tree leaves are also fine. Some gardeners say cover the seed four times its greatest diameter.

Seed can be planted deeper on loose mellow soil than it can on clay or gumbo.

The same seed should be planted deeper late in the season when the soil is warm and more likely to dry out.

After planting very small seed, especially among the flowers, cover with a mulch to hold the moisture near the surface until the seed sprouts.

Plant some for the worm; some for the crow; some to pull out and some to grow.

Plant abundantly. Enough for yourself and some to spare.

Save This Chart—It Will Prove Helpful

Bush Beans
Inoculate with Nitra-gin and then plant when the ground is warm in rows 24 to 36 inches apart, covering the seed 2 inches deep. Thin later to 4 to 5 inches in the row. One pound will plant about 100 feet of row. Rows three feet or more apart if tended with a horse. Plants may stand as close as two inches apart or as far as six inches apart. Do not cultivate when plants are wet with dew or rain. Above directions suitable for small Limas. Navy beans should be planted late, after June 20th, so they will be too late for the bean weevil. Late plantings will also cause practically the entire crop to mature at one time. Use 20 to 30 pounds of seed to the acre. Space rows a convenient distance apart to cultivate. For small crop pull and pile to dry then thresh with a flail.

Large Bush Limas

All Limas require rich soil. Do not plant until ground is thoroughly warm. Wait until after corn planting time. If you have the time plant the seed on edge eye down. Cover two inches deep. One pound of seed to 100 feet of row. Rows not closer than 18 inches or 2 feet apart. Thin to ten or twelve inches apart in row. They do better if inoculated with Nitra-gin before planting. Can a few for winter use while they are green.

Pole Beans

Inoculate with Nitra-gin and then plant when soil is warm in hills 3 to 4 feet each way, covering seed 2 inches deep. 1/4 pound of seed to 75 hills. Stick a slender pole six to eight feet long, beside each hill and draw the tops of four of them together wigwam fashion and tie them. Can a few shelled, while green, to use in succotash. Use above directions for Pole Limas except they should be planted later and on rich soil, and two plants to the hill is better than more.

Table Beets

See Chart. Beets have best flavor when about half grown. Make several plantings for the season's supply. Last planting about July first. Use the plants thinned out for greens or transplant some of them. Store after frost, in a pit, cellar or cave where they will keep cool and moist enough to prevent drying out. Use the tender half grown beets for canning.

Mangel Beets—See Chart

The best crops are from early planting. After frost pull and pile in field until cold weather. Cover temporarily so sun will not dry them out and so they will not freeze. Store in cave or pit where there is enough moisture to prevent shriveling. Hold temperature as near freezing as possible and provide ventilation.

Carrots—See Chart

Seed sometimes slow to sprout so be patient. Cover the seed shallow and plant thick. Store in a pit, cave or cellar where they will keep cool and moist enough to prevent shriveling up. Some pack in dirt or sand and moisten occasionally.

Celery—See Chart

Start early either in the house or hot bed or in the field later on. Celery seed sprouts slower. Cover shallow and keep surface soil moist until plants are up. To allow plenty of room, thin out and transplant when quite small. When four or five inches, transplant to field. Space plants four to six inches in the row. Rows four to six feet apart if you use dirt for banking up. Three feet apart if you use boards. When plants are ten or twelve inches tall begin drawing in dirt to them drawing the leaves together. As the plants grow taller pull up more dirt always leaving leaves exposed. Some bleach with a section of a drain tile or by wrapping plants in heavy building paper.

Early Cabbage and Cauliflower

See Chart. Plant the seed in the house or hot bed six weeks or more before you set in the field, covering seed about one-half inch deep. Cauliflower will not head during hot dry summer weather so must be started early. Real early or real late plantings will not be troubled with worms very much.

Late Cabbage—See Chart

Plant in cold frame figuring 2500 plants to an ounce of seed, or drop in hills 3 x 3 feet or drill where plants are to stand at the rate of 1 pound to the acre. To mature late crop, figure 120 to 150 days from seed. Most folks plant their late cabbage too early. It saves a lot of hard labor and you are surer of getting a stand if seed is planted in field where crop is to be grown.

Chinese or Celery Cabbage

Sow outdoors the very earliest possible in the spring, or for a fall crop, sow after mid-summer. In many places in the middle west, the fall crop does better than the early one. Make your rows 18 to 24 inches apart, and thin the plants when they are 4 to 6 inches high, so they are 8 to 12 inches apart in the row. These plants quickly run to seed in warm weather without making any heads, so be sure to get them out early. Use raw for salad, or boil. Store in moist, cool quarters.

Cucumbers—See Chart

Plant when ground is warm in hills 3 x 6 feet covering seed 1 inch deep. Drop about a dozen seeds to the hill and thin later when bugs are gone to 2 plants in hill. Figure 100 hills to the ounce or 35 to the packet of seed. Help the plants resist the attacks of insects and disease by planting on rich soil. Use plenty of Bug Dust.

Egg Plant—See Chart

Figure 1500 plants from an ounce of seed and 150 from a packet. Seed slow to sprout. Do not plant too early. Egg plant should be the last spring crop planted in the garden.

Lettuce—See Chart

Thin to 12 inches for the head varieties and 6 inches for others. It can be planted in the fall just before freezing weather and it will come up very early in the Spring or started in the hot bed and transplanted to the field later. Loose leaf lettuce is easiest grown. All lettuce does better on rich soil especially head lettuce. Lettuce is a cool weather plant and is crisp and tender early in the season.

Mushroom Growing

For best results, temperatures should range from 50 to 60 degrees Fahrenheit. A cave or cellar 5 to 6 feet deep with the roof above the ground, and vent holes for ventilation is ideal.

Plenty of moisture is needed. The bed should not be exposed to a dry atmosphere. After manure bed several feet deep reaches 75° temperature, mushroom spawn bricks are broken into 1 1/2 sq. pieces (16 to brick) and planted 2" below surface, 1 ft. apart. Full information in regard to growing Mushrooms is included with each order for Mushroom spawn.

Muskmelons—See Chart

Plant when ground is warm in hills 3 x 6 feet, covering seed one inch deep and thin later when the bugs are gone to one plant every three feet.

Or space hills 6 x 6 feet and thin later to two plants to the hill. Figure 85 hills to the ounce or 30 hills to the packet of seed.

Look on the underside of the leaves, about time they begin to vine, for lice. Dust or spray with Bug Dust.

Muskmelons are ready to pull when a crack appears around the stem.

The melons are best if gathered early in the morning while cool.

Onions—See Chart

Onions do most of their growing before hot weather so get them in early.

When onions are as large as a straw, thin and weed.

When tops fall down pull and throw in windrows and allow to cure two or three days.

Store temporarily in shallow piles or slatted crates under cover.

If not harvested until a wet spell of weather it causes second growth and they will not keep well.

Use sets to grow bunch onions from, as many will not make a large bulb but will go to seed.

ONION PLANTS—The plants should be transplanted as early as possible. A light freeze will not hurt them.

Space the rows any convenient distance.

BERMUDA ONIONS—Follow the same general directions as given for onion plants. Pull and dispose of at once for they will keep like the native varieties. However, they will keep until about the first of the year.

Parsnips—See Chart

Plant early in rows 15 inches apart, covering the seed from one-half to three-fourths of an inch deep.

Thin later to 4 or 5 inches in the row. One ounce will drill 200 feet, one packet, 50 feet.

Parsnip seed sprouts better earlier in the season when the soil is cool and moist. Sprouts slow.

To mark the row so that you can cultivate before the plants are up, scatter a few radish seeds along the parsnip seed.

The radish will come up first and when they are large enough pull and use.

Store in a shallow pit where they will freeze, for freezing improves the flavor.

Or you can leave them in the ground, where they grew, until spring.

Peanuts

Plant when the ground is warm in rows not closer than 2 feet apart. Drop two kernels every 12 inches in the row.

Shell before planting but do not break the brown skin covering the nut.

Cultivate same as for beans. Do not cover the bloom. Harvest after frost and thoroughly dry before storing.

Harvesting Peanuts

Dig your peanuts after frost kills the tops. The spading fork is about as good a tool as anything.

Just dig the whole clump up, shake the soil out of the roots, pile them up around a pole in the garden, or in the corner, or some other well ventilated place and allow them to dry and cure. After two or three weeks you can pull the nuts off the roots. These should be cleaned up and dried and cured still more. Two or three weeks more is usually enough and then they are ready for roasting.

Small lots may be roasted in a baking pan in the oven. Try one of them now and then and you will soon recognize when they have been done just right to suit you.

Peas—See Chart

One pound of seed should drill 100 feet of row.

To get that delicious flavor use peas within two or three hours of the time they are picked.

You should plant both smooth seeded for early peas and wrinkled varieties for later heavier yielders. Be sure to inoculate with Nitra-gin before planting.

One plan is to drill two rows side by side about 8 inches apart with 2 feet between each pair of rows. This saves space and the peas stand up better.

Even bush peas like a little brush to at least climb up on. They are naturally a climber and you will find that you get better results this way. It is very important to plant them very early. The last of March is usually right.

Peppers

Plant early in the house or hot-bed and transplant to field when ground is warm. Give each plant not less than 1 inch space in the hot-bed, rows 4 inches apart. They like rich soil and warm growing weather.

Irish Potatoes

Seed stock should be cut, so that each piece will have two, or three eyes. Seed pieces about 1 1/2 to 2 square are best. The pieces are planted 4 inches deep and 12 to 14 inches apart in rows 3 to 3 1/2 feet apart. Spring planting is made as soon as danger of heavy frost is over and late plantings should be made any time from the last of June to August 15th. Good cultivation is important. After digging the potatoes do not allow them to remain in the open sun. Store in a dry, well ventilated, cool place.

Sweet Potatoes

Sweet potatoes can be started in hot beds about six weeks before time to set out. Good, sound sweet potatoes should be placed in a bed as close as possible without touching and covered with about two inches of clean sand. Plants are then set on low ridges about 14 to 16 inches apart in rows 3 feet apart. Set out in the garden after all danger of frost is past. Harvest the crop right after the first frost. Allow potatoes to dry out in the sun for four or five hours. Be careful not to bruise. Store in a dry warm, well ventilated storage place.

Radish—See Chart

Plant often so that you can always have them crisp and tender. Use them fresh from the garden before they become tough and woody. Plant the long varieties for late spring and summer use. Plant the winter varieties in late July when you plant late turnips and thin to at least six inches in the row.

Salsify—See Chart

Dig just before hard freezing weather and store in a shallow pit where it will freeze, for freezing improves the flavor. It is especially fine in soups either alone or with other vegetables or with oysters.

Spinach

Plant early in rows 14 inches apart, covering the seed from three-fourth to one inch deep. Thin later to about 3 or 4 inches in the row. One ounce will drill 100 feet; one packet, 25 feet. Plant as early as possible for it is most appreciated early in the season. Spinach can be planted in late summer and carried over winter by mulching same as for strawberries.

Squash—See Chart

For large seeded squash figure 25 hills to the ounce of seed and for small seed 50 hills to the ounce. Summer Squashes are delicious if used before they are a third or half grown. Combat squash bugs by dusting with Bug Dust.

Spaghetti Squash

Spaghetti squash is ready to use when the shell gets so hard you can't dent it with your thumb nail. Some like to bake the squashes whole just as they come from the garden, and 45 minutes in a good hot oven is usually about right to do the job well. After baking, break the squash open, remove the seeds, the fleshy part comes out very easily, butter it liberally and season to taste. You have a real treat in store. I have been told that the spaghetti squash may also be cooked—in other words, just drop the squash in a kettle of water and give a good thorough boiling. I do not know how well this works out, however, for we have never tried them this way at our house. Let me hear how you like our spaghetti squash.

Sweet Corn—See Chart

Make an early planting and in a week or ten days another between the rows of that first planting. For succession plant an early, an intermediate and a late variety at the same time. Or make several plantings of your favorite variety, or plant my special blend which ripens in succession. Be sure not to plant sweet corn close, or you will have only fodder and no ears to eat.

Tomato—See Chart

Sow seed eight to ten weeks before setting in the field. Any of the early bunch vegetables can be grown between the tomato rows. Drive three stakes around a tomato plant and fasten a barrel hoop to them and allow the plant to grow up through. This will act as a support. PRUNING: Tomato vines are trained to a single stem, or two stems. You can pinch out the terminal bud when the plants reach the height of about 5 ft. The vines should be gone over each week and any new shoots starting out from the main stem should be pinched off. Do not pinch off the blossom stem. If you are in doubt, allow this bud to remain until the next week.

Turnips—See Chart

The early crop of turnips should be in early enough to mature before hot weather or the quality will be poor. There is an old saying "plant your turnips twenty-fifth of July wet or dry."

Watermelons—See Chart

Drop 6 seeds to the hill and thin later when bugs are gone to 2 plants to hill. Figure 50 hills to the ounce of seed. If you want extra big melons keep all but two or three on the vine picked off as fast as they appear. If you plant in hills make them not closer than 8 x 10 feet and as far apart as 12 x 12 feet or even farther, sometimes. At this distance some growers allow only one plant to the hill. A dull green color indicates a ripe melon and a bright green color an unripe melon.

About Canning

Space is too limited to give you all the information you would want about canning, but you can easily get full and very excellent directions by writing to the Bureau of Home Economics, Dept. of Agriculture, Washington, D. C., for the canning information they will be glad to give you, or sending to the Kerr Mason Jar Co., 2912 Title Insurance Bldg., Los Angeles, Calif. They put out excellent books on canning which cost you only 10c. By all means, everyone should can plenty of vegetables, and fruit this year. Be sure you have plenty to eat by GROWING YOUR OWN and CANNING YOUR OWN.

About Inoculation

We get hundreds of letters each year asking whether inoculating garden seed with Nitrogen pays. The answer is, YES, DECIDEDLY, YES. It is only of value on garden peas, beans and Sweet Peas, but on these it makes a world of difference in the vigor of the plant and the amount of yield. We sell many thousands of packets each year. A 15c pkt. is enough for the average gardener as 1 pkt. treats 8 lb. of seed. Easy to apply. Full directions on the package. Another big aid to improving crops is the new Bone-Vitamin concentrate "GROW-AID" which stimulates quick root growth and makes for quicker and heavier crops on all garden seeds, flower seeds and nursery stock. It is relatively new, but working wonders wherever used. Try it this year and make your garden EXTRA high-yielding.

Crop Features to Utilize

Crops Occupying the Ground All of the Growing Season: Beans (Pole, Snap), Beans (Pole, Lima), Chard (Swiss), Cucumbers, Eggplant, Pumpkin, Okra, Onions, Parsley, Parsnip, Peppers, Sweet Potatoes, Irish Late Potatoes, Mushrooms, Salsify, Squash, (Winter), Spinach (New Zealand), Tomatoes, Watermelons.

Crops Occupying Ground Part of Season and May Be Followed by Others: Beans (Bush), Beets, Cabbage, Cabbage (Chcese), Carrots, Corn, Kale, Kohlrabi, Lettuce, Mustard, Onions (Green), Peas, Potatoes (Early), Spinach, Turnip (Spring), Rutabaga (Spring).

Crops Which May Follow Others: Beans (Bush), Beets, Cabbage, Carrots, Corn, Celery, Lettuce, Mustard, Late Potatoes, Rutabaga (Fall), Spinach, Turnips (Fall).

Crops Which May Be Planted Together in the Same Row: (Quick-germinating and maturing) Lettuce (Leaf), Mustard, Radish, Spinach. (Slower-germinating and maturing) Beets, Chard, Carrots, Leek, Spinach (New Zealand), Parsley, Parsnips, Salsify, Onions (Seed).

Crop Succession

Plant radish seed very thin and follow at once with parsnip, carrot, parsley, asparagus, onion or leek right in the same row. Pull the radish and use when it is large enough.

Plant Beets, Kohlrabi, Lettuce, Mustard, Spinach, Onion Sets, Radish or early Beans or Peas between rows of late Cabbage, Melons, Squash or Tomatoes.

Plant radish very early followed by early Cabbage plants set every two feet in the row and after the cabbage is off sow late turnips or Chinese Cabbage.

Plant two rows of Potatoes between each two Watermelon rows and dig potatoes after the Melons are gone.

Follow early Peas and Beans with late Cabbage. Celery may follow early Peas, Beans, Lettuce, Radish or Spinach.

Plant late turnips in vacant spaces about the garden.

Starting Plants in the House

A hot bed is the best place to start plants if you are willing to go to the trouble to make a good one. However, a box of good dirt placed in a south window of the house where it will get as much sunshine as possible and in a room where the temperature does not vary much is good.

If the soil you use does not already contain a large percent of humus, use about 50 percent well rotted manure. This amount is only suggestive, as there is a wide difference in different samples of dirt. What I mean by "Well rotted manure" is manure that could almost be classed as dirt. Don't use fresh manure.

Cover all small seeds about one-half inch deep. Make the rows 3 to 4 inches apart. Keep the surface soil moist until the plants are up or you may have trouble in getting a stand.

Winter Storage of Vegetables

Surplus garden vegetables can be stored in an unheated garage, storage house or shed for a month or so depending on how low the temperatures fall.

Store only those vegetables which are in good condition. Dig beets, potatoes, turnips, carrots and rutabagas as late as possible before the ground begins to freeze and cut the tops off. Do not clean the dirt from them, but place in boxes and pack in sand, loam and sawdust. The temperature should be between 35 and 40 degrees.

The vegetables can also be stored in a basement, in which the temperatures can be kept down and ventilation provided, on racks, shelves, slat bins or boxes, raised off the floor. A concrete floor should be sprinkled every few days and a dirt floor kept somewhat damp.

Pumpkins, squash and sweet potatoes should be stored at temperatures between 55 and 65.

When storage is required for a longer period, an outdoor storage pit may be made by digging a pit the desired size and deep enough to stand in. The vegetables may be stored in boxes, bins or shelves. Lay heavy boards over the pit even with the surface

Bug Dust

Since gardening began, insects have waged war on gardens. Today's gardener has a powerful weapon against bugs in the form Bug Dust.

You really won't believe how good my BUG DUST works until you see it work yourself. Some folks call it a "Miracle Dust."

BUG DUST works three ways. It not only is a STOMACH POISON but a CONTACT POISON and FUNGICIDE—ALL IN ONE DUST.

No need to buy three dusts—use my "BUG DUST."

Henry Field's BUG DUST is safe. Does not harm even the most delicate plants when used as directed. Absolutely leaves no poisonous residue.

Dust plants early before heavy infestation appears. Dust both top and bottom of leaves. Redust once a week until controlled and after any heavy rain. For cutworms mix Bug Dust with soil at base of plants. Bug Dust can be used as a spray by diluting 1 1/2 teaspoonful in gallon of water. Dust animals and poultry to rid them of fleas and lice.

and cover with a mound of earth. A ditch should be dug around the mound to lead surface water away. A door should be fitted to the entrance, preferably two doors with an air space between them to keep out the frost.

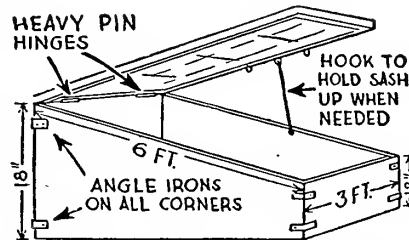

When the quantity to be stored does not require a very large pit, vegetables may be laid in a box, which is lined and covered with straw, set in a small pit covered with earth. Or a barrel may be used or a conical mound may be made to cover vegetables piled up like a pyramid.

Do not close outdoor root cellars tightly until the temperature inside has dropped close to freezing and do not cover earth pits until the soil has cooled off thoroughly.

Best Vegetables for Freezing

SNAP BEANS—Burpee's Stringless, Bountiful, SNAP BEANS, WAX POB—Pencil Pod black wax, Round Pod Kidney Wax. LIMA BEANS—Henderso Bush. CORN—Golden Sunshine, Golden Bantam, Golden Cross Bantam, Country Gentleman, Stowell's Evergreen. GREENS—Swiss Chard, Kale, Spinach. PEAS—Little Marvel.

Building a Cold Frame

If you don't want to go to the trouble of making a hot bed or haven't enough good manure on hand to build one, you can do very well with a cold frame.

A cold frame is built same as you build

the frame for a hot bed. It should be about eighteen inches high at the back side and twelve inches at the front. Place it in a sheltered sunny situation and back around so that the wind will not get in. Cover with glass or Glass Cloth.

Plant seed in a cold frame a week or so later than you would in a hot bed. You can grow all hardy vegetables, such as cabbage, cauliflower, beets, lettuce, radish, onions, and kohlrabi.

Beets, lettuce and onions transplant as easily as cabbage. And you can advance radishes a couple of weeks by planting them in this cold frame. Of course, the soil should be rich and mellow.

How to Make Hot Beds

You will find lots of pictures and descriptions printed showing how to make a hotbed, but from my own practical experience, consider most of the printed directions wrong in showing a box frame going clear down the bottom of the pit, as most of them do.

I have made hundreds of hotbeds, and my plan is to dig an ordinary hole in the ground, two or three feet deep and a little larger than the size of the hotbed I expect to make. For instance, if I am going to make a six-foot bed make the hole about seven feet across.

I then fill this full of manure, preferably fresh horse manure with plenty of straw in it, distribute it evenly and tramp it down solidly so that when finished it is at least four inches above the ordinary ground level.

Then make your frame of ordinary 1-inch boards, put it on top of this manure pile and fill it inside with dirt, four inches deep, and you are ready.

The dirt that is thrown out in excavating the hole can be used to bank up around the frame, practically to the top of it and extending back a foot or so on each side to protect the hotbed from the cold weather. The back side of the hotbed should be the highest, and I generally get this by using a 12-inch board at the back side and an 8-inch board at the front, although it might be well to give it even more pitch than this.

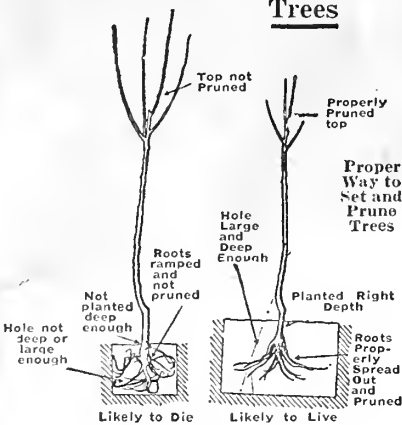

The hotbed can be covered with either cloth or glass frames. Glass frames are a little the best, but they are quite expensive.

The operating of the hotbed is best learned by actual experience. You have to make two or three of them and spoil part of them before you learn, but that is the only way to learn.

The main thing is to get started on them and get your cabbage and tomato seed planted.

NURSERY PLANTING TIPS

Trees

Fruit Trees

Should be set as indicated in the "5 Easy Steps in Planting." Also see Planting Chart on Page 28. Set Apples 30 to 40 feet apart and Peach, Apricot, Cherries, Plum and Pear, 15 to 20 feet apart. Some folks prefer to plant Apples 40 feet apart and set smaller trees such as Peach, Plum and Cherry in as filler trees. Small fruits, asparagus, and rhubarb may be planted in the orchard to give you immediate revenue.

PRUNE FRUIT TREES before planting as illustrated in picture—both roots and tops. Cut just above a bud which faces out. When properly pruned, they should not have more than 3 to 4 branches, and these should be cut to not more than 4 or 5 buds. As tree grows, prune in early spring, remove crossed and crooked limbs. Trim apples to a central leader with limbs on different sides at different heights, peaches so they grow low (cut back leader and all branches very short), and don't prune cherries or plums except to remove broken wood or crossed branches.

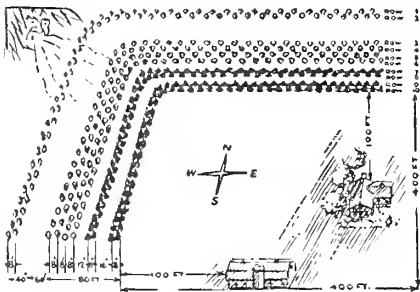

Shade Trees

Plant the same as fruit trees. Be sure the soil is tramped in firmly about the roots, and that there are no air pockets left. Give plenty of space between trees. Large growers—Elms, Soft Maples, etc. 30 to 50 feet. Medium growers—Chinese Elm, American Linden, etc. 25 to 40 feet. They may be set closer if you need to. At the time of planting, cut back all side branches at least, one-half, but do not cut back the main stem. Remove entirely any branch that threatens to become a double leader or any branch that forms too sharp a crotch with the main stem and might be broken later by a snow load. Cut off bruised and broken roots. If any further pruning is necessary, prune in early spring to remove bad crotches and cross limbs. In all pruning be sure not to leave any stubs but cut the branch off flush with the trunk.

Any shade trees over 6 feet tall should be staked for at least a year. Drive a good strong stake deeply into the ground beside the tree, and tie the tree loosely to the stake with several ties. If rope or wire is used, run the same to an old inner tube or wrap in burlap or rags so not to cut into the trunk of the tree.

Windbreaks

Every farm home should have a good windbreak to stop the cold winds and snow in the winter making the home many degrees warmer, and protecting the livestock for quicker, heavier winter gains. In the summer, a good windbreak stops the hot, drying winds.

Varieties suitable for each row:

- Rows 1 and 2: Chinese Elm, Caragana, Russian Olive, Willow, Mulberry—planted 4 ft. apart.
- Rows 3 and 4: Carolina Poplar, Soft Maple, Elm, Ash—planted 6 ft. apart.
- Rows 5 and 6: Cottonwood, Am. Elm, C. Elm—planted 6 feet apart.
- Rows 7, 8, 9, and 10: Austrian Pine, Spruce, Cedar—planted 8 to 10 ft. apart.

Besides giving protection the windbreak is a source of firewood, lumber, and posts, and a never ending satisfaction of having something green and cooling right at hand for both man and animal.

Here's a quick, easy way to plant windbreak trees. First take a walking plow, throw out a deep furrow along the row of trees to be planted. (Plow fast enough so as to throw dirt well out of furrow.) Second, put each individual tree against the straight edge of the furrow, then throw the loose dirt in over the roots. Pack firmly with the feet. CUT ALL SEEDLINGS OR TREES BACK TO LESS THAN HALF THEIR HEIGHT AS SOON AS PLANTED (except Evergreens, which require no pruning). Use the cultivator plenty the first two summers. Plant either fall or spring with good results.

Vines

Plant at least 2 or 2½ ft. out from the house so you will have good drainage. Varieties that bloom during the spring months should not be pruned in the fall, except for the removal of dead wood. Varieties which produce blooms on new wood in summer and fall, should not be pruned until they have become well established. Then the vines may be cut back to the height of about 3 ft. to encourage vigorous growth.

Climbing vines should have good soil and plenty of water. Cut back when planted and tie or stake securely. Later train to solid trellis as motion is injurious to the plants.

Vines for North and East Side: Clematis, Ivy, and Wisteria.

Vines for South and West Side: Silver Lace, Scarlet Honeysuckle, Pink Flame, Ivy, Bittersweet, Trumpet.

CLEMATIS—Clematis thrives best in rich garden loam. Sand or peat moss may be added to heavy soil to loosen it up. The soil should be well drained. It is best to mix some lime in with the soil when planting. Place the crown of the vine about 2 inches below the surface. Don't cultivate as they like to be left alone. In the fall, any dead wood can be removed which is the only pruning needed.

Shrubs

Plant as described in general instructions. Trim back within several inches of the ground after planting, to make room for bushy growth. (See Illustration.) 1 ft. of dirt should be mounded up over each fall-planted shrub and left until Spring. Set small varieties 1 to 2 ft. apart, medium grower, 1½ to 3 ft.; tall grower 3 to 6 ft.

Shrubs require little pruning. In no case prune square across the top as this spoils their natural habit of growth. Cut branches off at ground. This will force young growth. Prune early blooming shrubs like Spirea V. H. and Lilacs right after they bloom. Prune midseason and late blooming shrubs in late fall or early spring.

If planting in beds, remove all sod and spade up space between plants. In planting around foundation, stay at least 2 ft. and with large growing shrubs, as much as 3 ft. to 4 ft. away.

Miscellaneous Tips

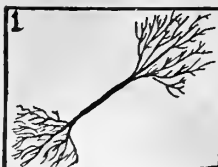

Planting or Transplanting—Fall or early spring are the times best suited for transplanting. Practically anything can be transplanted in those periods providing proper care is taken that the plants do not dry out, and that the roots are not too long exposed to sun or wind. In transplanting from one location to another, or from one home to another in case you are moving, it is safest to move as much dirt as possible in a ball along with the root. This is particularly true of Evergreens and large trees with trunk more than 4 inches in diameter. Always replant at the same depth that the plant was originally growing. Always tramp the dirt in well around the roots so there are no air pockets. Always leave a cup-like depression around the plant so it may be well watered occasionally until it is well established and growing. And, a good safe rule is to prune back one-half of the top of most any plant that you move, with the exception of the Evergreen and the main trunks of shade trees. If necessary to store plants awhile in the winter before planting in a new location, take up lots of dirt with the roots and cover the ball of soil with burlap, and place in a dark cool corner of your basement. Water occasionally except the strawberries, as they are better allowed to be quite dry. Be sure the hole you make at the new place is plenty big.

Winter Mulch—A Winter Mulch is essential with all newly planted plants—no matter what kind they are. After the first winter except in extreme northern states, it is not absolutely necessary that it be applied except to strawberry beds. Strawberries should always be mulched. On fresh planted shrubs, trees, roses, peonies, oriental poppies, the best possible mulch is a good mound of dirt pulled over the plants just before freezing time. On roses, shrubs and trees, the mound should be at least a foot high. It won't do any harm if it is 18 inches high. For Oriental Poppies and peonies it should be at least 6 to 9 inches. This is to keep the plants from heaving out of the ground by frost action. It is desirable to cover this mound with straw, hay or some sort of a litter 3 or 4 inches deep if you have the same to put on. It is not absolutely necessary that this be done, except that the litter keeps the soil mound from washing away in the winter thaws. In the spring after the ground thaws, pull these mounds of soil away and the plants will start to grow.

On Perennials and strawberries and such plants with a soft crown, where a pile of dirt cannot be put on the plants without injury, cover after

When you water, soak the ground down to the roots. That is better than sprinkling with a nozzle.

5 Easy Steps in Planting

(1) NURSERY STOCK IS ALIVE

Remember nursery stock is alive and must be handled with care. DO NOT EXPOSE ROOTS TO SUN OR AIR. Keep damp, cool, well covered and away from freezing temperatures until planted. If you can't plant at once, open package, moisten well and keep covered with damp packing. Or treat as per No. 3.

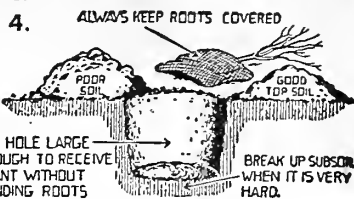

(2) PLANT AT ONCE

When stock arrives plant AT ONCE if you can. Soak roots (but not tops) in water before planting, especially if the stock has dried out some en route. Do NOT expose roots to air or sun. You can leave root of all plants in water for 24 hours except strawberries and perennials. Plant all nursery stock at once if you possibly can.

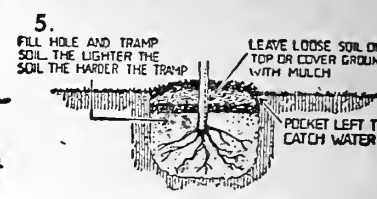

(3) HOW TO STORE

IF YOU CAN'T PLANT AT ONCE, and if weather is warm, "heel in" as shown. Cover stock at least 6" deep with moist soil. Strawberries and perennials should be planted at once or kept moist in their packing. IF WEATHER IS COLD, store in frost proof place (cave is right). Leave stock in packing and keep moist by sprinkling. Plant as soon as you can.

(4) HOW TO DIG HOLE

Dig hole large to hold roots without crowding or bending. Set stock 1" deeper than it stood in nursery row. Trim off broken and tips of roots with SHARP knife. Loosen soil in hole and set roots in natural spreading position.

(5) HOW TO SET

Then half fill hole with fine top soil, jogging tree. Pack earth firmly by tramping to avoid any air pockets about roots. Slowly pour water in to fill hole. Let settle, then fill with earth and tramp down firmly. Leave a depression around tree to collect and hold moisture.

Spirea Van Houtte	4-6 ft.	Shade or sun	April-May	Light—cut from ground after blooming
Spirea Thunbergia	3-5 ft.	Sun	April	Light—after blooming
Spirea Billardi	3-5 ft.	Sun	June-July	Light—Early spring
Spirea Prun.	4-6 ft.	Part shade or sun	April-May	After blooming
Sumac	6-8 ft.	Shade or sun fall	Attractive foliage red in fall	Any time needed
Tamarix	6-8 ft.	Sun or shade	May-June-July	Early spring. Every few years cut to ground if plant is spindly
Weigela	4-6 ft.	Part shade	May	Light—after blooming

*Light pruning means removing only crooked or very old woody stems when needed.
*Heavy pruning means plants can be cut to ground each winter if low growth is desired. These plants bloom on new wood.

the ground freezes with about 6 inches of Oat or Wheat straw or some other light mulch that will not pack and rot. Do not apply until after the ground freezes or the mice will get in and make their holes and eat your plants during the winter. Do not remove mulch until after the ground completely thaws in the spring and then remove top of the mulch first and then gradually remove the remainder.

Watering—Hoe or cultivate frequently, stirring the ground after rain or watering. In dry weather water thoroughly once a week. The best plan is to make a basin around the plant and fill it full of water several times until the ground is soaked 12 inches or more deep. After the water has soaked away, then fill up the basin with dry dirt.

It is much better to let the water run out of the hose without a nozzle than it is to stand and sprinkle with a nozzle.

About Fall Planting

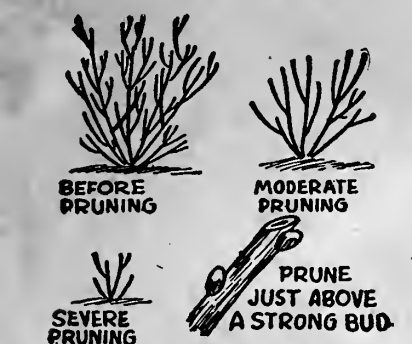

Besides the fall bulbs, such as tulips, hyacinths, narcissus and the like which must be fall planted, almost all hardy nursery stock can be planted in the fall as well as in the spring. In fact, many plants do even BETTER fall planted than spring set.

You see, by planting stock in October and November when the stock is dormant, you give the plant a chance to become established in its new location before growing time starts. The roots, below the frost line, START GROWTH AT ONCE, and for this reason, fall planted stock often is way ahead of spring planted stock the following summer. Do not expect most fall planted material to make top growth before winter because it won't.

Fall planting is just the same as spring planting except pruning should be done early the next spring, and a mound of dirt at least a foot high should be pulled up on top of any shrub, tree, roses, peonies, oriental poppies, lilies, and left there until spring.

This is to keep the frost from heaving the freshly set plants out of the ground during the winter thaws. If convenient, cover this mound of dirt with a mulch of oat or rye straw or some other litter to keep the mound of dirt from being washed away in the possible warm winter rains.

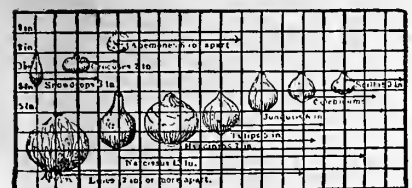

All strawberries or perennials with a leafy crown over which dirt cannot be piled, should have a mulch of 4 to 6 inches of rye or oat straw or some other litter that will not pack and rot, put over them after the ground freezes. This should be taken off gradually in the spring after the ground thaws.

Prune shrubs severely after planting. Follow Shrub Planting Chart for later pruning.

Planting Fall Bulbs

Fall and early winter is the only time you can plant tulips, crocus, daffodils, narcissus, and the like. They spend the fall and winter making roots and then come up early in the spring.

Set at the depth and distance apart shown in the diagram. You can either dig out a complete bed or simply a small hole for each bulb. Some people put a little sand in each hole which is nice as it allows drainage. Don't allow air spaces about the bulb and be sure to **PACK THE EARTH DOWN FIRMLY**. If you wish, you may put a little fertilizer **BELOW** each bulb for the roots to feed on. Do not let the bulb touch it.

It's a good idea to mulch with lawn rakes or straw or rotted manure. After blooming next spring, allow the tops to die down naturally and then either dig and store, or leave for another season of bloom.

Plants for Shady Locations

SHRUBS—Japanese Barberry, Snowball, Snowberry, Hydrangeas, Spirea V. H., Honeysuckle.

PERENNIALS—Lily of the Valley, Violets, Bleeding Heart, all wild-flowers, Bluebells, and all the ferns.

ANNUALS—Nasturtiums, Snapdragons, Lupine, Sweet Williams, Pansies.

Tips on Planting

(1) Just before planting, stick the roots of the shrubs in a mixture of water and soil about as thick as grease.

(2) When pruning always choose a place just above a strong bud, **NEVER BELOW**.

(3) Plant your shrubs in a curved line, and not in straight rows. Keep away from the foundation of the house or building, and use smaller shrubs in front of the taller ones.

Pruning Tips to Remember

SHADE TREES—If smaller around than your wrist, you can trim them any time. If larger, trim only in the winter when the sap is not flowing. Trim in early spring to prevent bad crotches, crossed limbs.

FRUIT TREES—Prune early in spring, cutting out bad crotches and limbs that interfere with each other. Don't cut off short spurs from main limb as this bears first fruit.

GRAPES—Prune in February before growth starts in the spring. Cut off all old wood which has borne fruit.

HYBRID TEA ROSES—Prune long shoots off before winter covering. Prune balance of wood to 8 inches from the ground just before growth starts in the spring.

SHRUBS—Prune early bloomers like Bridal Wreath, Lilacs, etc., right after they bloom. Later bloomers like Hydrangeas can be pruned in the spring.

HEDGES—Prune several times each season whenever it is necessary to keep the hedge in the shape desired. An evergreen hedge should be pruned in late May or June. If you have a straggly hedge, cut it back to within few inches of ground, fertilize and it will grow nicely. Always prune top narrower than bottom.

Asparagus

Set asparagus 15 in. apart in rows 3 ft. apart either spring or fall. A bed dug 18 in. deep with well rooted manure for the bottom six inches, and rich top soil for the next six inches is best. Set plants, spreading the roots well and with eye up. Cover with 3 inches of soil and tramp well. Or simply plant in deep furrow.

Gradually cultivate soil into trench as plants grow so ground is level. Salt is not injurious to Asparagus, and may be sprinkled to cover the ground to keep weeds down. Dress in fall with manure. Do not cut much the first year or two after planting.

You may cut until about the 1st of June. As soon as tops turn yellow in the fall, cut close to the ground, then fertilize and mulch for winter.

Blackberries

Set in good sized hole about 2 inches deeper than they were in the nursery row. Spread roots well and pack firmly. Trim back to within few inches of the ground when planting. Set 4 feet apart in rows 6 feet apart for field cultivation. (1815 per A.) Closer for gardens.

When new growth reach 24", pinch off tip to encourage branching. Next spring early, trim back to 10 in. Prune right after picking the fruit. Remove all old canes that have borne fruit and burn. Leave 3 to 5 branches on new canes. A permanent mulch may be kept on berry beds to conserve moisture and keep down weeds. Dig out any sickly bush that appears and burn.

Blueberries

Get a start of blueberries, can't beat them. They're easy to grow except they need acid soil. So with every blueberry order shipped, we send enough aluminum sulphate to acidify the soil around the plants and insure proper growing conditions. Dig your hole extra big, mix in 2 tablespoonsful of the Al. Sulphate and plant as usual. Maintain acidity by adding 1 tablespoonful of Al. Sulphate each spring, summer and fall to soil. That's all that's different than with other nursery stock. Plant 6 feet apart. They like lots of moisture and good drainage. Cultivate frequently only 2 inches deep as roots are shallow. Our peat moss helps hold moisture and keep soil acid.

Additional quantities of Aluminum Sulphate can be secured at Henry Fields.

Boysenberry and Youngberry

After the soil has been thoroughly prepared, set the plants 3 ft. apart in rows 4 ft. apart. Don't crowd the roots. Pack the earth around solidly. After planting, mulch with a heavy application of well rotted barnyard manure. Plants can be left to trail on the ground the first season. In the fall, after the growth has stopped, prune back about one-half of all new growth, and just before the ground freezes, cover with several inches of straw.

Once the vines commence to bud, they should be fastened to a trellis, similar to a grape trellis. Build a three-wire trellis with the top wire about 5 ft. from the ground and the bottom wire not lower than 2 ft. from the ground. Weave the vines fan shaped on these wires. Don't cultivate much, just enough to remove the weeds. It is best to remove any very small canes that are found, and shorten the longer ones at the time of putting the canes on the trellis wires in the spring. Old canes should be cut out and destroyed after the crop is harvested.

Cannas

Plant late in spring in rich bed. Cover with 2 inches of fine soil pressed firmly. Or dig a deep bed and place manure and fine top soil 6 in. deep below the bulbs. Water in dry weather. Cannas like sun. Plant 18 in. apart. After tops are killed by frost, dig and store in cave or cellar where dry and cool. You can cover with dry sand or sawdust.

Do not divide the roots until towards planting time. Cut them in pieces with two or three eyes or buds to each piece.

Currants and Gooseberries

Plant in any rich moist soil, or even where there is part shade. This doesn't seem to bother these plants. Cultivate to hold moisture and put them about 4 feet apart. Keep to edge of garden so they are not in way of plowing.

Dahlias

Plant in well-drained sunny location, after soil is warm. Dig holes 6 in. deep 2 feet apart, and plant tuber on side with eye up and cover with 3 in. dirt pressed firmly. Fill hole gradually as plant grows.

When plant is above ground, remove all but one sprout and pinch that back when 12 to 15 in. high to force lower growth. Dig in fall after first frost. Cut tops to roots and store upside down in cool dry cellar or cave. Divide in spring and be sure to get one eye with each division.

Evergreens

Evergreens are not particular about the soil, but they like lots of water when first planted. Water daily if necessary until they are well established. Give them fertilizer now and then, and give them a mulch over winter. It is not necessary to wrap or in any other way protect them, at this season. Do not prune except Junipers and Arbor Vitae which can be pruned to any shape desired.

Gladiolus

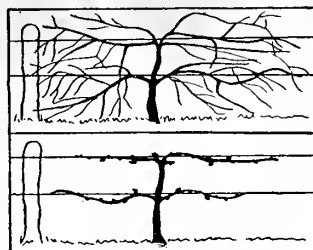

Plant 5 to 6 in. deep and 4 to 8 in. apart, in sunny location. Plant at intervals of two weeks for longer period of bloom. When tops die, dig bulbs, cut off tops and dirt and store in cool, dry place.

Gladiolus can be planted early in spring, and as late as the first of July.

Grapes

Dig hole big as though planting an apple tree, and use the same method. Remove part of tops and roots as shown in picture on "Top pruning line," and "Bottom Pruning Line." Leave two buds above surface. Set 6 ft. in rows 8 ft. apart. First year only the main stem should be allowed to grow and one vine trained each way on 2 trellis wires about 24" and 36" above ground respectively.

PRUNING GRAPES: Prune only in the winter when vines are dormant and weather not too cold. Keep in mind that canes that have borne fruit one year will not bear again. So prune off all old canes (year old shoots) coming out from main

Mature grapes before and after pruning.

stem **EXCEPT** 4 black canes (shoots that started to grow the spring before) two of which you train in opposite directions on each vine. These should be cut back to 3 or 4 buds each (6 to 8 in. long). From these buds (found at the joints) come new shoots that bear leaves and grapes the following summer. 4 of these New Shoots will be used the **NEXT WINTER** as above, etc.

Hedging

Dig trench 10 in. wide. Set plants along straight side of trench as shown in illustration J and a trifle lower than they were in nursery row. Trim within five inches of ground immediately after planting to give bushy growth. When new growth starts, nip off the end of each growth to stimulate branching. Set privet and other upright varieties 6 to 12 in. apart; Barberry and other bushy shrubs 1 foot apart; tall shrubs for high hedges 2 to 4 feet apart.

HEDGE PRUNING—Hedge pruning should be done several times each season—before growth starts in the spring, in May and in July. An evergreen hedge should be clipped in late May or early June after the new growth has started. If you have a weak, straggly hedge, cut it back to within a few inches of the ground, fertilize it well and it will grow out nicely for you. Always prune top narrower than bottom so bottom will get sun.

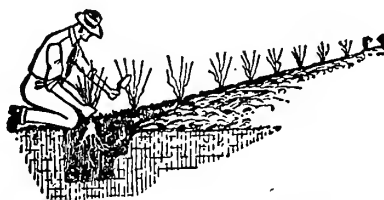

Illustration "J" Setting a Hedge

Hydrangeas

They thrive best in a rich, moist soil, and flower freely either in a sunny or shady situation. Severe pruning should be practiced, and the weak growth thinned to have good blooms. Blue Hydrangeas need some winter protection.

Iris

Plant shallow with rhizomes just barely covered with dirt. Spread roots like fingers. Be sure to place Iris where they will get at least a half day's sun and good drainage. Do not let them be crowded by other plants. It is necessary to dig, separate and replant your Iris clumps every three to five years. Transplant in August or September. If planted early enough will bloom next spring.

Lilacs

Plant several inches deeper than they were planted in the nursery row. They like an early planting and a fairly sweet soil. Trim by cutting out old blooms. Don't prune tops severely and prune only right after blooming. Try the new French Hybrids for all colors in Lilacs.

Lilies

Plant all Lilies on well drained soil. Do not use manure. Plant either fall or spring (except Madonna which is fall planted). If you plant in the fall, mulch lightly to prevent freezing and thawing. Good idea to put 2 in. of sand below bulbs. Plant bulbs at depths specified for each variety in the catalog.

The planting depth should be three times the diameter of the bulbs. Move lilies after they have been in one place for a few years as the bulbs become overcrowded. Plant where there is plenty of sunshine.

Narcissus

Narcissus, which are also called Daffodils and Jonquils, must be planted in the fall. Give them a fully sunny location. They like plenty of water. Give them a light mulch over the winter. Place the bulbs upright in soil.

After blooming, allow the tops to die down naturally and then either dig and store or leave for another season of bloom.

Peonies

Plant in rich soil, thoroughly spaded. It is extremely important that the pink eyes should be planted between 1 1/2 to 2 inches below the ground level. Never plant them deeper than this nor any shallower. This is the most important point in planting peonies.

Plant either spring or fall. Peonies are heavy feeders, and should be fertilized well. Spade in manure and bone meal or Sheep-solizer way deep below the roots. Water often. They are easy to grow and so beautiful, plant lots of them.

You may dig and divide your clumps of peonies in the fall, though they probably will not need it for several years. Be sure to get several eyes on each piece. Cut off any bad or rotted places. Peonies must be planted in full sun.

Perennials

Plant as soon as plants arrive, in good rich soil. Set so top of clump is just under surface of soil about 1/2 in. If growth has started set crown (where roots join tops) at the surface. (See illustration). Plant bushy growing plants farther apart than lower growing sorts. Mulch fall planted perennials with straw and leaves (never leaves alone as they will choke the plants) to prevent alternate freezing and thawing. See chart, bottom of next page.

Perennial's Just Planted

Raspberries

Same as blackberries. Cover roots about 3 to 5 in. deep depending on size plants you order. Plant 3 ft. apart in rows 6 ft. apart.

Rhubarb

Plant 3 feet apart in good garden soil so crown is 1 to 2 in. below surface of soil. Plant either spring or fall.

Give plenty of moisture. Clean cultivation and feed generously. No stalks should be pulled until the second year, and then only little. After that they may be pulled as long as you can use Asparagus. You may dig, divide and move in the fall or spring.

Roses

Plant in rich soil, well-drained, sunny location, with bud (where top joins brown root) 2 in. below the surface. Plant as suggested in the general planting directions early in spring, except dirt is mounded up 5 to 6 in. high above the plant and left about 10 days until buds start when it should be removed. Set 18 in. apart. Climbers 6 ft. Most of our roses are pruned ready for planting, but if not, cut back to just above the mound of dirt you have piled up. (5-6 in.).

LATER CARE: Prune back severely in early spring to within 5 or 6 inches of the ground to force new growth. (Hybrid Perpetuals should be left 15 in. long. Climbers should have wood that bloomed cut out each summer.) Mulch well in winter with mound of dirt 1 ft. high and then a layer of leaves and straw. All roses need good cultivation. Plant with this in mind. Watch out for suckers. Dainty Hybrid Teas are grafted onto vigorous roots and these sometimes throw up canes of their own. These have 7 leaves instead of 5 and must be cut out.

When setting out roses, cut the ends of all roots with a very sharp knife. No roots should be left more than 12 inches long. Remove any injured portion and make sure the soil is pressed firmly around the roots leaving no air pockets. Dust your roses regularly every two weeks after the leaves first appear with Henry's Bug Dust. You will have neither bugs nor disease.

Plant roses with the joint, or bud, an inch above ground, then pile soil 10" high about canes to prevent drying.

Strawberries

Pulverize ground thoroughly. Set plant with crown just at the surface of the earth. **DO NOT GET CROWN COVERED.** (See illustration below.) Be sure roots are spread out fan shaped and hang down full length without crowding. Press soil firmly and remove dry or bruised leaves. Plant early as you can work the soil in spring. For field work set 24 in. apart in rows 3 ft. apart and in garden work about 24 in. apart each way. Mulch with 3 or 4 in. straw in fall. This mulch can be left on the following season to retain moisture and keep down weeds. Strawberry plants will not cross fertilize, so you can plant the varieties you choose. If bed is too crowded, thin out old plants. Some people let runners fill the rows and dig the old rows every two years.

Grub worms sometimes bother strawberries planted in sod or new soil so it is best to prepare the bed in the fall if you are planting them in new soil. Everbearing varieties

Too Deep Too Shallow Just Right

will produce the first season—the others not until the following year.

GARDENING DEPARTMENT

SOME TOOLS AND MISCELLANEOUS ITEMS YOU WILL WANT

INOCULATE YOUR PEAS AND BEANS FOR BIGGER YIELDS

4015—All your garden peas, beans, and sweet peas should be inoculated. Inoculation helps the plant take nitrogen from the air and fertilize your soil—giving you bigger yields, faster growth and garden soil that's not worn out.

Just takes a minute to dust it on your seed—no trouble at all but it makes a world of difference in your yield.

There's enough in this 15c packet to inoculate 8 lbs. of seed. That's enough for most of you. Full directions on each packet. Be sure and everybody order it. Garden size 15c pkt., postpaid.

MOON SIGN BOOK

NOTE: Planting by moon signs has been argued pro and con since I was a boy. I am neither "for or against" planting by moon signs because I don't know. Lots of people believe in it and lots don't. If you do, here's the best book put out on the subject. H. F.

PLANT BY THE MOON

256 Pages

By Llewellyn George

Well Known Author and Lecturer

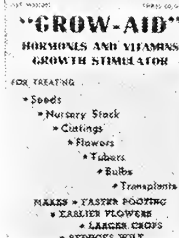

561—The Moon Sign Book gives complete instructions in the use of planetary influence on planting and harvesting, also business and personal affairs, etc., the result of more than thirty-five years of research. Why do farmers plant Potatoes in the dark of the moon? When should Corn, Beans, etc., be planted? Why florists plant seeds in the 2nd quarter and a certain Moon Sign? Why you should plant flowers in Libra on a certain date and Moon's phase? These and many other questions are answered and explained in a simplified yet scientific and practical manner. The Moon Sign Book has been published annually for over 37 years with sales increasing each year. A mine of useful information. Price \$1.30 in the U. S.

"GROW-AID"

The Sensational Seed and Plant Stimulant
Hormone-Vitamin Concentrate

Here is the miraculous seed and plant stimulant in concentrated form. A combination of the recently discovered, very beneficial root stimulating Hormones and the better known vitamins that have made plants and seeds GROW FASTER, YIELD MORE, AND PRODUCE LARGER FLOWERS AND FRUITS. Tests by state colleges everywhere approve it. In one test, Dr. J. C. Ireland of Oklahoma Experiment station showed increases of 37 to 47% in yield when used on corn. Often, number of roots on a plant are doubled when GROW-AID is used.

This miraculous dust multiplies roots, speeds up root growth and stimulates and makes larger plants when used on vegetables, plants, shrubs, seedlings, trees, or flowers.

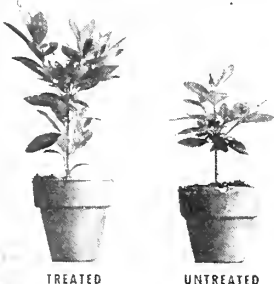

USE AS DUST OR SOLUTION— Very Easy to Use

Can be used either as a dust on seedling roots or sprinkled on your vegetable seeds or may be used as a solution (about 1 teaspoonful to a gallon of water) to soak roots before planting or to water plants already established. FULL INSTRUCTIONS FOR USE on Seeds, Plants, etc., on each package.

Use It on All Your Plants and Seeds for Better Results

1. Dust it on flower or vegetable seeds before planting.
2. Soak nursery stock roots in solution before planting.
3. Dust Seedling roots before transplanting.
4. Use as spray for fruit trees, KEEPS APPLES ON TREES UNTIL RIPE.
5. Use as solution to water growing SHRUBS AND TREES.
6. Use as solution to water HOUSE PLANTS.
7. Use a solution to water ROSES, SHRUBS, LAWN. A general—all around product every gardener should have.

A sample of how "GROW AID" improves plants it is used on.

Plants Get Hungry, Too — Feed GREEN THUMB Liquid PLANT FOODS

Easy to Use—Just Like Watering

Since I listed Green Thumb in my catalog last year for the first time, I've received hundreds of letters from my customers telling me how clean and easy it is to use, and how much good it did their lawn and shrubs and trees and flowers and vegetables.

Costs Less

As I explained last year, I'd been wanting to get Green Thumb for you, but it had been made only in liquid form, and I didn't want you to be paying costs and postage on heavy glass containers. So the Green Thumb people made it for us in powdered form and, so far as I know, we're still the only ones selling Green Thumb in the handy, powdered form.

Goes to Work Right Now!

You just dissolve 2 level teaspoonfuls in a gallon of water and you have the genuine Green Thumb Liquid Plant Foods—a clear, green liquid—odorless and non-poisonous—and it contains the nutrition growing things need. And being liquid, it goes directly to the roots so the plants perk up right away.

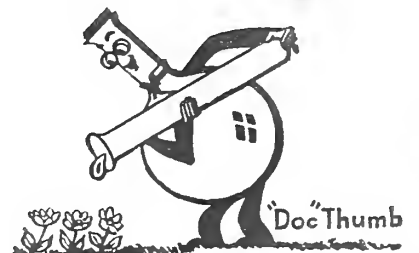

No Mess—No Mixing—No Digging

2 Teaspoonfuls of HENRY FIELD'S Powdered Green Thumb + WATER =

1 GAL. Green Thumb Liquid PLANT FOODS

If your plants get hungry and sickly, with yellowish leaves, stunted growth, small fruit and colorless flowers, they need food and water and cultivation. Now you can spend hours fertilizing these hungry plants, or you can use Green Thumb and do a good job in a short time. And I don't know of anything better for starting newly-planted things off right.

Mrs. Field and myself want you to feel like we're old friends.

THIS IS WHERE YOU BUY the WORLD FAMOUS HENRY FIELD Garden Seed

Have always taken a lot of pride in my garden seed. That's because I'm a gardener myself. Some seedsmen do a lot of talking about "scientific laboratory testing and trial grounds" and such. Of course, I have my own private seed laboratory where all seed is tested for germination and purity (and none but the best sent out), and my big trial grounds where all the seedhouse folks, and anybody else that wants to, can see just what's what. But more important than anything else is—I *test it out myself*. In my own garden. And Mrs. Field prepares it for the table. And we test it on the dinner table BEFORE we list it in the catalog.

This way we KNOW it's good. And you do, too. You never have to worry about any seed you buy at Henry Field's. Besides every other kind of test, you know it's **TABLE TESTED**. And that's what counts.

On top of that you have my unqualified guarantee on everything I sell. It's 100% satisfaction, or your money back at Henry Fields. It's been that way for almost 70 years, and I don't intend to change now.

HENRY FIELD.

Am starting out the catalog this year with the items that most of us don't plant often enough. Want you to see them first, so you can give them consideration. H. F.

ODDS and ENDS DEPARTMENT

It's Easy to Raise Ornamental Gourds

The gourd hobby is becoming more and more popular. One man I know has over 500 different home articles made out of gourds. Lampshades, etc. They make fine decorations, painted or unpainted.

- 1106 SMALL FRUITED MIXTURE.** No end of kinds, colors, and varieties in this mixture. Price: Pkt. 10c, postpaid.

- 245 DILL.** Annual. Used for flavoring dill pickles. Also soups and sauce. Price: Pkt. 10c; oz. 15c, postpaid.

SQUASH and PUMPKINS

DES MOINES TABLE QUEEN

Best Table Size—Very Early

752 (80 days.) Sometimes called Acorn because of its shape. One of the most deliciously flavored squashes I know. If you like squash pie, use this variety. Just the right size to cut in half to serve two. About 6 inches long, shell is thin, hard, dark green. Flesh yellow and very tender. Price: Pkt. 10c; oz. 20c; ¼ lb. 50c; 1 lb. \$1.50, postpaid.

BANANA SQUASH

A good eating—very vigorous grower

736 BLUE BANANA. (115 days.) This variety has made an unusual name for itself in the west. Here in the middle states we find it stands Squash Bugs and pests much better than other kinds of squash. Some seedsmen say it is bug proof. I wouldn't go quite that far but it is a vigorous sure grower. The color is a bluish slate gray, the flesh a bright orange and it is shaped just like a huge banana. Priced at a packet 10c; 1 ounce 18c; ¼ pound 50c and 1 pound \$1.30, postpaid.

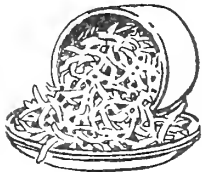

GENUINE HUBBARD

Leading Winter Squash—Good Keeper

745 (110 days.) The leading winter squash, and one of the finest varieties for about Thanksgiving time, in fact, all winter. They store well and often keep until late spring. Large, warty, dark green. Hard shelled. Deep orange-yellow flesh. Price: Pkt. 10c; oz. 20c; ¼ lb. 55c; 1 lb. \$1.65, postpaid.

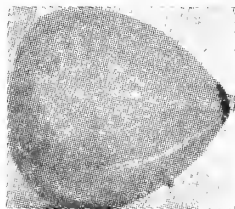

SPAGHETTI SQUASH

718 (95 days.) If you like to try new things, here is one. Fruits are oblong, about 10 inches in length, filled with a spaghetti-like pulp. Cook the whole fruit, just as it comes from the garden, for 20 or 30 minutes, cut open and season. You will have something extra fine. Price: Pkt. 15c; oz. 19c; ¼ lb. 41c; 1 lb. \$1.08, postpaid.

GOLDEN DELICIOUS

738 (110 days.) A large, heart-shaped fruit, averaging 8 to 10 lbs. Flesh 2 to 3 inches thick, very sweet, of fine texture, dry, and a rich orange-red color. A vigorous grower, very productive, soft shell, good winter keeper. Price: Pkt. 10c; oz. 20c; ¼ lb. 60c; 1 lb. \$1.65, postpaid.

SQUASH MIXTURE

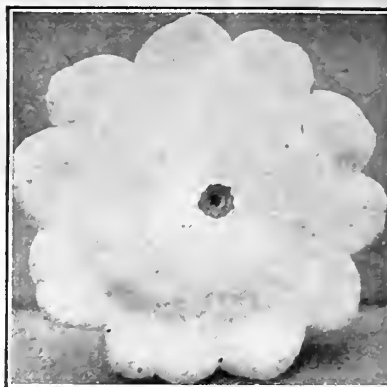

All Kinds—All Seasons

749 This mixture is made up especially for those of you who have a limited garden space and like several varieties of squash and do not care to plant a whole packet of each one. It includes all of the varieties named here, and some others. You will get your money's worth and then some. Price: Pkt. 8c; oz. 15c; ¼ lb. 40c; 1 lb. 90c, postpaid.

Large Pkt.

Early White Bush Scallop

SUMMER SQUASH

Be Sure to Plant One of These Two

746 SUMMER BUSH STRAIGHTNECK. (58 days.) An improvement over the old Crookneck variety. Golden yellow, covered with warts and bumps. Very productive and early. Price: Pkt. 8c; oz. 20c; ¼ lb. 49c; 1 lb. \$1.25, postpaid.

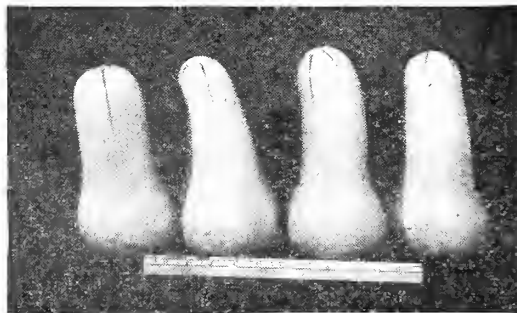

747 EARLY WHITE BUSH SCALLOP. (52 days.) A medium white summer squash. Use them while young and tender. Fruit three inches deep and eight inches in diameter. General shape, round with scalloped edges. Price: Pkt. 8c; oz. 14c; ¼ lb. 39c; 1 lb. \$1.00, postpaid.

GREEN STRIPED CUSHAW

Very Fine Grained Meat

739 (115 days.) A large crookneck pumpkin of fine quality. The neck is the edible part, is perfectly solid and of unusually high quality. Fine grained. Price: Pkt. 10c; oz. 20c; ¼ lb. 49c; 1 lb. \$1.30, postpaid.

BUTTERNUT

Finest Flavored Squash

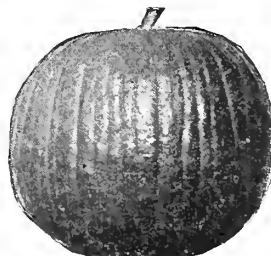

753 (85 days.)—Fruits 10-12 inches long. Bottle shaped, dark tan color, hard shell. A wonderful squash for pies, good boiled or baked. Flesh—thick, dry, fine texture, deep orange with unusual flavor. Price: Pkt. 15c; oz. 60c; ¼ lb. \$1.50, postpaid.

BUSH PUMPKIN

765—A back yard garden size bush plant 3 to 4 ft. across, heavy bearer, orange colored sugar pie pumpkin. Deep golden flesh. Packet 15c; ounce 25c; ¼ pound 45c; 1 lb. \$1.10, postpaid.

PRIZE PUMPKIN MIXTURE

770 I know most of you like to have as many different varieties as you can, but do not have room for one packet of each of all the different kinds. Well, I've made a grand mixture of all the different kinds of pumpkins we have and some extra trial ground sorts. Plant plenty of them in the edge of the cornfield. Price: Pkt. 8c; oz. 10c; ¼ lb. 25c; 1 lb. 50c, postpaid.

WINTER LUXURY PIE

One of Sweetest

767 (100 days.) Looks a whole lot like the small Sugar Pumpkin. A little larger in size. Color is orange, entirely covered by a fine grained netting. One of the sweetest varieties. Makes the finest pies. Price: Pkt. 10c; oz. 18c; ¼ lb. 39c; 1 lb. 85c, postpaid.

Squash and pumpkins like rich loose soil and plenty of room—at least 10 to 12 feet apart. Use plenty of seed. Bugs sometimes play havoc with the seedlings but you can get them with Bug Dust. (See page 9.) Large seeded squash figure about 25 hills to the ounce of seed and the small seeded ones about 50 hills to the ounce of seed. Pumpkins 50 hills to oz.

YANKEE FIELD OR COW PUMPKIN

764 (120 days.) An old favorite from the New England states. Good for pies or for the stock. Big Yields. Large, orange color. Price: Pkt. 9c; oz. 18c; ¼ lb. 30c; 1 lb. 89c, postpaid.

LARGE CHEESE OR "BUFF PIE"

763 (110 days.) A fine cream colored sweet pumpkin. Very flat in shape, slightly grooved, with hard shell. Rich yellow, thick flesh of fine flavor. Price: Pkt. 7c; oz. 15c; ¼ lb. 29c; 1 lb. 65c, postpaid.

SMALL OR RED SUGAR

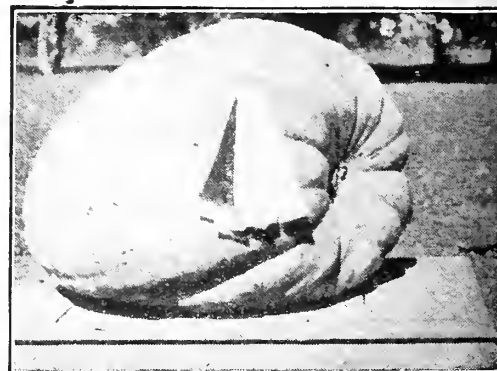

766 (118 days.) Just the thing for pies. If you don't grow any other variety plant a few of these. You will appreciate the quality, smoothness and sweetness. Orange-yellow inside and out. Very prolific yielder. Doesn't grow very large. For good eating, it's the nicest in the lot. Price: Pkt. 10c; oz. 19c; ¼ lb. 45c; 1 lb. \$1.10, postpaid.

DELICATA or SWEET POTATO

The Early Baking Squash

741 (110 days.) Sold under many names. It's a real early baking squash, very attractive. The color is green and yellow. When baked and served with melted butter, it beats them all. Price: Pkt. 7c; oz. 15c; ¼ lb. 45c; 1 lb. \$1.20, postpaid.

JUMBO—KING of the MAMMOTHS

769 (120 days.) If you want an extra big one to take to the fair, here it is. Often weighs more than 100 pounds. The flesh is a little coarse but extra fine for stock feed. Price: Pkt. 10c; oz. 20c; ¼ lb. 45c; 1 lb. \$1.15, postpaid.

PEANUTS

Yes, you can grow peanuts in this climate just as well as not. Plant just like beans, in soft loose soil, after it gets thoroughly warm in the spring. Thin to a foot apart in the row and keep well hoed.

EARLY NORTHERN

219—The early peanut for the Midwest. Small, well filled pods with lots of them on the vine. Will ripen anywhere in the corn belt as they are early and like our soil. Price: ¼ lb. 15c; ½ lb. 22c; 1 lb. 40c; 3 lbs. \$1.10, postpaid.

JUMBO PEANUTS

218—Great big kind. Plant them the same time you plant beans. Not as early as the Early Northern but you are reasonably sure of a crop here in this section. Price: ¼ lb. 15c; ½ lb. 22c; 1 lb. 40c; 3 lbs. \$1.10, postpaid.

CUCUMBERS

They like rich soil but they do fairly well most anywhere. Plant liberally because the bugs sometimes take some of the seedlings. Don't crowd cucumbers—give them plenty of room. Make the hills at least 4x6 feet and more room if you have it. Plant when the ground is warm and figure about 3 dozen hills to a packet of seed or 100 hills to the ounce. For late pickles, plant in June.

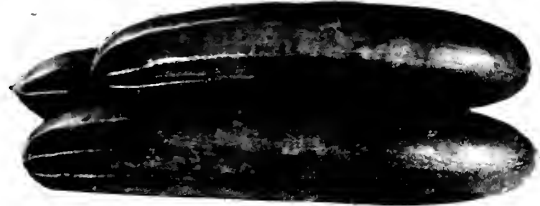

FOR CUCUMBER BUGS USE BUG DUST

NATIONAL PICKLE

Makes Uniform Pickles

352—(54 days). Makes the finest of crisp uniform pickles, any size you want them from wee ones to dill size. They set on freely and continue to bear as long as you keep them picked. The shape is ideal; they pack without waste. Price: Pkt. 10c; oz. 35c; ¼ lb. 73c; 1 lb. \$1.98, postpaid.

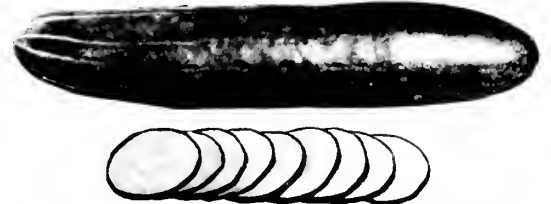

STRAIGHT EIGHT—Fine Slicer

368—(66 days). A big vigorous grower, cylindrical in shape, uniform, round, dark green over the entire surface, small seed cavity, thick flesh of fine quality and very attractive. One of the best. Price: Pkt. 12c; oz. 39c; ¼ lb. 89c; 1 lb. \$1.98, postpaid.

WEST INDIA GHERKINS

For Your Mixed Pickles

350—(60 days). A little oval shaped prickly pickle which is said to have come from the West Indies. Very prolific bearer, a stronger grower than most cucumbers, grows anywhere and is practically bug and disease proof. Price: Pkt. 10c; oz. 25c; ¼ lb. 75c, pp.

The Famous EARLY FORTUNE

Disease Resistant

353—(60 days). To my notion, one of the finest of the medium early sorts. Disease resistant, a very vigorous grower and will produce an enormous crop of dark green cucumbers. Holds its color well and has a small seed cavity. Price: Pkt. 10c; oz. 35c; ¼ lb. 98c; 1 lb. \$2.35, pp.

"GIANT IMPROVED" LONG GREEN

One of Most Popular

361—(68 days). A medium late variety which has a small seed cavity and is ideal for slicing. One of the most popular and widely used varieties. Price: Pkt. 12c; oz. 34c; ¼ lb. 90c; 1 lb. \$2.25, postpaid.

DARK GREEN SLICER

The Perfect Slicing One

364—(60 days). As the name indicates, it is a rich, deep, dark green in color, and slices remarkably well. Straight, rather blunt ended. Is early, bears well and doesn't have "nubbins." Price: Pkt. 10c; oz. 33c; ¼ lb. 98c; 1 lb. \$1.98, postpaid.

ALL AMERICA CUBIT →

The "Big-Round" Slicer

362—(60 days). All America Medal winner. Cylindrical fruit with rounded ends, white spine. 7 to 9 inches long—2 to 2½ inches in diameter. Big yielder, early bearer, very uniform, unusually fine quality. Pkt. 15c; oz. 40c; ¼ lb. \$1.00; 1 lb. \$3.00, postpaid.

WHITE WONDER ↓

The "Different" Cuke

363—(58 days). Very popular as a novelty on account of its color. Pure white in all stages of growth. Produces heavy, has a fine flavor and is well worth trying. Price: Pkt. 10c; oz. 39c; ¼ lb. 98c, pp.

HEINZ'S PICKLE ↓

The Small Pickle—Very Prolific

356—(56 days). Developed especially for those who put up their own small pickles. Cylindrical in shape. Very robust in growth and more rust resistant than other varieties. Keep picked off and it will give you worlds of small pickles. Price: Pkt. 7c; oz. 30c; ¼ lb. 75c; 1 lb. \$1.98, postpaid.

OHIO 31

354—(55 days). Best new pickle in years. Resistant to Mosaic. Very early. Strong, vigorous grower. Flesh thick. Seed cavity small. Originated by Ohio College. Seed supply limited. Price: 15c; oz. 39c; ¼ lb. \$1.05; 1 lb. \$2.40, postpaid.

CLIMBING CUCUMBERS

Grow In the Air

366—(58 days). A distinct climbing variety, used to cover trellises and fences. The cucumbers themselves are dark green, very uniform, very attractive. Plant some on the chicken yard fence. Price: Pkt. 10c; oz. 30c; ¼ lb. 75c, pp.

SWEET and HOT

PEPPERS

Peppers do well on any soil except that which is too low and too wet. Give them plenty of room for best results. I like to start them in the house or in the hot bed and from then on handle them just as you would tomatoes. One ounce will make 1,500 plants.

Long Red CAYENNE

(My Only Hot Pepper)

636—LONG RED CAYENNE. (70 days.) The leading hot one for canning, drying or pickling. Grows anywhere and bears with the best of them. Fruit 3 to 4 inches long. Price: Pkt. 10c; ½ oz. 25c; oz. 40c, postpaid.

EARLY SWEET PIMENTO

Red but Mild

639—EARLY SWEET PIMENTO. (73 days.) Flat tomato shaped pepper. Rounding flat 1½ to 3 inches across. The fruits are smooth, nearly round, and a brilliant scarlet. Is exceptionally mild and sweet. Price: Pkt. 10c; ½ oz. 35c; oz. 69c, pp.

WORLD BEATER

The "Thick-Fleshed" One

641—WORLD BEATER. (75 days.) Early heavier yielder. Sure yielder. As good, if not better, than any of them. One of our heaviest sellers. Flesh is thick, mild and sweet. Very good yielder. Stands shipping well. Price: Pkt. 10c; ½ oz. 37c; oz. 63c, pp.

KING OF THE NORTH

Earliest Large Sweet

640—The newest and earliest large pepper grown, especially valuable in the northern states. Fruits grow to enormous size, the color is brilliant red, size usually six inches long and three or four inches in diameter. Thick flesh, very firm, sweet and mild. Price: Pkt. 12c; ½ oz. 38c; oz. 65c, postpaid.

CALIFORNIA WONDER

Mild and Sweet

648—Large, thick meat and unusually solid. Fruit four lobed and very uniform. Mild and sweet. Color, bright crimson. Fruit up to 4 inches in size. Beautiful in a salad. PRICE: Pkt. 10c; ½ oz. 25c, pp.

RUBY KING

One of Most Popular

645—RUBY KING. (68 days.) A large sweet, early pepper. Very popular with home and market gardeners. Fruit often 6 inches long, three-lobed, slightly tapered. Price: Pkt. 10c; ½ oz. 35c; oz. 62c, postpaid.

This is the
Famous Hollow
Crown Parsnip

PARSNIPS

Parship seed starts slowly. I always sow radish seed with it as the radishes come up early and mark the rows so that cultivation can be started.

Sow the seeds real early. Leave them in the ground over the next winter. One ounce of seed will sow 200 feet of row.

203—**HOLLOW CROWN OR LONG SMOOTH.** The finest of all. White skin, flesh fine grained, very tender, with wonderfully sweet flavor. Price: Pkt. 10c; oz. 25c; ¼ lb. 69c; 1 lb. \$1.95, postpaid.

204—**IDEAL.** If you want a short rooted parship, order this one. Free from side roots, tender, and of fine flavor. Price: Pkt. 10c; oz. 25c; ¼ lb. 69c; 1 lb. \$1.90, postpaid.

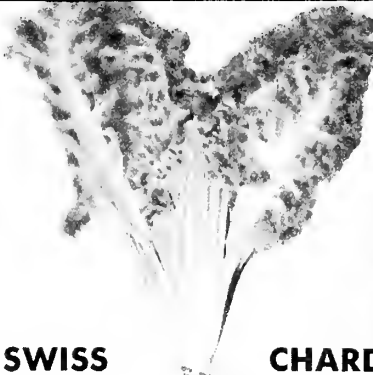

CAULIFLOWER

Easy to Plant Early

Cauliflower is similar to cabbage. It requires about the same growing conditions and the same culture. Plant early and handle just as you would cabbage. Makes mighty good eating.

558—(54 days.) **EARLY SNOWBALL.** Heads are deep, smooth, compact and snowy-white. Very early. Price: Pkt. 15c; ¼ oz. 95c; oz. \$2.95, postpaid.

SWISS

CHARD

"Spinach—Beet"

220—(60 days.) **SWISS CHARD.** Here's the finest greens in the world during the summer. Really and truly a beet (botanically) but always used as greens. Finest thing in the world, too, for poultry feed. Every year it becomes more popular. Your garden shouldn't be without it. Price: Pkt. 10; oz. 24c; ¼ lb. 70c, postpaid.

RHUBARB CHARD

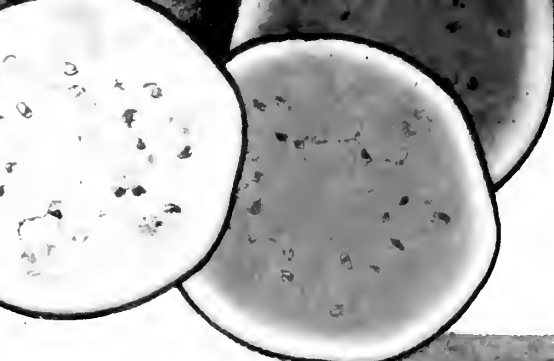

248—(60 days.) A new type of Swiss Chard with bright crimson leaf stalks, rich color extending out through veins into the dark green leaves. Heavily crumpled. Plants are very attractive—the leaves have a delicious tasty flavor. Price: Packet 15c; oz. 50c, postpaid.

KOHLRABI

The Aristocratic Cabbage
Unusual Flavor

216—**WHITE VIENNA**—(60 days.) A member of the cabbage family with an edible turnip-like bulb which grows above the ground. Some say it is a cross between turnips and cabbage. I say it is as good or better than either one. Grow as you would cabbage. Price: Pkt. 10c; ½ oz. 25c; 1 oz. 45c, postpaid.

My Famous SUGAR LUMPS

VERY EARLY

This new strain is the earliest I've found yet. Some are ripe by June 30. All varieties ripe by July 10.

"ICE BOX" SIZE

All of the varieties are individual size, about 8 or 9 inches through. Fit in an icebox without cutting. No slice left over to get tough.

SWEET AS SUGAR

Sweetest ever. That's why Mrs. Field asked me to call them "Sugar Lumps."

NOW BY COLOR

Red, white and yellow by color in separate packets. So many of you wanted them that way, here they are:

Choice, any below, 20c pkt.; Oz. 50c

724—**YELLOW SUGAR LUMP.** Golden yellow, flesh very sweet.

725—**WHITE SUGAR LUMP.** If you've never tasted a white melon, here's a treat for you.

721—**RED SUGAR LUMP.** Most folks like best because they've never tasted white or yellow.

719 MIXED SUGAR LUMPS

All above colors in a big mixture

Pkt. 15c Oz. 25c ¼ lb. 75c Postpaid

Yes, the boss himself looking over a good bunch of my Sugar Lump Melons. Believe me—I'm pretty popular when they get ripe.

The Wilt Resistant KLECKLEY SWEET

706—**KLECKLEY SWEET** No. 6—(90 days.) Originated by the Iowa State College to take the place of Pride of Muscatine. It has all the good qualities of Kleckley, plus the resistance to wilt, and similar diseases. Doesn't grow bottle-necked, stands handling and shipping well. Flesh is bright red, tender and extremely sweet. Price: Pkt. 15c; oz. 30c; ¼ lb. 65c; 1 lb. \$1.80, postpaid.

New Black KLECKLEY

Early
Disease Resistant

715—This fine new variety was developed by Iowa College. Rich dark green rind, deep red flesh, mottled seed. It's fully 10 days earlier than the old fashioned Kleckley, average size 15 to 25 pounds, oblong in shape, a prolific bearer. Quality good as the best. I believe it's best of its kind introduced in years. Good for commercial market, as well as home garden. Seed very scarce. Price: Pkt. 20c; oz. 50c; ¼ lb. \$1.50, postpaid.

FIELD'S FOURTH OF JULY

Ripe by July 4th

708—(70 days.) 20,000 of my customers swear by this melon year after year. One of the earliest melons grown. Average weight 8 to 10 lbs. Color is a deep green, marked with lighter stripes. Rind is exceptionally thin (not over ¼ in.). Flesh is dark red, tender, fine grained, unusually sweet and rich. Price: Pkt. 12c; oz. 18c; ¼ lb. 50c; 1 lb. \$1.50, postpaid.

STANDARD KLECKLEY Sweet Long Melon

704—(85 days.) Probably the best known melon in America. The measuring stick by which all other varieties are compared. Large, cylindrical in shape. Weighs around 35 pounds. Dark green, flesh bright red. Very tender and sweet. Price: Pkt. 10c oz. 25c; ¼ lb. 60c; 1 lb. \$1.35, postpaid.

DIXIE QUEEN

A Good Shipper

722—(80 days.) A recent introduction. It is a great shipper, and a fine melon for the home garden. It produces an unbelievable number of melons. The flesh is crisp and tender and has the fewest seeds of most varieties. The rind is thin, but tough.

The color is striped light and dark green. Deliciously flavored, rich color.

Price: Pkt. 10c; oz. 30c; ¼ lb. 90c; 1 lb. \$1.95, postpaid.

Early EARLIANA

Very Vigorous

411—(66 days.) One of the best of the early red tomatoes. Vigorous, spreading vine, bearing bright scarlet, medium size, nearly globe shape fruit, in clusters. Price: Pkt. 10c; ½ oz. 29c; oz. 54c; ¼ lb. \$1.45, postpaid.

ORANGE and SCARLET SLICER

You all know my **Scarlet Slicer** Tomato—the one that took the Midwest by storm when I introduced it two or three years ago. Well, I have another one now—the new **Orange Slicer** Tomato which is identical to the **Scarlet Slicer** except for the color of the fruit, which is a golden orange.

These two tomatoes should be in every garden. They will succeed most anywhere. They have heavy foliage which protects fruits from the sun and hot winds, their deep roots protect them against dry weather and they are sure yielders too, but best of all—just as the name implies—they are big, smooth, round, juicy and meaty to the core. Perfect for table or canning. They are also disease resistant.

410—**SCARLET SLICER**—Pkt. 15c; ½ oz. 25c; 1 oz., 45c, postpaid.

413—**ORANGE SLICER**—Pkt. 15c; ½ oz. 50c; 1 oz. 90c, postpaid.

MARGLOBE

The Perfect Canner

405—(115 days.) Another dependable, wilt-resistant main crop. Vigorous grower, medium large, nearly globe shaped, smooth and solid. The quality is extra fine, and it is an outstanding tomato for canning. Deep scarlet. Price: Pkt. 10c; ½ oz. 27c; oz. 45c; ¼ lb. \$1.15, postpaid.

RUTGERS—A Favorite Everywhere

417—(110 days.) I found this one in New Jersey. After trying it out here for a couple of years, I am ready to believe that it deserves a place in every garden. It starts ripening on the inside, and you can depend on it being thoroughly ripe all the way through. Doesn't have a hard core, and is outstanding for its uniform deep red coloring. Flesh is firm. Globe shaped. An excellent canning variety. Price: Pkt. 11c; ½ oz. 28c; oz. 58c; ¼ lb. \$1.25, postpaid.

Field's Famous EARLY RED HEAD Heavy Yielding—Doesn't Crack

401—(76 days.) I introduced **Red Head** a good many years ago. Since then we have been constantly working on it to make it better. I will put it up against any other variety. It is a heavy yielding sort, bears over a long time. The tomatoes are round and smooth, they ripen evenly, and very seldom crack. The firm flesh makes it a fine canning sort. Price: Pkt. 15c; ½ oz. 35c; oz. 60c; ¼ lb. \$1.50, postpaid.

Headquarters for WATERMELONS

"These Melons Have My Personal Guarantee
of Satisfaction"

I want everybody to have a big watermelon patch. Nothing will make the boys happier than a good melon patch of their own. My melon seed comes from fields grown especially for seed crops. Melons like warm, loose soil. Give them plenty of room, at least 10 ft. each way. Figure about 50 hills from an ounce of seed, or 3 lbs. to the acre.

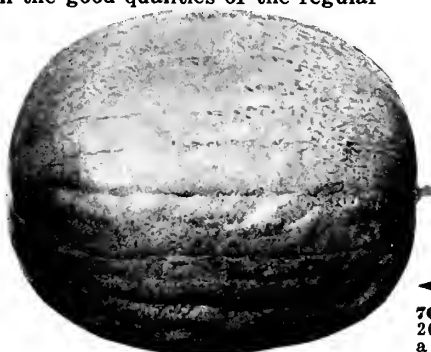

WILT RESISTANT STONE MOUNTAIN ↑

723—STONE MOUNTAIN No. 5—(85 days.) A new wilt resistant strain of the Georgia Stone Mountain. It has all the good qualities of the regular strain and in addition, will grow on wilt infested soil. Price: Pkt. 10c; oz. 25c; ¼ lb. 48c; 1 lb. \$1.25, postpaid.

STONE MOUNTAIN

Standard Large Round

714—(85 days.) A great big melon, almost round. Weighs 50 lbs. in a good year. The rind is hard and tough, dark green, stands handling well. Very sweet in flavor, a bright sparkling color. Price: Pkt. 8c; oz. 18c; ¼ lb. 40c; 1 lb. \$1.00, postpaid.

KANSAS SWEET

The Perfect Market
Melon

716—(85 days.) A new, big round melon that looks like the old Kolb Gem. Has thin rind, light green with broad dark green irregular stripes. The flesh is solid red, and the seeds are buff color.

Price: Pkt. 10c; oz. 25c; ¼ lb. 50c; 1 lb. \$1.25, postpaid.

STATE FAIR →

Biggest of All Melons

701—(90 days.) This is the big Jumbo kind. I used to take them around to the State Fairs and challenge anyone to raise bigger ones. They mature nicely here in this section. Melons often weigh 100 pounds or more.

Price: Pkt. 10c; oz. 25c, ppd.

BLACK DIAMOND

717—The big round, dark green one you find in all the markets. May be a little late for northern states, but it's a dandy from here on south.

Pkt. 10c; oz. 20c; ¼ lb. 90c; 1 lb. \$2.50, postpaid.

Mixed WATERMELONS

710—This is a LARGE specially fine PKT. mixture for a boy though I sell thousands to folks who have not been boys for a long time. It's a thorough mixture of 25 kinds so you have all sorts at all times. Find room for at least a quarter pound. Big packet (over 1 oz.) 9c; ¼ lb. 35c, postpaid.

9c

Black Seeded

← Klondike

"It Keeps Best of All"
705—(90 days.) I recommend it highly. It carries the highest sugar content of any melon that I know of. Oblong, medium size, dark green rind, and small black seeds. The flesh is a beautiful sparkling, deep red, very crisp and tender, without a trace of strings. Price: Pkt. 9c; oz. 18c; ¼ lb. 38c; 1 lb. \$1.10, postpaid.

GOLDEN HONEY

702—(90 days.) Large, oblong shape, weighing around 20 lbs. Rind dark green, with irregular stripes. Flesh a tender, crisp, delightfully flavored bright yellow. Price: Pkt. 10c; oz. 20c; ¼ lb. 40c; 1 lb. \$1.25, postpaid.

TOMATOES

and How to Grow Them

I've tried out a lot of different varieties of tomatoes and I've discarded all but the best of them. These varieties are the pick of the lot, over a period of the last 40 or 50 years. My seed stocks are extra select, pure, uniform, and they have to be right. Plant both early and main crop sorts, so you will have plenty.

Famous SUPER SIOUX

416—A hybrid or cross between two of our leading varieties, having the good qualities of both plus the unusually fine hybrid quality. Almost globe shaped, medium size, medium early. Fruit solid deep red, thick walled, and small seeded. Without question one of the finest of all tomatoes both for home and commercial use.

15c per packet, 50c per ½ oz., or 85c per oz.

NEW STONE

Standard Main Crop

415—(116 days.) A great main crop variety for canning and general use. Solid, smooth, ripens evenly. Bright scarlet, a good yielder.

Price: Pkt. 7c; ½ oz. 22c; oz. 40c; ¼ lb. 80c, postpaid.

OXHEART

409—(90 days.) Entirely different from any other kind of tomato. Large heart-shaped, pink-skinned variety. The flesh is thick but very tender. It has few seeds. Somewhat late and a great deal after the style of Ponderosa. Has a distinct, appealing, mild flavor. Price: Pkt. 12c; ½ oz. 45c; oz. 80c; ¼ lb. \$2.00, postpaid.

PONDEROSA

Largest of All Tomatoes

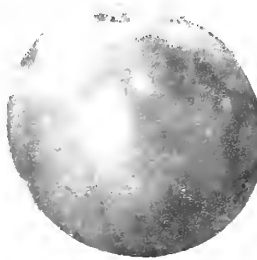

418—(86 days.) Here's one you can't beat. It is too tender and doesn't hold up well for market but for home use there's nothing like it. The fruit is large, sometimes inclined to roughness, but very tender and meaty. Slices beautifully with few seeds. Vigorous grower. Price: Pkt. 12c; ½ oz. 49c; oz. 89c, postpaid.

The New Grape Tomato

425—(73 days.) Not a novelty—but a perfect-tasting, heavy bearing, vigorous tomato. Never saw a rotten one or a vine that wasn't loaded full. Unusual in size as the individual tomatoes are small, a little larger than California grapes and as tasty, but are borne in big grape-like clusters. Absolutely hardy and will bear even if all other tomatoes fall. Especially good for canning, preserves and sauce, but there's nothing better for eating. Seed scarce.

Price: Pkt. 15c, postpaid.

SNOWBALL TOMATO

403—(78 days.) Snowball is an ivory white tomato with flesh almost white. Most as big as Ponderosa. Has few seeds and practically no acid. Lots of folks who were unable to eat tomatoes before can enjoy them now.

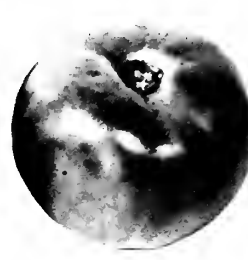

Price: Pkt. 15c, ppd.

PRITCHARD

Resistant to Disease

423—(112 days.) A new wilt-resistant variety. The fruits are very solid and heavy, smooth globe-shaped, a rich deep scarlet color and mild flavor, and fine for tomato juice. Best main crop tomato, can be planted closer together than most sorts. Price: Pkt. 10c; ½ oz. 25c; oz. 39c; ¼ lb. 98c, postpaid.

FIELD'S RED BIRD

421—(70 days.) Next to Red Head, I claim this is the finest early tomato I have ever found. It is an ever one of my own introductions. Grows to a medium size, round, very smooth and seldom cracks. The color is a beautiful bright red.

Price: Pkt. 10c; ½ oz. 22c; oz. 35c; ¼ lb. \$1.00, postpaid.

PEAR TOMATO For Your Preserves

The old-fashioned pear-shaped preserving tomato. Fruit is borne in clusters.

419—(75 days.) YELLOW PEAR.

406—(90 days.) RED PEAR. Price: Pkt. 15c; ½ oz. 30c; oz. 50c; ¼ lb. \$1.25, postpaid.

GOLDEN BEAUTY

412—(82 days.) Large main crop yellow variety. Quite a novelty but well worth having. I like it. It's smooth medium size, mid-season to late. Fine for preserves or for table use. I wish everyone would try some of these and the Snowball, too, this year. Price: Pkt., 10c; ½ oz. 25c; 1 oz., 40c, postpaid.

or Health Grow Plenty of CARROTS

Carrots will grow most anywhere and are one of the most healthy foods I know of. Sow some real early in the spring for mid-summer use, and later on some more to put down in the basement or cave for winter. Cover the seed ½ inch deep in rows 18 to 24 inches apart, thinning them out to 2 to 4 inches apart in the rows. One ounce of seed will sow 100-foot row.

CHANTENAY

Standard Storing Carrot

626—Recognized as the standard carrot. This is highly recommended for putting into winter storage. Good color, crisp and tender, with fine flavor, and exceptionally smooth. Price: Pkt. 10c; oz. 38c; ¼ lb. \$1.14, postpaid.

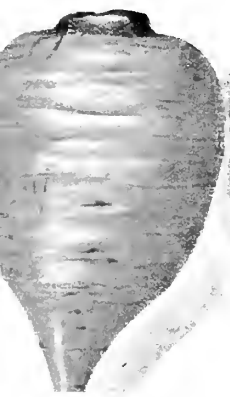

DANVERS HALF LONG

Preferred for Home or Market

627—(75 days). A half long sort which is a very heavy yielder, popular with both the home and market gardener. Grows to good size with bright orange flesh; crisp. Price: Pkt. 10c; oz. 35c; ¼ lb. \$1.00, postpaid.

TENDERSWEET

Long and Crisp

632—(75 days). Sometimes called Imperator. Beautiful carrot, rich orange-red both inside and out. Long and smooth with slightly sloping shoulders, free from side roots and almost cylindrical in shape. Small tops, an excellent table quality and very attractive. Ideal for bunching. Price: Pkt. 12c; oz. 45c; ¼ lb. \$1.45, postpaid.

STOCK CARROTS

Large White Mastodon

631—(82 days). The largest and finest of the feeding carrots. Roots very large and thick; make an ideal feed for poultry or livestock. Use about 4 lbs. of seed to the acre, making rows 3 feet apart. Price: Oz. 25c; ¼ lb. 65c; 1 lb. \$1.80, postpaid.

"Sweetest of All"
Red Cored
Chantenay

633—Tender, crisp, sweet and orange-scarlet all the way through. Blunt ended and easy to pull. Smooth and free from side roots. Best of all. Pkt. 15c; oz. 50c; ¼ lb. \$1.25, postpaid.

New Coreless Chantenay

630—(88 days). The core is very indistinct, hence the name. Tender, crisp and sweet. Smooth and free from side roots, and a bright, orange-scarlet color. Blunt ended, very uniform. Price: Pkt. 10c; oz. 40c; ¼ lb. \$1.15, postpaid.

LITTLE MARVEL

Tender, Heavy Yielder

152—(62 days). It will be a long time 'til we find a better one than this. For quality, yield, earliness, or any other point, it's hard to beat. A vigorous grower and a heavy yielder. Three quarts of pods will often shell out a quart of peas. Tender and sweet, and of finest quality. Price: Triple size pkt. (3 oz.) 12c; ½ lb. 25c; 1 lb. 44c; 3 lbs. \$1.10, postpaid.

WRINKLED EARLY ALASKA

Tender Tiny Peas

159—(WRINKLED)

ALASKA—(55 days). The

new wilt resistant Pea. The easiest way to describe this one is to say it is the big Wrinkled Alaska. It comes into bearing in 55 days; the vine grows just about like the Alaska. The pods are about 2½ to 3 inches long and are fully as hardy as Alaska. Cannerymen are planting lots of it. They like it. Price: Triple size pkt. (3 oz.) 15c; ½ lb. 24c; 1 lb. 40c; 3 lbs. \$1.15, postpaid.

PREMIUM GEM

The Extra Early One

154—Probably the most popular of the early garden peas. Vines are dwarf, about 15 in. in height. Blunt ended pods 2¾ in. long with 6 to 7 peas to the pod. Very productive, fine flavor, considered by many to be the sweetest of all early peas.

PRICE: Triple size pkt. (3 oz.) 12c; ½ lb. 25c; 1 lb. 42c; 3 lbs. 98c, postpaid.

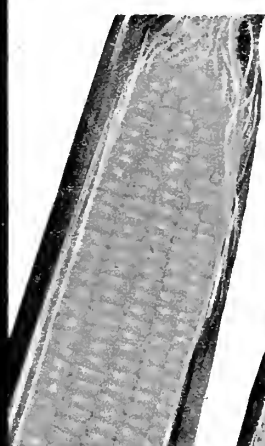

LARGE PODDED MARVEL

The Little Giant Marvel

153—(65 days). In many ways like Little Marvel, but the pods are much larger. Quality is sweet, tender and juicy. Is a dwarf, vigorous vine. Pods are well filled and there are plenty of large peas. Ready about the same time as Little Marvel. Price: Pkt. (3 oz.) 15c; ½ lb. 30c; 1 lb. 50c; 3 lbs. \$1.25, postpaid.

NOW! HYBRID SWEET CORN

GOLDEN CROSS BANTAM HYBRID

171—(85 days). A great big Golden Bantam. It has 12 to 14 rows of kernels, quality exceptionally fine, noted for its uniformity. Strong, vigorous grower, resistant to smut, ears are 8 inches long. About a week or 8 days later than the regular Golden Bantam. Triple size pkt. (3 oz.) 15c; ½ lb. 35c; 1 lb. 55c; 3 lbs. \$1.37, postpaid.

GIANT BANTAM HYBRID

175—(75 days). This variety was developed especially for the canning trade. About 4 days earlier than the Golden Bantam open pollinated. Runs almost 100% 10 to 12 rows to the ear, ears 7 inches long, very uniform, resistant to smut and to root diseases. Price: Triple size pkt. (3 oz.) 15c; ½ lb. 34c; 1 lb. 55c; 3 lbs. \$1.35, ppd.

IOANA SWEET CORN

176—(87 days). Last year's all American bronze medal winner, developed by our own state college. Highly resistant to drought and wilt. Just the thing for the market gardener or for canning. Fine yellow variety, ears 8 inches long, 12 to 14 rows, medium narrow kernels. Price: Triple size pkt. (3 oz.) 15c; ½ lb. 34c; 1 lb. 49c; 3 lbs. \$1.25, ppd.

EARLY GIANT Golden Bantam

178—(65 days). Earliest variety in our trials. Ten days earlier than the ordinary Golden Bantam. Stalks are 4 to 5 feet tall, are heavy, vigorous growers, stand up well, ears are 6 to 7 inches long, rich yellow in color, 2 ears to the stalk. Kernels are long and plump, 12 row variety. Price: Triple size pkt. (3 oz.) 15c; ½ lb. 34c; 1 lb. 54c; 3 lbs. \$1.35, postpaid.

Hybrid Stowell's Evergreen

184—(97 days). A deepkerneled hybrid. Probably the heaviest yielder of sweet corn there is. Stalks 7½ to 9 feet tall, ears 14 to 18 rows, about 8 inches long. It outyields the ordinary Stowell's Evergreen and is much better in quality, unexcelled for canning. Price: Triple size pkt. (3 oz.) 15c; ½ lb. 35c; 1 lb. 63c; 3 lbs. \$1.65, postpaid.

"All Hybrid" SWEET CORN

I want all of you to try what I think are my 3 BEST Hybrid Sweet Corns. So, I'm going to make you an offer you can't resist. Here are the three:

EARLY GIANT GOLDEN BANTAM, the earliest.
GOLDEN CROSS BANTAM, standard main crop.
GIANT BANTAM HYBRID, 2nd early and extra good.

SPECIAL OFFER 165X—½ lb. of all 3 only 90c, postpaid.

SPECIAL OFFER 170X—1 lb. of all 3 only \$1.40, postpaid.

Henry Field's Hybrid GOLDEN EVERGREEN

182—(90 days). The biggest and best of all the Golden Hybrid Sweet Corn. Ears 8 in. long, 12 to 16 rowed, big, deep kernels, excellent flavor and quality. Stalks are 7½ to 8 ft. tall, plenty of dark green leaves, strong root system. For 2 years it has led in yields in our trial grounds. Price: Pkt. (3 oz.) 20c; ½ lb. 35c; 1 lb. 60c; 3 lbs. \$1.40, postpaid.

HYBRID SWEET CORN MIX

Gives You Sweet Corn All Season

3 OZ. ONLY 15c

A special blend of all my SPECIAL HYBRID Sweet Corns, so you'll have corn ripening SOME EACH WEEK ALL SEASON. No need to make 4 or 5 plantings.

You'll have corn from the earliest (about 60 days) to the latest (about 115 days). I used Hybrid Sweet Corn as it's the coming thing—sweeter, more tender, deeperkerneled, disease resistant.

The Low Price for Hybrid

173—Large 3 oz. pkt. of this mix 15c; ½ lb. 29c; 1 lb. 48c; 3 lbs. \$1.20, postpaid.

PEAS

Plant the smooth varieties just as soon as you can get into the ground. Wrinkled varieties a little later. For a fall crop, use early sorts, planting them about the middle of August. One lb. of seed to a 50-foot row.

Improved

FILLBASKET

Yields Over Long Period

147—(57 days.) An old favorite that is still going strong. A large podded variety for early planting, slightly later than Alaska. Exceptionally fine flavored. A heavy yielder. Price: Triple size pkt. (3 oz.) 12c; ½ lb. 25c; 1 lb. 40c; 3 lbs. 97c, postpaid.

ALDERMAN

167—The Big, Prolific, Late Pea—(75 days.) A vigorous and prolific English variety which we class as late. Pods are large and the vines require support. Price: Triple size pkt. (3 oz.) 10c; ½ lb. 23c; 1 lb. 38c, postpaid.

EXTRA EARLY ALASKA

Earliest Pea Known

46—(56 days.) Always my biggest seller. An improved, wilt resistant strain of an old favorite. Very hardy and a heavy yielder. Sure to crop, easy to grow. Medium size, well filled pods. Price: Triple size pkt. (3 oz.) 10c; ½ lb. 23c; 1 lb. 37c; 3 lbs. 95c, postpaid.

EARLY GIANT PEA

The Biggest and Best

166—Ready for picking in 65 days. Vigorous growing dark green vines that grow 20 to 24 inches but do not need staking (They'll do better if staked). Pods are large medium green in color, filled with from 7 to 9 great big sweet peas. Price: 3 oz. pkt. 15c; ½ lb. 35c; 1 lb. 46c; 3 lbs. for \$1.10, postpaid.

EDIBLE PODDED PEAS

160—DWARF GRAY SUGAR—Here is the pea that you can eat just like green beans—pods and all. Not only does this eliminate the shelling, but you'll find you get more of the food value of the peas this way. And best of all, these Dwarf Gray Sugars are sweet and delicious. Price: Triple size pkt. (3 oz.) 12c; ½ lb. 25c; 1 lb. 40c, postpaid.

American Wonder

The Drought Resister

149—(60 days.) Always comes into bearing ahead of the other wrinkled ones. Very dwarf, medium size pods of good quality, unusually productive. Price: Triple size pkt. (3 oz.) 12c; ½ lb. 25c; 1 lb. 40c; 3 lbs. 98c, postpaid.

BLACK EYE PEA

168—Genuine old fashioned southern kind. It is really more of a bean than a pea. Use them green in the summertime and dried pea for winter. Grows as easily as any other garden pea here in the corn belt. Triple size pkt. (3 oz.) 10c; ½ lb. 24c; 1 lb. 38c; 3 lbs. for \$1. ppd.

ONION SEED

Sow onion seed early—just as soon as you can get it in the ground. One ounce to 100 feet of row. When tops fall over pull up and store in a shed until cool weather.

White Sweet Spanish

Sweet Early Table Onion
313—(110 days.) WHITE SWEET SPANISH. Large, mild and sweet. Pure white. Better keeper than Bermuda. Does better in north. Favorite for growers who want an especially fine onion for table use and want it early. Price: Pkt. 11c; oz. 75c; ¼ lb. \$2.15, pp.

LARGE RED GLOBE

The Round Red

305—(120 days.) LARGE RED GLOBE. Probably the most popular of all onions. Deep, rich red, good keeper, fine for either fall or winter market. Price: Pkt. 10c; oz. 64c; ¼ lb. \$1.82, postpaid.

Yellow Globe Danvers

Late Market Variety

314—(112 days.) Very popular and grown extensively for market. The bulbs are rather flat but of globe shape, good size, and a bright straw color. Very firm and solid. Good keeper. Price: Pkt. 10c; oz. 53c; ¼ lb. \$1.59; 1 lb. \$4.65, postpaid.

RIVERSIDE SWEET SPANISH

Table Variety—the Giant Yellow
303—(110 days.) A mammoth yellow globe. Favorite with my customers. Very heavy producer and early. Light straw colored skin with pure white flesh. Good color and a good keeper. Price: Pkt. 11c; oz. 75c; ¼ lb. \$2.20, postpaid.

SILVERSKIN

The Best Flat Keeper

311—(100 days.) SILVER SKIN or WHITE PORTUGAL. A medium sized globe, somewhat flattened. A good keeper, very attractive. Price: Pkt. 10c; oz. 69c; ¼ lb. \$1.97, postpaid.

ONION SETS

The Famous HAZELNUT SIZE ONION SETS

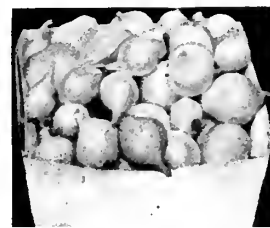

These hazelnut size, small sets go farther than the large ones and will give you just as big onions at lower cost per A. They cost us more but we will sell at the same price as unscreened sets.

YELLOW EBENEZER SETS

317—Beautiful solid sets. Price: Qt. 35c; 2 qts. 65c; 4 qts. \$1.19; pk. \$2.19, postpaid.

Onion Sets are scarce. Crop was short. We have no Red or White sets. (Yellow ones are much the better anyway.) Write for prices on larger lots.

Henry Field Talks About

SWEET CORN

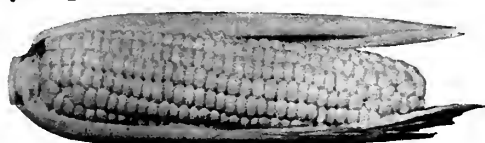

We used to think that Sweet Corn couldn't be planted until after all frost danger was past, but with some of the new vigorous hybrids, it's a different story. You can plant them most as quickly as you can get in the ground in the spring. Of course, no corn is really frost proof, but the new hybrids are more or less cold resistant, and can stand real early planting.

A half-pound of seed is enough for about 100 hills. You can generally figure 10 to 12 pounds of seed per acre. Plant at intervals of 10 days until the middle of July for new corn all summer.

You all know what an improvement hybrid field corn is over the open pollinated type. Well, hybrid Sweet Corn is just as much of an improvement in its class. That's why I am talking about hybrid Sweet Corn first—plant Hybrids and plant plenty of them.

Probably the most popular of all of our hybrid corn is our Special Hybrid Sweet Corn Mixture or Blend. This blend is made up of all the fine varieties listed in the catalog. Taking it all in all this blend will give you roasting ears from 4th of July on until almost frost. So if you don't have room in your garden for a few rows of each variety plant some of this special mixture. You can have them all in one row. I don't know of a better or earlier type of Sweet Corn than the Early Giant Bantam Hybrid. Giant Bantam Hybrid is a mid-season crop and comes in a little later, and Golden Cross Bantam is a main crop sort.

Of course, we have the old standbys—Golden Bantam, Country Gentleman, Stowell's Evergreen—they are all good and still deserving of a place in your garden.

GOLDEN BANTAM

Favorite Yellow

177—(80 days.) Recognized as the standard yellow sweet corn. Grows 4½ to 5 feet tall, very productive, early, tender, sweet, delicious flavor. Price: Triple size pkt. (3 oz.) 10c; ½ lb. 25c; 1 lb. 45c; 3 lbs. \$1.12, postpaid.

EARLY SUNSHINE

Earlier Than Golden Bantam

174—EARLY SUNSHINE—(76 days.) A full week earlier than Golden Bantam with a larger ear carrying 10 to 12 rows of creamy, yellow kernels. Surprisingly large for such an early sort. Price: Triple size pkt. (3 oz.) 12c; ½ lb. 25c; 1 lb. 45c; 3 lbs. \$1.12, postpaid.

COUNTRY GENTLEMAN

The Tender White

189—(93 days.) Sometimes called Shoe-Peg or Zig-Zag because of irregular formation of kernels. Long slender grains with ears just the right size for eating on the cob. Very tender and sweet. Heavy producer. Fine for canning.

Price: Triple size pkt. (3 oz.) 12c; ½ lb. 25c; 1 lb. 45c; 3 lbs. \$1.10, postpaid.

STOWELL'S EVERGREEN

The Giant White Corn

188—(96 days.) Plant this one for canning and drying as well as for roasting ear season. I always maintained it had more corn to the cob than any other variety. Stays in milk stage a long time. Triple size pkt. (3 oz.) 12c; ½ lb. 25c; 1 lb. 45c; 3 lbs. \$1.10, postpaid.

TRUCKER'S FAVORITE

187—TRUCKER'S FAVORITE—(85 days.) Southern Sweet Corn. This really isn't sweet corn but down south this one will grow in spite of ear worms, drought, heat or most anything else. Ears are large—7 to 9 inches long, carrying 12 to 16 rows of kernels, stalk is very vigorous, usually 8 feet tall. Price: Triple size pkt. (3 oz.) 10c; ½ lb. 20c; 1 lb. 30c; 3 lbs. 75c, postpaid.

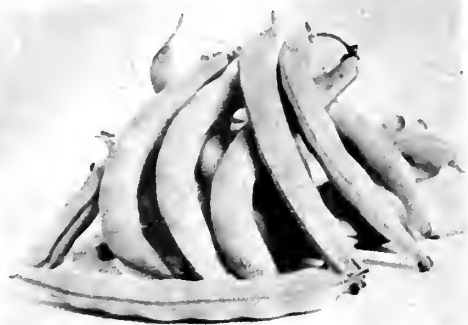

GREEN BEANS

STREAMLINER BEAN

Improved Field's First Early

110—(48 days.) A white seeded variety that can be used for pod beans or for winter. It is a vigorous upright, early grower, pods 7 inches or more in length, straight, oval, very meaty and fleshy and absolutely stringless. One of the most productive beans we have ever had and much better than the old fashioned brown seeded ones. Will grow anywhere.

Price: 3 oz. packet 15c; ½ lb. 29c; 1 lb. 50c; 3 lbs. \$1.25, postpaid.

STRINGLESS GREEN POD

The Standard of All

107—(51 days.) The ideal family bean and the "measuring stick" to which all varieties are compared. Very early, meaty and tender. No strings whatever. If I could have only one kind, it would be this one. Price: Triple size pkt. (3 oz.) 12c; ½ lb. 30c; 1 lb. 50c; 3 lbs. \$1.25, postpaid.

BOUNTIFUL

THE FAMOUS CANNING BEAN

144—(50 days.) You folks here in the corn belt ought to grow more of this one. Very heavy yielder. I've never had a failure. Big, green, showy pods. Excellent quality. Canners like it. Fine for market. Bountiful is the right name.

Price: Triple size pkt. (3 oz.) 12c; ½ lb. 27c; 1 lb. 48c; 3 lbs. \$1.20, ppd.

TENDER GREEN

The New Straight Early Bean

106—(54 days.) Here is a new one. Extremely early. Strong, vigorous plants with long dark green pods practically straight and without a sign of a string. I am almost ready to say it is the finest of all green pod beans today. Price: Triple size pkt. (3 oz.) 12c; ½ lb. 30c; 1 lb. 50c; 3 lbs. \$1.25, postpaid.

ABOUT BEANS

I believe every family should plant at least five or six pounds of beans. (See my special 3 pound prices.) I always have a good supply of seed beans handy. Whenever any of the early or midseason things run out, I fill in the spaces with beans. A pound will plant two rows of 50 feet long. Start your plantings as soon as severe frosts are over and plant every two weeks until the middle of July.

KENTUCKY WONDER POLE BEAN

The Heavy Yielder — Good Canner

134—(65 days.) Many claim that this is the finest of all pole beans and I think that it lives up to every claim made for it. Brown seeded. Pods long, wrinkled, crease backed, very brittle and meaty.

Price: Triple size pkt. (3 oz.) 15c; ½ lb. 30c; 1 lb. 50c; 3 lbs. \$1.25, postpaid.

Beans are the most staple item in any garden. Plant all three types and make successive sowings.—H. F.

YELLOW BUSH BEANS

Seems like, when most folks think of beans they think of green beans and forget what is to my notion the best of all—the yellow bush beans.

The yellow bush beans deserve it, but just haven't been tried by as many folks as they should have been. By all means, don't pass them up this year. They yield equally as much as the green ones, are as tender and just as stringless, but almost without exception have a better, more pleasing flavor. This year, try several of the varieties below. You'll like them.

Rust-Proof GOLDEN WAX

Rust and Rot Proof

116—(50 days.) Everybody likes this one. It is early and has a heavy flat pod. The vines grow erect, holding them well off the ground. Keeps them from rot and rust. It never has strings. We are very partial to it.

Price: Triple size pkt. (3 oz.) 15c; ½ lb. 30c; 1 lb. 50c; 3 lbs. \$1.25, postpaid.

GOLDEN "NO WILT"

Heavy Yielding—Disease Resistant

123—(49 days.) The bean that resists disease. I've been selling seed for 50 years and this is the finest wax podded bean I have ever offered. It's an improved type of the Rust-Proof Golden Wax. Will grow where other varieties fail. The pods are somewhat flat, absolutely stringless, an inch or more longer than Golden Wax. Very heavy yielder. By all means include this in your planting this year. Price: Triple size pkt. (3 oz.) 15c; ½ lb. 30c; 1 lb. 50c; 3 lbs. \$1.25, postpaid.

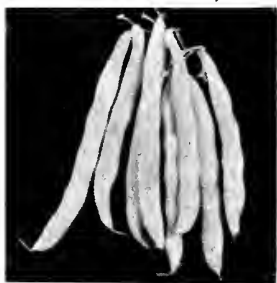

PENCIL POD BLACK WAX

The Early Tender Bean

105—(51 days.) I consider this one of the best of all early wax varieties. The pods are round, slender, pointed, absolutely stringless, a light yellow. Very tender. Very productive.

Price: Triple size pkt. (3 oz.) 15c; ½ lb. 35c; 1 lb. 55c; 3 lbs. \$1.40, postpaid.

SURE CROP STRINGLESS

Heavy Yielding Canner

120—(51 days.) Most beautiful of all wax beans. They taste as good as they look. A favorite canner. Disease and drought resistant. Never fails to bear a fine crop. Price: Triple size pkt. (3 oz.) 12c; ½ lb. 30c; 1 lb. 49c; 3 lbs. \$1.28, postpaid.

Henderson's BABY LIMA

BABY LIMA

Henderson's Bush Baby Lima

127—(67 days.) Most dependable and best yielder of the Limas. Small white bean. Great for shell bean, for canning and for winter drying. Stands dry weather and a great yielder. I have seen vines with about as many pods as leaves. Price: Triple size pkt. (3 oz.) 12c; ½ lb. 25c; 1 lb. 45c; 3 lbs. \$1.12, postpaid.

GREEN SEEDED BABY LIMA

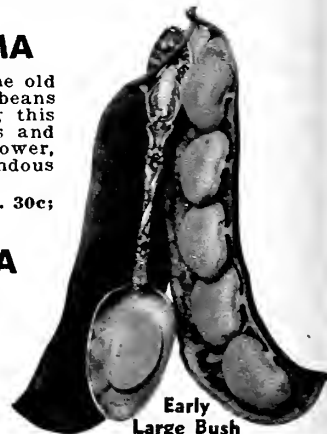

114—(67 days.) An improvement over the old fashioned Henderson's Baby Lima. The beans have a bright green appearance during this shelling stage. Fine for canning beans and good for dry beans too. An excellent grower, stands hot dry weather, and a tremendous yielder.

Price: Triple size pkt. (3 oz.) 15c; ½ lb. 30c; 1 lb. 55c; 3 lbs. \$1.37, postpaid.

EARLY LARGE BUSH LIMA

Fordhook 242

126—(75 days.) The best and earliest of the big seeded Limas. Strong, upright bushes. Holds pods high and clean. (It's no fun to shell dirty beans.) 4 to 5 large, meaty, nut-like beans to the pod. Price: Triple size pkt. (3 oz.) 15c; ½ lb. 30c; 1 lb. 55c; 3 lbs. \$1.37, pp.

Early Large Bush

SOUP BEANS THE OLD STANDBYS FOR WINTER USE

WHITE WONDER

The Small Soup Bean

102—(85 days.) Standard soup or navy bean. Heavy yielder. Long uniform bean. The pods are carried well off the ground above the moisture. Price: Triple size, pkt. (3 oz.) 10c; ½ lb. 22c; 1 lb. 55c; 3 lbs. 80c, postpaid.

GREAT NORTHERN

The Large Flat Soup Bean

104—(90 days.) (Montana White.) A little larger than the Navy Bean but eats every bit as well and is lots easier to pick over. A good yielder and early. Price: Triple size pkt. (3 oz.) 10c; ½ lb. 22c; 1 lb. 35c; 3 lbs. 80c, postpaid.

RED KIDNEY

128—(70 days.) As easy to grow as the others. Good yielder of large, dark red, dry beans. Just the thing for baking or for soup. Price: Triple size pkt. (3 oz.) 10c; ½ lb. 25c; 1 lb. 45c; 3 lbs. \$1.12, postpaid.

POLE BEANS

OR CLIMBING BEANS

One fine thing about pole beans is, they can be grown along the garden fence, and this makes them especially valuable for folks living in town who haven't much garden space to work with. For those who have corn fields, you don't have to worry about furnishing support for beans. Just plant a few climbing beans along the edge of the corn field. The corn stalks will support the beans. You will have all you can take care of, and then some. This should be of special interest to you women folks who tend the garden. Plant the pole beans in the corn field and let the corn cultivator do the tending for you. The main thing is to plant plenty of them.

Plant **FILLBASKET** pole beans by all means. This one came from Missouri originally. My neighbor, Alf Eudy, has been growing them for more than 25 years. I had quite a time getting enough seed stock together to make a real planting, but I have plenty of stock for you now. I am proud of it and I want you to plant **FILLBASKET** by all means.

It isn't necessary for me to say anything about the **IMPROVED MISSOURI WONDER** or **KENTUCKY WONDER**. I guess you know all about them. They are both mighty fine sorts.

FILLBASKET POLE BEAN

If You Want the Biggest Yield—Plant This One

121—(66 days.) Really fills your basket in a hurry. Yields enormous, strong grower, vigorous climber. Can plant with corn or sunflowers too. Pods very dark green, brittle, long and slender. Very meaty and **CROWDED**. Makes finest shelled beans in the world.

Got this in Missouri from neighbor, Alf Eudy, who has grown it 25 years. Supply limited. Order early. Price:

Triple size pkt. (3 oz.) 15c;
½ lb. 25c; 1 lb. 48c; 3 lbs. \$1.20, postpaid.

KENTUCKY WONDER WAX

The Yellow Pole Bean

139—(67 days.) Most popular of all wax pole beans. A beautiful light golden yellow pod. Every bit as good, if not better, than the regular Green Kentucky Wonder. Vigorous grower—will cover a fence or trellis in a hurry. Pods are large, oval shaped. Beans until frost. Seed chocolate brown; more gardeners should plant Golden Kentucky Wonder. None better for canning—good for green shell beans too.

Price: Triple size pkt. (3 oz.) 12c; ½ lb. 27c; 1 lb. 48c; 3 lbs. \$1.20, postpaid.

CORNHILL BEAN

Climbs Corn—or Vines Alone

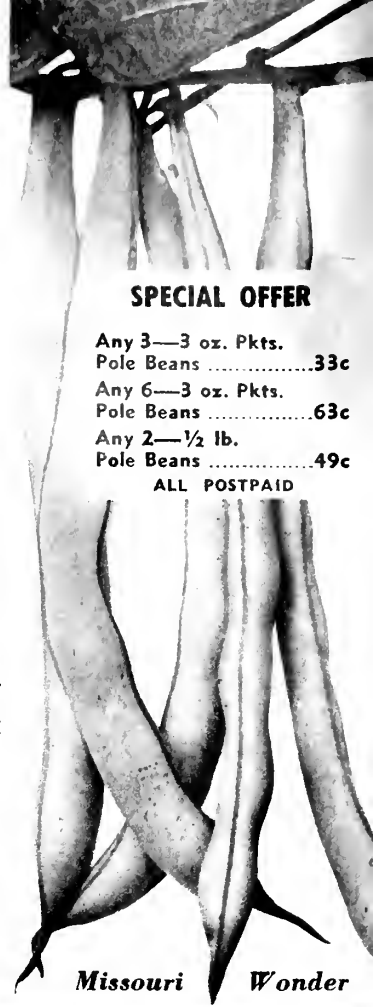

130—(74 days.) Tender corn field bean. Good climber. Gives a good crop of short, fat, fine tasting pods. Price: Triple size pkt. (3 oz.) 12c; ½ lb. 27c; 1 lb. 48c; 3 lbs. \$1.20, postpaid.

IMPROVED MISSOURI WONDER

Biggest of All

133—(66 days.) I got this one in Missouri. We've been breeding it up and it is a dandy. Just the thing to plant with Stowell's Evergreen sweet corn. The pods come on early. They are crease backed and well filled. They make the finest kind of a snap bean. Price: Triple size pkt. (3 oz.) 10c; ½ lb. 26c; 1 lb. 45c; 3 lbs. \$1.15, postpaid.

LIMA BEANS

Grow Both Pole and Bush Kinds

I've listed Lima Beans pretty much together in the catalog, both the dwarf bush variety, and the pole or climbers. They are all good. Everybody ought to plant Lima Beans. Years ago only those in the middle or southern states had them, but we have developed new early types which will succeed away up into Canada. Don't plant Lima Beans until after the frost danger is past. They like rich soil. Plant the beans 6 to 8 inches apart and rows 2 to 3 feet apart. Cover 1½ inches deep. When you plant Pole Limas in a hill, space the hills 4 ft. apart. Here at our place we often tie four poles together at the top and make sort of a tepee. When I drive in the country, I see a lot of other folks like the same idea. I think it is a good one. Cultivate Limas until they start to vine.

DWARF BABY POTATO LIMA

"The Tiny, Tender One"

115—(72 days.) The All American Silver medal winner. Originated by the University of Illinois, a most prolific variety, a cross between Henderson's Bush Lima and one of the potato lima types. The seeds are small, thick, bright green color, and similar in flavor to the big Fordhook. It is a thrifter and more robust bush than Henderson's. Matures very uniformly. Fine for produce markets, also for canning and for quick freezing.

Price: Triple size pkt. (3 oz.) 15c; ½ lb. 29c; 1 lb. 50c; 3 lbs. \$1.25, postpaid.

CLIMBING BABY LIMA

"The Little White One"

145—(72 days.) The earliest of all white limas. Pods look like regular baby limas, just as good eating too. First to begin bearing—continues until frost. Dark green glossy vines. 8 to 10 feet tall, 3 to 4 seeds per pod. Medium green color.

Price: Triple size pkt. (3 oz.) 15c; ½ lb. 25c; 1 lb. 45c; 3 lbs. \$1.15, postpaid.

The Unusual SPECKLED CALICO POLE LIMA BEAN

141—Here's the prize bean of my Ozark garden—the Speckled Pole Lima. Not only does it seem to love hot summer weather, but it keeps on bearing and bearing over an extremely long period. Very prolific and vigorous grower. Pods are 3 to 4 inches long with 3 to 4 big, flat beans in every one. Pods are borne in easy to pick clusters. Not much seed, but enough, I think. Price: Triple size (3 oz. pkt.) 15c; ½ lb. 25c; 1 lb. 44c; 3 lbs. \$1.05, postpaid.

MISSOURI BUTTER BEANS

131—(68 days.) Among my Missouri neighbors, this is the most popular pole Lima of all. It has dark glossy green foliage, grows 6 to 8 feet tall.

Can be used as green, shelled or dry. Big yielder. Seeds are white with purplish red markings when dry. Yields from midsummer until fall. Price: Triple size (3 oz.) packet 12c; ½ lb. 26c; 1 lb. 45c; 3 lbs. \$1.10, postpaid.

FOR THE FENCE OR TRELLIS

HOPI INDIAN LIMA

Drought Resistant

108—(71 days.) At last we have what we have been looking for—the real Drought Resistant Bean. This Hopi bean originally came from the Hopi Indians where they have been growing it for centuries on poor rocky soil. It does unusually well here in the Corn Belt. Big yields and lots of flavor. When we first got it, it didn't know much about climbing, but we have been selecting until now we have a real climbing variety—Hopi Indian Pole Lima. Plant it on a trellis or fence or put it with the corn. Price: Triple size pkt. (3 oz.) 12c; ½ lb. 30c; 1 lb. 50c; 3 lbs. \$1.25, postpaid.

YARD LONG

or Asparagus Bean

Unusual Novelty

129—(70 days.) Very unusual novelty. Distinctive and well worth planting. A vigorous growing vine with pods sometimes 4 feet long. Has an excellent asparagus-like flavor. Plant a few for the fun of it. Price: Triple size pkt. (3 oz.) 15c, postpaid.

EDIBLE SOYBEANS

Best Source of Protein in Garden—Delicious

143—(90 days.) This year plant some edible soybeans. I don't blame you for being skeptical about them. A lot of folks don't like to be the first to try new things, but soybeans aren't new. They have proven themselves time and again. This strain is a special one. The beans are large, bright green, turn yellow when mature. Fix them for the table just as you would lima beans or dry beans. Soybeans shell easy if you let the pods stand in boiling water for a few minutes. Price: Pkt. 10c; ½ lb. 24c; 1 lb. 35c; 3 lbs. 90c.

INOCULATE ALL BEANS

Be sure to inoculate all beans, peas and sweet peas. NITRAGIN inoculation will help you get bigger yields and faster growth. It just takes a minute to dust the seed—no trouble at all. A 15c packet is enough for 5 pounds of seed. Full directions on packet.

SCARLET RUNNER BEAN

Decorative—Beautiful Red Vine

RED FLOWERS

Very Hardy Grows 15 Ft.

138—(64 days.) Plant this one early. Very hardy. Most folks grow it for the beautiful scarlet flowers. The vines grow 15 feet or more very rapidly and it makes a fine decoration as well as fine snap beans.

Price: Triple size pkt. (3 oz.) 15c; ½ lb. 30c; 1 lb. 50c; 3 lbs. \$1.25, postpaid.

Extra EARLY

Early Jersey WAKEFIELD

The Early Pointed Cabbage 522—(63 days.) Standard early variety. Pointed head, very solid. Excellent for home or market garden. Heads weigh about 2½ to 3 lbs. Plants may be set close together. Price: Pkt. 10c; ½ oz. 35c; oz. 59c; ¼ lb. \$1.65, postpaid.

NORSEMAN

My Own Early Round 527—(68 days.) Very hard and solid and doesn't crack open with every shower. Medium size, sweet flavor, tender and juicy, suitable for late planting as it keeps well and makes an excellent crop. Price: Pkt. 12c; ½ oz. 35c; oz. 58c; ¼ lb. \$1.64, postpaid.

Early Round WAKEFIELD

(Golden Acre) Ice Box Size 524—(64 days.) This variety is crisp, tender and very sweet and forms a small, very solid head, doesn't burst open and is very uniform. I claim it is better than Wakefield. Price: Pkt. 12c; ½ oz. 33c; oz. 55c; ¼ lb. \$1.70, postpaid.

EARLY

EARLY FLAT DUTCH

Solid Flat Heads 521—(80 days.) A large flat variety on a short stem. Heads are very solid with few outside leaves so you can set plants closer together. Quality is good. Price: Pkt. 10c; ½ oz. 30c; oz. 55c; ¼ lb. \$1.65, postpaid.

COPENHAGEN MARKET

A Sure Yielder 518—(68 days.) You can depend on this one. Heads are early, round and of medium size, very hard and solid and are crisp and white. Heads average 8 to 10 lbs. and the quality is exceptionally fine. Price: Pkt. 10c; ½ oz. 35c; oz. 59c; ¼ lb. \$1.69, postpaid.

ALL HEAD EARLY

Fine Boiling Cabbage 516—(80 days.) A fine, mid-season sort. Mature in time to feed the hay, harvesting and threshing help. Fine boiling cabbage. Heads weigh 6 to 7 lbs. Rounding, flat and very solid. Price: Pkt. 9c; ½ oz. 28c; oz. 45c; ¼ lb. \$1.25, postpaid.

LATE

DANISH BALLHEAD

Large and Sweet 531—(105 days.) One of the finest of the late varieties. Large round heads, weighing about 9 lbs. Crisp, very sweet and tender, and unsurpassed for boiling or cole slaw. Price: Pkt. 10c; ½ oz. 30c; oz. 55c; ¼ lb. \$1.65, postpaid.

SUREHEAD

Always Heads Out 538—(95 days.) If you have trouble in getting your late cabbage to head, try this one. Heads are large, round and flat, very uniform in size, a good keeper, makes fine kraut. Price: Pkt. 9c; ½ oz. 25c; oz. 50c; ¼ lb. \$1.40, postpaid.

PREMIUM LATE DUTCH

Good Keeper 535—(105 days.) Everybody knows this one. A low growing sort, the heads very large, weighing from 12 to 14 lbs. Round, solid and broad, flat on top. A sure header, and a good keeper. Price: Pkt. 8c; ½ oz. 30c; oz. 55c; ¼ lb. \$1.59, postpaid.

Disease Resistant

MARION MARKET

The Early One 523—(75 days.) Strain of Copenhagen which has all the good points of the variety plus the resistance to disease. Price: Pkt. 10c; ½ oz. 36c; 1 oz. 59c; ¼ lb. \$1.77, ppd.

Yellows Resistant Ballhead

The Late One 526—(105 days.) A late, round headed one. Larger and more leafy than the ordinary Hollander. Heads round, somewhat flat. Very solid and a good keeper. Price: Pkt. 10c; ½ oz. 35c; oz. 60c; ¼ lb. \$1.40, postpaid.

JERSEY QUEEN

The Pointed One 525—(63 days.) Disease Resistant Jersey Wakefield. Standard early, pointed head variety. Smooth dark green leaves, 2½ to 3 lbs to the head. Does well everywhere. Makes a crop where others fail. Price: Pkt. 10c; ½ oz. 35c; oz. 63c; ¼ lb. \$1.79, postpaid.

CHINESE CABBAGE PE TSAI

Fine for Salads 539—(70 days.) A great salad vegetable. Serve like lettuce or celery or prepare like ordinary cabbage. Should be grown as an early spring or fall crop. I have best success when sowing seeds in the field the last part of July. Heads are tall and leaves unfold to the interior of the plant of a creamy white. It's getting more popular all the time. Price: Pkt. 10c; ½ oz. 25c; oz. 45c; ¼ lb. \$1.30, postpaid.

RED ROCK

533—(100 days.) A sure cropper, used for cooking, salads or pickling. Heads are very solid and red throughout. Perfectly round and solid as a rock. Price: Pkt. 10c; ½ oz. 35c; 1 oz. 60c, postpaid.

SAVOY CABBAGE

Can't Be Beat for Salads, Pickles and Cooking 517—(90 days.) For fineness and delicate flavor you'll have to go some to beat this variety. The leaves are crumpled, giving it a different appearance. Heads are round and very solid. Price: Pkt. 10c; ½ oz. 38c; oz. 65c, postpaid.

SPINACH

GIANT THICK LEAF

207—A very heavy yielder with the largest leaf of any of the Spinach varieties. Somewhat crumpled, medium early. Crisp and tender. Price: Pkt. 9c; oz. 18c; ¼ lb. 40c; 1 lb. \$1.20, ppd.

RE-SELECTED BLOOMSDALE

EGGPLANT You Should Try It

Eggplant should be better known. People who have eaten it always want more. Tend them just as you would peppers. This picture is Black Beauty, which I think is best of all.

656—(83 days.) BLACK BEAUTY. Grows 5 to 6 "eggs" to the plant, which will average almost as big as a quart cup. The color is a rich, purplish-black, the flavor is unusually fine and they can be used in many ways. Price: Packet 10c; ½ oz. 25c; oz. 48c, postpaid.

PARSLEY

FOR
SEASONING
FOR
GARNISH

217—MOSS CURLED. Used for garnishing and seasoning. Fine for soups and salads. Rich, curly, dark green. Price: Pkt. 10c; oz. 29c; ¼ lb. 79c, ppd.

221—TURNIP ROOTED (HAMBURG). Grow it like you would carrots. Has the same flavor as regular parsley, but the roots resemble small parsnips in shape and color, and are the edible part of the plant. Use it for soups and flavoring, like any other root crop. Price: Pkt. 7c; oz. 27c; ¼ lb. 75c, postpaid.

ASPARAGUS

*Washington Rust
Resistant*

201—Ten cents worth of seed will grow you all the plants you need for family use. Easy to raise, and once a bed is established, it will last a lifetime. Tender shoots, fine flavor. Seed should be sown as early in the spring as the ground can be worked. Price: Pkt. 10c; oz. 25c; ¼ lb. 62c, postpaid.

CELTUCE

Use Like Lettuce or Celery

502—The deliciously sweet leaves may be eaten as lettuce and the stalks, 1½" in diameter and 10" to 15" long, may be eaten raw like carrots or celery when peeled. Flavor like celery or lettuce. Tend like lettuce. Make successive plantings. Price: 15c per pkt.; 2 for 25c, postpaid.

SALSIFY

(Vegetable Oyster)

205—MAMMOTH SANDWICH ISLAND (Vegetable Oyster). Long, slender roots. Flesh is white, very tender and sweet. One of the best vegetables for soups. Also delicious baked or creamed. Easy to raise. Plant early in spring, cultivate, harvest and store like parsnips or may be left in the ground until spring. Has a flavor like oysters. Price: Pkt. 10c; oz. 40c; ¼ lb. \$1.20, postpaid.

BROCCOLI

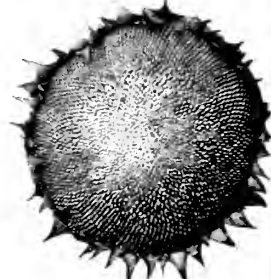

242—Italian Green Sprouting (70 days.) Plants are tall, erect and vigorous. The large cauliflower-like heads are 5

to 6 in. across, not solid, but with an abundance of light green, tender sprouts that are delicious creamed or used for greens. Sow the seed early for summer crop and in midsummer for a fall crop. This strain is highly recommended for freezing. Pkt. 10c; ½ oz. 30c; oz. 55c, postpaid.

Big Yellow GROUND CHERRY

Easy to Grow
230—Fruits resemble large yellow berries and are enclosed in loose papery husks. Grows close to the ground but does not spread much. Delicious preserved, or in combination with lemons and oranges. Price: Pkt. 10c; ½ oz. 40c, postpaid.

TOM THUMB

Baby Butter-Head

504—(65 days.) Tennis ball size heads that are unusually sweet and crisp. Grows quickly, is unusually fine flavored, tender and sweet, and makes wonderful salads served whole. Matures quickly, can be grown in window boxes as well as in the garden. Pkt. 15c; oz. 60c, postpaid.

SCARLET WHITE TIP

Earliest 2-Color Radish

444—(25 days.) A bright scarlet red with a contrasting white tip. Early, round, tender, and sweet. Price: Pkt. 10c; oz. 20c; ¼ lb. 42c; 1 lb. \$1.00, postpaid.

FAMOUS LONG WHITE ICICLE

Attractive, Tender, Crisp, Sweet, Early

448—(27 days.) Most popular and the earliest long white radish. Very mild and sweet. Snow white throughout. One of the most tasty ones we have. Tops are small. It grows quickly and doesn't get pithy. No garden is complete without Field's long white icicle. Plant plenty of "reds" and plenty of these sweet long whites.

Price: Pkt. 10c; oz. 20c; ¼ lb. 43c; 1 lb. \$1.29, postpaid.

HAILSTONE

Sweet - Round - White

458—(28 days.) A white skinned early globe radish. Crisp, sweet, tender. Larger than most round radishes. Adds variety and color to the relish plate. Price: Pkt. 10c; oz. 22c; ¼ lb. 60c; 1 lb. \$1.20, postpaid.

The Winter Radishes WHITE MAMMOTH

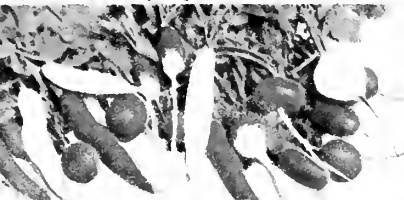

THE WHITE FALL RADISH

56—(58 days.) A fine late fall variety, a decidedly heavy favorite among gardeners for summer and fall market. Grows 7 to 8 inches long. Solid, white flesh. Price: Pkt. 10c; oz. 20c; ¼ lb. 37c; 1 lb. \$1.20, postpaid.

CHINESE ROSE WINTER

For Winter Storage or Bunching

54—(50 days.) Most popular of the winter sorts. Very handsome and dependable, either for bunching or winter storage. 5 to 6 inches long. Always solid and crisp. Plant in July at turnip planting time. Price: Pkt. 10c; oz. 20c; ¼ lb. 30c; 1 lb. \$1.15, postpaid.

RADISH MIXTURE

53—Includes all of the above named sorts, and many others. Start pulling them early and use as they are ready. All colors, sizes and shapes. The perfect way to raise radishes and have crisp, fresh, new ones coming along ready for pulling all season long.

PRICE: (Double Size Packet) 10c Oz. 18c; ¼ lb. 35c, postpaid

Grow Your Own RADISHES

A garden wouldn't be a garden unless it had radishes in it. Everyone who has a patch of ground as big as a table top should raise their own radishes. These varieties are all good ones. Plant 4 or 5 different kinds. One ounce of seed will make a row 100 feet long and when you figure how many bunches you can get from a 100 foot row, you can easily see what a money maker it is. Make several plantings.

FRENCH BREAKFAST

The Cylindrical Early 2-Color Radish

442—(24 days.) Valuable as a standard home and market gardening sort for forcing.

A quick grower, and attractive. Oblong, white tipped. Very early.

PRICE: Pkt. 10c; oz. 20c; ¼ lb. 59c; 1 lb. \$1.39, postpaid.

NEW CRIMSON GIANT

HUGE SIZE →

But Doesn't Get Pithy

437—(28 days.) Noted for its large size, and because it doesn't get pithy. The flesh is a snowy white, and the color is an attractive deep crimson. A vigorous quick grower. Price: Pkt. 10c; oz. 20c; ¼ lb. 45c; 1 lb. \$1.19, postpaid.

New, Sweet Eating Radish

TENDERSWEET

Melts In Your Mouth

439—Here's a radish improved for its taste—not its size. It's early, round and red, like a ball, but more than that—all the tender crispness a radish could have and still be deliciously and unusually sweet has been bred into this new strain. The eating radish deluxe. You must serve it and hear your family exclaim. Ready in two to three weeks. Large pkt. 12c; oz. 29c; ¼ lb. 89c, postpaid.

The Red Icicle LONG SCARLET

451—(26 days.) The short top kind. Standard sort for home gardeners and truckers, too. Smooth and uniform, five to six inches long, crisp white flesh. Price: Pkt. 10c; oz. 20c; ¼ lb. 42c; 1 lb. \$1.10, postpaid.

EARLY SCARLET GLOBE 7c

Sweet and Tender

440—(22 days.) A beautiful bright scarlet. Makes a quick growth. Pure white flesh, crisp and sweet. Price: Pkt. 7c; oz. 20c; ¼ lb. 59c; 1 lb. \$1.39, postpaid.

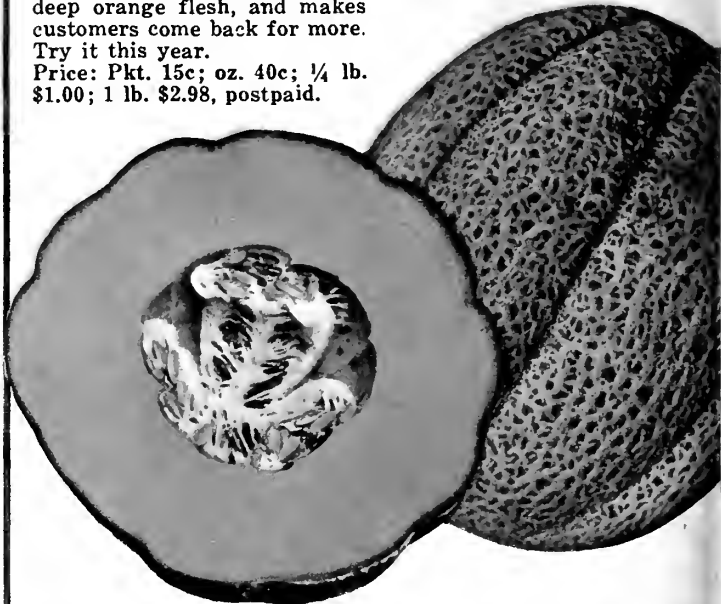

The Famous

FIELD'S DAISY MELON

The Best "ALL-AROUND" Melon

332—(76 days.) I don't think you will ever find a sweeter, better, all around melon. I introduced this years ago and we have been working on it ever since, making a careful selection each season. It's easy grown, prolific, medium in size, round, perfect in quality, thick, smooth, deep orange flesh, and makes customers come back for more. Try it this year.

Price: Pkt. 15c; oz. 40c; ¼ lb. \$1.00; 1 lb. \$2.98, postpaid.

TWO HALE'S BEST MELONS

MILDEW RESISTANT

328—(80 days.) A carefully selected strain of Hale's best that won't take mildew. Better than the regular Hale's and more widely adapted. The melons are slightly oblong or oval shaped. The seed cavity is very small, the flesh is very thick and deep orange. Price: Pkt. 10c; oz. 30c; ¼ lb. 80c; 1 lb. \$1.95, postpaid.

Most Popular for Market One of the Earliest

333—(80 days.) Medium size, very early sort, slightly oblong, but well netted and very attractive. Thick flesh, deep orange color, extensively planted in the commercial muskmelon growing districts. Price: Pkt. 10c; oz. 25c; ¼ lb. 75c; 1 lb. \$1.89, postpaid.

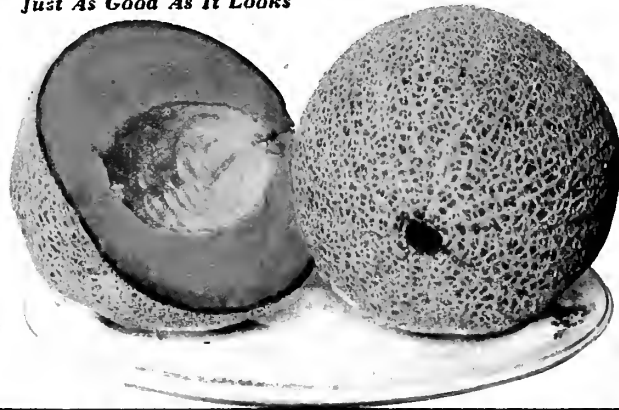

HEARTS OF GOLD ↓

THE SWEET TABLE MELON

345—(95 days.) The name about describes it. Medium size, round, well netted, sweet and tender. Price: Pkt. 15c; oz. 38c; ¼ lb. 90c; 1 lb. \$2.25, postpaid.

Just As Good As It Looks

DARK RED CANNER

For Canning, Cooking, Pickles

606—This wonderful new variety was developed especially for the canning trade in the East. The beets are exceptionally fine for pickles. Small and globe shaped. Color is a rich, deep dark red, doesn't fade or wash out during cooking or pickling. Price: Pkt. 10c; oz. 30c; ¼ lb. 95c, postpaid.

DETROIT DARK RED

Favorite the World Over

604—Improved—(58 days.) There are no white streaks or rings in this one. It is a deep, rich red color, inside and out. Globe shaped. Has small tap roots and is excellent for home or market garden. Stands handling well. Price: Pkt. 10c; oz. 33c; ¼ lb. 89c, postpaid.

PERFECTED DETROIT DARK RED

The Perfect Deep Red Beet

602—(58 days.) A re-selected strain of Detroit Dark Red. In our trial grounds, it made the best showing of any for color, shape and uniformity. In fact, I don't know how it can be improved. Medium in size and runs as regular and uniform as you could wish. Rich, deep dark red with absolutely no white rings nor streaks. No side roots. Price: Pkt. 11c; oz. 35c; ¼ lb. \$1.00, postpaid.

NEW! PERFECTED CANNER

605—A new beet that beats them all. If you are looking for perfection stop right here. This beet not only has the richest deep, dark red, but doesn't lose it in cooking or pickling. Won't fade. It's small, uniform and smooth with practically no tap roots. You can't find a better all around beet for canning. Price: Pkt. 10c; 1 oz. 35c; ¼ lb. \$1.10, postpaid.

MUSKMELONS

I'm proud of my muskmelon seed. I don't believe there is another seedsman in the country who has spent as much time fussing with the growers, inspecting crops and worrying about his melon seeds. Every variety is grown by a specialist in an isolated place where it doesn't get a chance to mix with anything else. Plant them after the ground is warm. Figure about three dozen hills for one packet of seed or 100 hills from an ounce. Give them plenty of room, at least 6 to 8 ft. each way.

GREELEY WONDER

The Largest of All Real Flavor, Too

334—(80 days.) This is the largest one on the list. In spite of its size, it has exceptionally fine quality and good flavor. If you want something extra big to take to the Fair, here it is. Price: Pkt. 10c; oz. 30c; ¼ lb. 80c; 1 lb. \$1.98, postpaid.

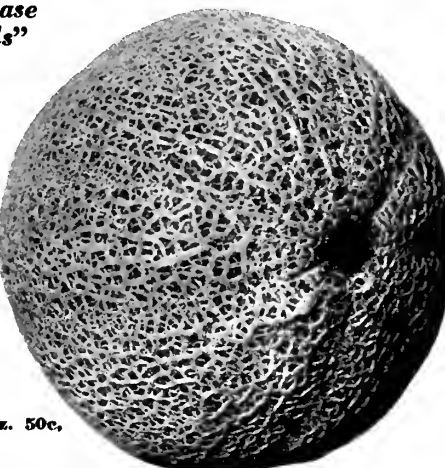

GOLDEN HONEY—Early Hale's Type

"Finest of Disease Resistant Kinds"

Solid Golden Flesh

327—A new mildew resistant cantaloup of the Hale's type. Fully 7 days earlier than Hale's Best. Very solid, golden flesh, heavily netted, and will stand lots of handling in shipping. Vines are vigorous—a big yielder. We consider this the finest of the mildew resistant cantaloups (not much seed to offer this year.)

Price: Pkt. 15c; oz. 50c, postpaid.

HONEY ROCK

The Best Shipper

336—(95 days.) The sweetest melon I know of and as solid as a rock. Heavily netted, with no sign of rib. Very productive, beautiful in appearance, a fine shipper. In fact one of the finest all-around melons. Pkt. 10c; oz. 25c; ¼ lb. 75c; 1 lb. \$1.89, ppd.

BANANA MELON

"Plant This for Variety"

326—(96 days.) Looks like a huge banana with a delicious banana-like flavor, when thoroughly ripe. The boys will like this one.

Price: Pkt. 15c; 1 oz. 35c; ¼ lb. 80c; 1 lb. \$1.98, postpaid.

MIXED MUSKMELONS

Fun for Kids—from 8 to 80

331—Give the boys an ounce of this for their own melon patch. It's cheap and contains all of the varieties listed above, and many more. I am sure you will find some that you never knew existed. Price: Pkt. 10c; oz. 20c; ¼ lb. 60c; 1 lb. \$1.50, postpaid.

GREENFLESHED MELONS

A real treat for Midwesterners

The Early One

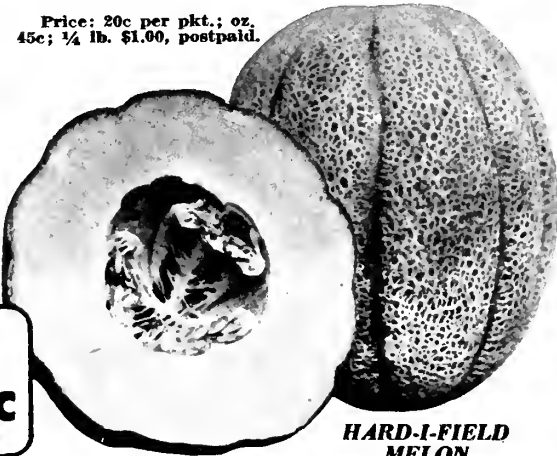

344—STANDARD ROCKY FORD—(84 days.) This is the old, greenfleshed "grand-daddy of them all" that made Rocky Ford famous. We have found a carefully selected early strain which will please you. Price: Pkt. 10c; oz. 25c; ¼ lb. 72c; 1 lb. \$1.89, postpaid.

The Sweet One

337—HONEY DEW—(112 days.) A later variety that is extremely sweet. Is smooth, has a white rind and green flesh, honey-like flavor. This is the one served in hotels at such a fancy price. Price: Pkt. 10c; oz. 25c; ¼ lb. 75c; 1 lb. \$1.78, postpaid.

Muskmelon Special Offer

1 PKT. HEARTS OF GOLD 350X
1 PKT. HALE'S BEST (Mildew Resistant) Three Fine Melons
1 PKT. STANDARD ROCKY FORD (Green Flesh) 29c Postpaid

HARD-I-FIELD

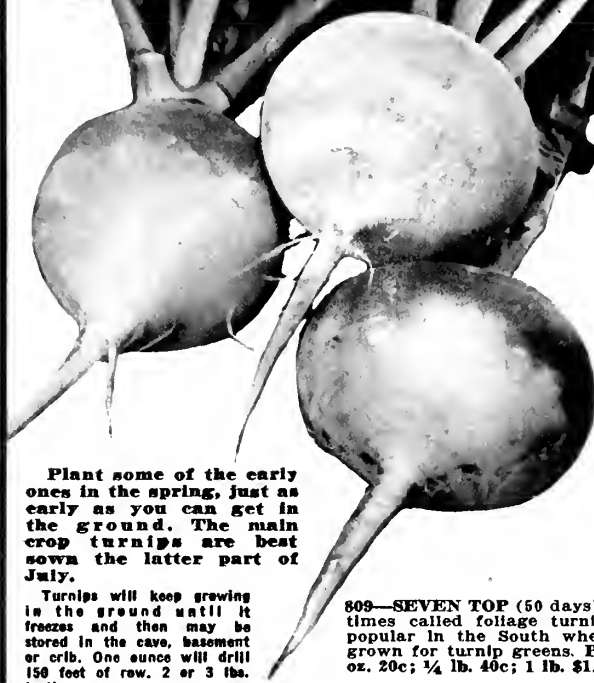

The "Contest Melon" You Loved

330—(95 days.) A wonderful melon for the home gardener or for the shipper. The fruit is 7¼ inches long—about 6½ inches in diameter or a large oval. Coarsely netted. Flesh is thick medium grain, solid orange, fine flavor. A tough rind enables it to stand handling and keep better.

Price: 20c per pkt.; oz. 45c; ¼ lb. \$1.00, postpaid.

The Four Best Varieties

TURNIPS

Plant some of the early ones in the spring, just as early as you can get in the ground. The main crop turnips are best sown the latter part of July.

Turnips will keep growing in the ground until it freezes and then may be stored in the cave, basement or crib. One ounce will drill 150 feet of row, 2 or 3 lbs. to the acre.

809—SEVEN TOP (50 days.) Sometimes called foliage turnip. Very popular in the South where it is grown for turnip greens. Pkt. 10c; oz. 20c; ¼ lb. 40c; 1 lb. \$1.20.

803—EXTRA EARLY MILAN—(40 days.) One of the earliest turnips in cultivation. Fine for home or market. The roots are flat, white with purple top, flesh pure white, very fine grained, sweet and tender. Price: Pkt. 10c; oz. 20c; ¼ lb. 45c; 1 lb. \$1.30, postpaid.

807—PURPLE TOP GLOBE—(55 days.) The leading turnip, one of the best. Yields heavy crops of large, round, purple top turnips. Very tender, crisp and sweet. Flesh pure white, and it stores well for winter use. The flavor is unusually good. Price: Pkt. 7c; oz. 15c; ¼ lb. 40c; 1 lb. 95c, postpaid.

810—WHITE GLOBE—(75 days.) A large late variety which is good for table use or for stock feed. It produces a tremendous turnip. The roots grow 4 to 6 inches in diameter, entirely white. Price: Pkt. 7c; oz. 15c; ¼ lb. 38c; 1 lb. 98c, postpaid.

806—PURPLE TOP STRAP LEAF—(45 days.) Very similar to the Purple Top White Globe except that it is flatter in shape. One of the finest garden sorts for either spring or fall planting. Price: Pkt. 5c; oz. 15c; ¼ lb. 35c; 1 lb. 95c, postpaid.

HOW TO STORE THEM

Turnips and Rutabagas are two of the best vegetables for storing over winter. Build or dig an outdoor cave or simply store in cool, dark cellar. Watch out for poorly ventilated situation where mold can develop.

RUTABAGAS

Good Keepers—Firm Flesh

808—RUTABAGA AMERICAN PURPLE TOP—(90 days.) Has large, smooth cabbage-like leaves. The root is large, globe-shaped, with a small crown, yellow in color with a purple top. The flesh is tender and crisp. Grown extensively in the northern sections. Crop was short. Not enough seed to go around. Order early.

Price: Pkt. 8c; oz. 20c; ¼ lb. 45c; 1 lb. \$1.35, postpaid.

BEET SEED

I have spent a lot of time to get you only the finest kind of beets. On some of the varieties I have even sent to Europe after the seed. I like a beet of uniform shape and color, with small top, small tap root, free from the straggly side roots. One ounce of seed will grow 100 feet of row. Plant as soon as you can get in the ground in the spring and make several sowings throughout the season.

BEET Special Offer

1 Pkt. Improved Detroit Dark Red
1 Pkt. Dark Red Canner 200X
1 Pkt. Crosby's Egyptian
This is a real special offer you can't afford to miss. 25c Postpaid
—H. F.

EARLY WONDER

607—(52 days.) Very early and small, flat globe shape with small collar and tap roots. A favorite with market gardeners.

Price: Pkt. 8c; oz. 27c; ¼ lb. 89c, postpaid.

CROSBY EGYPTIAN

The Earliest Deep Red

603—(55 days.)—Fine for table or market. Excellent for freezing. Medium globe shaped. 2½ to 3½ inches in diameter. Small side roots. Medium red in color. Rich, sweet flavor. Price: Pkt. 10c; oz. 28c; ¼ lb. 77c, pp.

STOCK BEETS

(90 to 120 days.) Makes 15 to 20 tons of beets to the acre. Sow the seed in April and May in rows 2½ to 3 feet apart, at the rate of 10 or 12 lbs. to the acre. Harvest before severe frost and store in pits or cellar. Livestock and poultry sure go for stock beets. Price on all varieties: Oz. 24c; ¼ lb. 73c; 1 lb. \$1.90; 5 lbs. \$9.00, postpaid.

Mam. La 19 Red

616—GIANT FEEDING SUGAR. One of the heaviest producers. Its extra sugar content makes it more desirable for a dairy feed. Fine keeper, oval shaped.
619—MAMMOTH LONG RED MANGEL. The largest and most productive of all. Called by some "Gate Post" because of its size. Often reaches 24 to 30 inches in length with individual weight from 25 to 35 lbs. Easily harvested as the root grows half out of the ground.
610—POULTRY BEETS. You who have fed mangels to poultry know their value as a winter feed to take the place of green stuff to keep the hens on production. This is a mixture of all kinds. Makes real feed.
612—SUGAR BEET (Klein Wanzleben) (90 days). Large smooth white wedged shaped root rich in sugar content. It grows mostly below the surface of the soil. Roots not quite as large as the mangel.

D.W. BERRY

AN312—I'm offering only Lucretia. It's the best variety and the hardest. Large, sweet and coreless. Milder than a blackberry. Be sure and mulch with straw in late fall and see what a wonderful crop you'll have. 6 for 98c; 12 for \$1.79; 25 for \$3.19; 50 for \$6.00; 100 for \$10.49, postpaid.

YOUNGBERRIES

Dark Purple—Sweet Flavored Bears Every Year

AN330—Big dark purple sweet-flavored berries over 1" long. Bears on old and young wood, sure to bear in any year. 6 for 98c; 12 for \$1.79; 25 for \$3.19; 50 for \$6.00; 100 for \$10.49, postpaid.

New Thornless

Youngberry

Gardenia

AN334—This is the same fine Youngberry with the sweet, jet-black berries as the variety listed above but these plants do not have thorns. Folks tell me they get some mighty good crops off these Youngberries. Better try them. Price: 20c each, postpaid.

Henry Field's HARDY BERRIES

Quickest way to be independent of the high cost of fruit is GROW YOUR OWN. And berries is the place to start, because they are easiest to grow and come into bearing soonest.

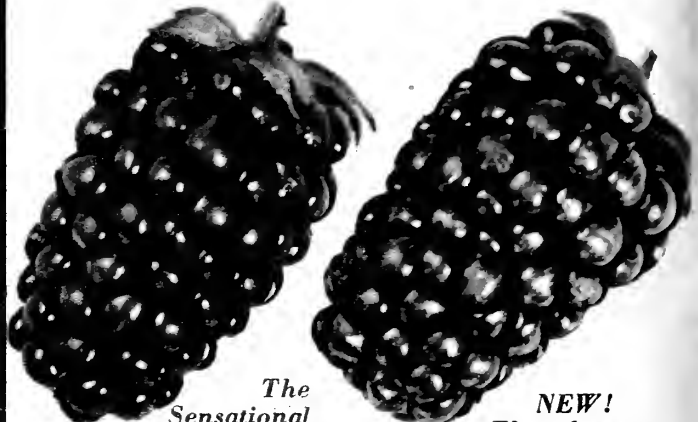

Here on these two pages is the best selection of berry plants you can find anyplace. I have put my personal approval on each variety, and have grown each of them at Shenandoah and at my cabin in the Ozarks, so I don't hesitate to recommend them to you.

Get a real start of berries this spring. You'll have a little fruit this year—lots of strawberries—and a real plenty next year. The cost is small—nothing compared to what you'll pay for fruit on the market, so get started right away.

Here I am in my own "personal" garden down in the Ozarks picking Missouri Giant Blackberries.

GIANT BOYSENBERRIES

The Sensational BOYSENBERRY

NEW! Thornless

BOYSENBERRY

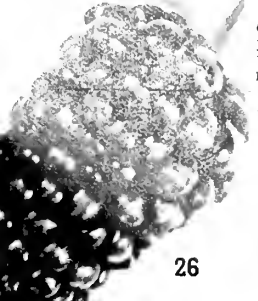

AN310—Often called "Wonderberry" because of its huge size and goodness. Larger than any berry I've seen. Berries often 2½ in. long. Rich, dark purple. Flavor a little from the Loganberry, the Raspberry, and Blackberry. A real money maker. Prices: 3 for 69c; 6 for 98c; 12 for \$1.79; 25 for \$3.29, postpaid.

AN311—Here's the popular Boysenberry, but a variety WITHOUT THORNS. Bear as well as the regular Boysenberry. Same high flavor and immense size berries. Prices: 39c each; 3 for 98c; 6 for \$1.49; 12 for \$2.65; 25 for \$4.98, postpaid.

BLACKBERRIES

ALFRED

The Early Long Bearing Black

AN325—The early ripening, long bearing blackberry. Have decided to list this variety because it produces such an enormous crop of first-quality fruit. Large size, jet black, deliciously flavored berries that are nearly coreless and seedless. Will grow in poor soil and take care of themselves year after year. Probably the most early ripening of any blackberry and has a long bearing season. Very hardy and an all around fine blackberry. Prices: 6 for 89c; 12 for \$1.69; 25 for \$2.87; 50 for \$4.98; 100 for \$8.98, ppd.

OZARK QUEEN

With Big Luscious Berries

AN308—A true ever-bearing variety! From spring till freezing weather loaded with big luscious, extra large berries. Dry weather won't stop this hardy blackberry. A money-maker commercially. I found this grand berry growing on my Missouri place and it's a winner in every way. Prices: 2 for 59c; 4 for 98c; 12 for \$2.39; 25 for \$4.49; 50 for \$8.29; 100 for \$14.50, postpaid.

MISSOURI GIANT HYBRID

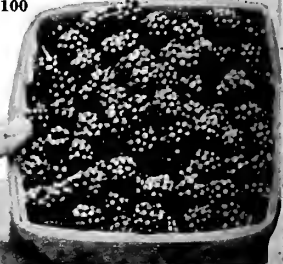

Biggest and Best

AN305—A blackberry that is bigger than any berry I've ever seen. Heavy bearing, doesn't sucker, easy to pick. Starts to bear early and bears almost as long as any everbearer. 1 year plants: 2 for 59c; 4 for 98c; 12 for \$2.39; 25 for \$4.49; 50 for \$8.29, postpaid.

ELDORADO ↓

The World's Leading Blackberry

AN307—This is undoubtedly the world's leading blackberry. Most resistant to rust. The berries are large and firm and borne in tremendous abundance. It ripens over a long period. The fruit is juicy, sweet and very fine flavored and the vines are very hardy—one of the best of all blackberries. Prices: 6 for 89c; 12 for \$1.69; 25 for \$2.87; 50 for \$4.98; 100 for \$8.98, ppd.

FOUR BEST EVERBEARERS

Everybody should plant at least a few of Everbearers and have strawberries around the clock, and the first year. We list only what we consider the best of the lot. Any one of them will give you real satisfaction.

← NEW MINNESOTA 1166

The Hardy Everbearer

BN708—(Evermore.) New, northern everbearer which has become immensely popular: Extremely hardy, good heavy foliage, vigorous grower. Bears big, smooth, delicious dark red berries spring, summer and fall. Prices: 50 for \$2.85; 100 for \$5.19; 200 for \$9.98; 500 for \$20.65, postpaid. 1000 for \$37.98, express not prepaid.

GIANT MASTODON →

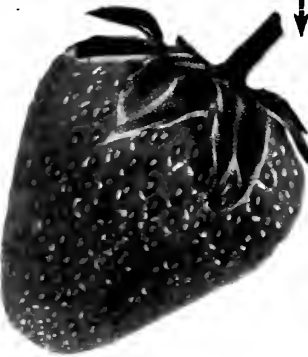

BN707—(Everbearer.) Bears 90 days from planting and keeps on 'til frost. Giant in size, often 2 inches in diameter but still very sweet and juicy. Very heavy yielder. Prices: 50 for \$2.75; 100 for \$4.98; 200 for \$8.98; 500 for \$19.75, postpaid. 1000 for \$34.98, express not prepaid.

STREAMLINER

The Jumbo Everbearer

BN709—Brand new jumbo size everbearer. Sweet as honey, fresh as a June day. Bears July until hard freeze. Extremely sweet so requires a minimum of sugar. Quart of berries per plant. Quantity limited. First come, first served. Prices: 25 for \$2.28; 50 for \$3.95; 100 for \$6.45; 200 for \$10.79; 500 for \$25.80, postpaid. 1000 for \$49.95, express not prepaid.

New GEM

Fruit from Spring to Fall

BN706—Fruit early spring, summer and fall. A wonderful plant maker, being healthy and vigorous. Berries quite round with few seeds. Will bear heavy first summer. Prices: 50 for \$2.35; 100 for \$4.25; 200 for \$7.65; 500 for \$17.98, postpaid. 1000 for \$33.98, express not prepaid.

HYBRID BLUEBERRIES

*You Can Now Grow Genuine
Blueberries in
In Your Yard*

Blueberries like acid soil full of organic matter. Peat Moss, such as we list on page 10, is just the thing when worked in the soil before planting the Blueberries. It also adds organic matter and makes the soil acid by adding liberal quantities of rotted

leaves, pine needles, sawdust or similar material. Be sure not to pour it into the hole into which you are going to plant the Blueberry plant, so it all stays in one spot, but any of this material above

mentioned should be mixed thoroughly with the soil before the Blueberry plants are planted.

NAMED VARIETIES GIANT BLUEBERRIES

Truly As Big As Marbles

Delicious in flavor, berries ranging up to the size of marbles just covering the plant, big upright shrubby plants growing to the height of 5 ft. or more and as broad. A half dozen will supply the neighborhood. Rich blue berries ready for those famous blueberry pies, cakes, and canning with plenty to spare to eat with cream or right off the bushes. I will only sell these in collections of three as several varieties of Blueberries must be grown together to get a good set of berries. Plant 6 feet apart. I am offering the newest and finest sorts in 3 year old plants.

New Henry Field's GIANT

BN710—For hardiness, yield, flavor, color and size it just can't be beat. Half bigger than Bellmar. Bears profusely, and with its giant size, makes an enormous yield. Fruits are clear red right straight through. Berries are held off the ground on strong stems, making them clean and easy to pick. Sweeter than most berries so requires less sugar. Neither extra early or extra late. Some of the berries I've picked take 13 to fill a qt. box. Prices: 10 for \$1.19; 25 for \$2.39; 50 for \$4.25; 100 for \$7.98; 200 for \$15.49; 500 for \$29.89, postpaid.

JUNE BEARERS

June Bearers are the "big crop" berries we all love so much. You can grow them for a fraction of what it costs to buy them on the market. These are all hardy, healthy varieties that can't help but do well for you.

Heavy Bearing BELLMAR

My Choice of All

BN701—Guess everybody knows by now that Bellmar is one of my favorite strawberries. The reason is simple. First of all it's delicious. The berries are large but have no hard cores or hollow spots. Deep dark red in color with no green tips and holds this beautiful color even when canned, and on top of all it's easy to grow. I grew this special strain at my cabin in the Ozarks. Really choice. Prices: 50 for \$1.69; 100 for \$2.98; 200 for \$5.69; 500 for \$11.29, postpaid. 1000 for \$19.75, express not prepaid.

The famous Bellmar should be in every strawberry garden.

Giant Surecrop Strawberry Collection

There isn't a place that can't use a hundred strawberries. With this many, you can have plenty to eat, put up in the spring and lots of berries all summer. Here's one of my favorite assortments. Takes a space about 20 x 15 feet. Set the plants 18 inches each way.

BN721X—50 Bellmar (June Bearing), 50 Giant Mastodon (Everbearing), 100 plants in all, \$3.98, ppd.

Senator DUNLAP

The Old Favorite

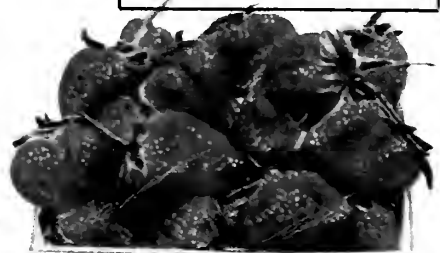

BN703—Every berry patch should have plenty of this old reliable main crop berry. It can't be beat for flavor, quality, drought resistance or color. Midseason, bright red, smooth, large firm fruits. I think more people plant Senator Dunlap than any other berry. There must be a reason. Try some and see for yourself. Prices: 50 for \$1.35; 100 for \$2.20; 200 for \$3.98; 500 for \$8.65, postpaid. 1000 for \$16.75, express not prepaid.

← BLAKEMORE Drought-Resistant

BN702—You can pick berries whether there is rain all season or not, for here's a berry that will stand more dry hot weather than any variety. Really dependable. A heavy bearer, early fruit very large, good color and prized for canning and preserves because they hold their shape fine. Good shipper. Many growers say Blakemore makes them more money than any other. Prices: 50 for \$1.29; 100 for \$2.10; 200 for \$3.98; 500 for \$8.40, postpaid. 1000 for \$14.80, express not prepaid.

STRAWBERRIES My Collection

Improved CURRANTS

SEE SHIPPING NOTE BELOW

Plant 3 Ft. Apart Each Way

AN904—NEW RED LAKE CURRANT—The new bigger, better, heavier bearing red currant. Here's a currant that has all the good qualities of the old varieties and a lot of new ones of its own. Bushes thrifty and heavy bearing. Currants large in big, well filled bunches. Long stems make for easy picking. If you have some old currants that don't do well, dig them out and try Red Lake. **Prices:** 59c each; 3 for \$1.59; 10 for \$4.98, postpaid.

AN913—WILDER CURRANT—In the great currant producing regions Wilder is considered the very favorite variety. Exceedingly vigorous and productive. Fruit of great size and fine appearance. The fruit hangs longer after ripening than most varieties. The clusters are like long clusters of grapes, compact with large dark red berries with red flesh, firm and juicy and of good quality. **Prices:** 54c each; 3 for \$1.39; 10 for \$3.89, postpaid.

AN903—IMPROVED PERFECTION—Large bright berries just cover the plant. Good flavor and very popular. **Prices:** 49c each; 3 for \$1.29; 10 for \$3.39, ppd.

GOOSEBERRIES

PIXWELL

Finest of All

AN911—Folks, I have been trying for a long time to get plants enough of this finest of all gooseberries to list it in my catalog. The name is a good one—it does pick well. The big luscious berries hang from the branches well away from the thorns. It's new and it's scarce. This berry can be grown farther north than any other gooseberry and also farther south. It will stand and produce a fine crop of berries under a wide range of climatic and soil conditions. Do not confuse this variety with the common sorts offered as it is far superior. Try it for yourself and see. My usual money back guarantee if you don't like it. **Price:** 79c each; 3 for \$1.98; 12 for \$7.99, postpaid.

AN912—OREGON CHAMPION GOOSEBERRY—This is a very dependable regular and heavy bearer of the finest quality. The berries are pale green and creamy yellow when fully ripe of medium size. Many people think gooseberries are sour and that is simply because they picked them green. When fully ripe gooseberries are sweet and delicious. Champions hang on the underside of the branches and this makes them easy to pick. They thrive in any ordinary garden soil. Please note that we can ship gooseberries only into certain states. **Prices:** 69c each; 3 for \$1.80; 12 for \$6.98, postpaid.

It Makes One of Most Beautiful Shrubs for Lawn or Border

Bush Cherries for Fruit and Beauty

Dr. N. E. Hansen, introducer of the world's famous hardy Hansen Bush Cherries.

BUSH CHERRY COLLECTION

AN90X—3 Hansen Bush Cherry and 2 new red-fleshed Bush Cherry (below), enough to give you bush cherries galore, for canning and eating.

All for \$2.59

FREE GIFT: 1 Bridal Wreath

HANSEN'S Famous BUSH CHERRIES

Loaded with Delicious Fruit

THE IMPROVED BUSH CHERRY

AN70—A miracle plant. Grows like a bush (4 to 5 ft. high). Makes beautiful ornamental shrub. Bears almost as much fruit as a plum tree. No waiting for fruit. This new strain makes it better eating than ever—fresh, canned, or in preserves. Very hardy. Stands intense heat and cold. Plant 3 to 4 ft. apart. 39c each; 3 for \$1.10; 10 for \$3.49, postpaid.

Field's GIANT

Red Fleshed BUSH CHERRY

Purplish-Red Skin and Flesh

AN71—Now a new Bush Cherry as loaded as the regular Bush Cherry, but giant (plum size) fruit—all rich dark purplish red skin and flesh. Best looking fruit I've seen. Good eaten just like plums or cooked or canned same way. Grows 4 to 6 feet. Plant 6 feet apart. Will produce more fruit in small space than anything I know. This bush cherry makes one of the loveliest shrubs. Plant it in the border, enjoy its delightful bloom, and have fruit, too. More expensive than ordinary bush cherries, but well worth it. Sold only by Field's as supply is limited. 98c ea.; 2 for \$1.79, ppd.

New! HYBRID BUSH CHERRIES

I have been watching for a long time with great interest the efforts of the various experiment stations to improve on the Hansen Bush Cherry. By cross hybridization and selection, they have managed to produce some outstanding bush cherries with much larger and tastier fruit than the old Hansen Bush Cherry and a better grower. This spring I am offering in a limited way some of the new named varieties of Bush Cherry. These are budded on to American plums, and should be hardy anywhere. Should a wild plum stalk come shooting up through the shiny leaf Bush Cherry, be sure and trim it out because that will be from the wild plum root. You can tell the difference easy enough—the wild plums are a dark green and rough leaved plant, while the Bush Cherries are shiny leaved and bright green.

I have found these Bush Cherries not only grand for eating and canning, but also they are an extremely beautiful shrub in the spring when covered with

white flowers. Their foliage is pretty all summer, and as far as I can find, they are quite free from any serious insects and disease injury.

AN72—BROOKS—Very large dark red fruit, almost as large as regular cherries. They bear the second year from planting and bear very heavily. Bush is compact and shapely. Loaded with the usual white flowers in the spring. 98c each, postpaid.

AN73—BLACK BEAUTY—This is the newest selection of the bush cherry. It is well named. The fruits are almost black. A very dark glossy black maroon red. Almost as large as tree cherries. The flesh of the fruit is dark red from the skin right to the pit. Fine eating, and fine for canning and pies. You folks who are out of the regular cherry country can grow these new hybrid bush cherries and enjoy the fruit just as much as you would regular cherries. 98c each, postpaid.

AN74—SIOUX—Extremely large cherries— $\frac{3}{4}$ " or better across. Purplish black, shiny with greenish flesh. These berries are very juicy and sweet. In the vicinity of Minnesota, this cherry fruits about the second week in August—earlier south of there. 98c each, postpaid.

HARDY APRICOTS SUPER HARDY APRICOT "SUPERB"

AN250—Now you can have delicious sweet apricots in your planting—this variety, **SUPERB**, is **HARDY** in the middle west. Besides it's a delicious flavor you get in no other fruit. Eat right off the tree. Plant on a north or west slope 15 to 20 feet apart. Ripens between cherries and peaches. Remember Apricots will stand more hot weather than any fruit.

MOORPARK (Freestone)

AN251—Big, juicy, full-flavored apricot just right for canning and drying. Also one of the finest dessert varieties. Ripens to a beautiful orange, both skin and flesh. Perfectly freestone. Fuzzless skin. Mild sweet flesh, dryer than peaches and easier to keep. Trees hardy and thrifty as peach trees. Plant two or more for a good set of fruit.

EARLY GOLDEN

AN254—A heavy bearing smooth skinned pale orange apricot with bright yellow flesh. Moderately juicy and sweet with very good flavor. This variety is a freestone and very extensively grown in the warmer areas. Not quite as hardy as Superb in the cold areas.

CHINESE GOLDEN

AN253—A very fine and very hardy apricot. Large size and of a very sweet flavor. Smooth skinned and pale orange in color with a bright red cheek. This is one of the best of the apricots, and I certainly don't think you will go wrong with this variety.

APRICOT BARGAIN COLLECTION

4-6 ft. is quick bearing size, too large to mail.

Its habits are similar to the Peach; therefore culture is the same. Excellent for canning or as a fresh fruit. Plant two or more varieties for proper pollinization. Tree vigorous and productive.

Ozark PERSIMMONS Sweet as Honey

AN261—These are the sweet native Persimmons (not the tender Japanese) and are perfectly hardy anywhere that peaches will grow. I am offering you sturdy, 1 yr. trees grown in my own Ozark garden, from an extra select early ripening strain. They make a beautiful ornamental tree, rather compact, about the size of a cherry tree, and besides will bear abundantly practically every year. Fruit is sweet as honey—makes grand eating. Plant 20 ft. apart

Price: 79c each; 2 for \$1.49; 3 for \$1.98, postpaid.

Everybody Can Grow Them

Apricots are very scarce this year. May have to substitute sizes late in the season. If so, you can be sure I'll treat you right.

Henry Field's DELICIOUS NECTARINES

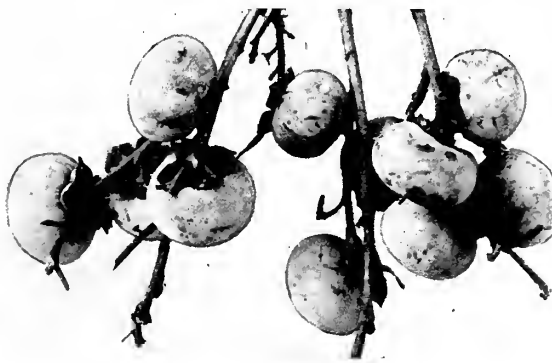

• Half Peach • Half Plum

"Every Garden Should Have One"

AN260—Here's the new half-peach half-plum fruit. No flavor in the world like Nectarine—it's really different. Fruit is fair size. Smooth, rich gold fruit and an unusual flavor hard to describe. Plant at least 1 or 2 in your yard for a really unusual treat.

AN293X—A lot of your folks don't know these three fine fruits, so I am going to take one of each and make a real bargain offer to you as a sort of an introduction to some fine fruits that you really ought to be better acquainted with.

I will send you 1 Apricot Chinese Golden 2 to 3 ft., 1 Nectarine 2 to 3 ft. and 1 Ozark Persimmon all for \$2.69, postpaid.

Henry Field's PARADISE ASPARAGUS

Best of all, Paradise is more tender, less stringy, and more rust proof. We could easily ask a premium as most seedhouses do not have this as yet, but since we have big stocks, we will sell at regular prices, WHILE IT LASTS.

How to Plant—Plant 18 inches apart in rows 2 feet apart and on well enriched soil.

Size to Plant—For quickest returns plant my huge, 3 yr. Jumbo plants. They bear early. The 1 yr. plants save money and are healthy plants—inexpensive way to start a nice asparagus bed.

AN000—1 yr. Select Plants: 100 for \$3.35; 50 for \$1.79; 25 for 98c, ppd.

AN001—2 yr. Ex. Heavy: 100 for \$4.49; 50 for \$2.38; 25 for \$1.29, ppd.

AN000—Jumbo 3 yr. Plant this giant size and you can begin to eat a little of it the first year. 100 for \$5.25; 50 for \$2.98; 25 for \$1.60, ppd.

Special Rhubarb-Asparagus Collection

AN959X—These two plants always seem to go together, and you usually plant them in out-of-the-way places around back somewhere. They are both good to eat and you need both of them. Am going to offer you a start of both kinds of these hardy vegetables. 25 PARADISE ASPARAGUS 2 yr. No. 1 and 3 Extra Select TENDERSTALK RHUBARB, all for \$1.89, postpaid.

RHUBARB Famous

CHIPMAN'S CANADA RED Rhubarb "Best of the New"

AN926—When once tried you'll agree this is best of all rhubarbs. The stalks are large and completely red from bottom to top, and even the flesh is red. Cooking does not take its rich color but makes it more appetizing for pies and sauce, a rich cherry red. Sweetest of all rhubarb so takes less sugar. Extremely productive. You can pull the big stalks all spring and summer and almost 'til fall. It is seedless. Plant early and you can get some rhubarb this year. Large No. 1 roots 85c each; 3 for \$2.49, postpaid.

VALENTINE RED Newest and Best

AN921—Extra large, extra sweet, extra red. One experiment station having 25 varieties under test reports this as the leading one. It is tender, smooth, has a pleasing flavor, a vigorous grower and makes the finest sauce or pie. It will grow anywhere. Price: 85c each; 3 for \$2.49, postpaid.

"My Own Special" TENDERSTALK

My special strain of rhubarb does not get woody. It grows vigorously. It is much juicier, more tender and has a better flavor than the ordinary strains of rhubarb. This is the plant with the pale green stem and unexcelled for eating.

AN917—Select clean plants 3 for 54c; 6 for 98c; 12 for \$1.59, postpaid. AN918—Extra heavy plants for quick results, 3 for 74c; 6 for 1.39; 12 for \$1.98, ppd.

SAGE — Grow Your Own Seasoning

AN920—This easy to grow perennial will provide you with the seasoning you want to flavor the dressing for your fowl, sausage and other meats. Sage is so easy to grow there is no reason for not growing your own. A few plants will give you a season's supply even the first year planted. Plants are attractive enough to be grown right in your perennial border. 35c each, 3 for 89c, ppd.

HORSERADISH New Bohemian—Best of All

New Bohemian is the horseradish. We have discarded all other kinds because this is so far superior. It is hardy anywhere and is very desirable as a relish. Its roots are dug in early spring, grated fine, vinegar added and it is ready for use. On this variety, the roots grow larger, are whiter and the quality is far superior.

AN915—Heavy Crowns: 5 for 79c; 10 for \$1.39; 25 for \$2.98, ppd. AN916—Cuttings: 12 for 49c; 25 for 89c, ppd.

Anybody can grow Rhubarb and Asparagus and spring is the best time to set out plants. H. F.

The One Everybody Likes ELBERTA "YELLOW FREESTONE"

AN101—The most popular and no wonder. Big, rich, yellow, highly colored fruit. Heavy, sure bearer and fine flavored. The peach that everybody likes. It's the standard by which other peaches are judged. A good shipper. Ripens August 30th to September 15th. 50% of all peaches planted are Elbertas. Probably no other peach will succeed over so wide a range of territory.

The Famous

←POLLY PEACH

The White Peach
that's sure to bear

AN106—Super hardy. Big freestone—white overlaid with rich red blush. Keen flavor and juicy. Introduced by Iowa State College. Produced a big crop of peaches every year. Very firm. Surest to bear. Stood 20 degrees below zero and bore a big crop. Now same price as other varieties. Ripens August 15th.

←HALE HAVEN

AN103—New freestone rapidly taking the place of Elberta in commercial orchards. Every peach a great big handful of rich, tempting goodness. Deep orange all over with deep blushes of carmine. Ripens 15 days ahead of Elberta. Self pollinizing. Hardy. Extremely high color is present several days before the fruit ripens, thus allowing early picking for distant shipment.

ABOUT MY PEACHES

My peaches are grown right here in Shenandoah where I can keep an eye on them, and so you know they're right.
H. F.

←J. H. HALE "Money-Maker"

Extra-Large
Freestone

AN104—Extra large, rich yellow, blushed red. Ripens a few days ahead of Elberta and tastes as good as any peach known. A money maker if you want to sell the fruit, as it brings a premium.

Often Bears
First Year

MONT-MORE

The Early Bearing Dwarf Montmorency

AN54—Here's the best news in cherries we've heard for years. This was a sport from a Montmorency THAT WAS FOUND TO BEAR A CROP THE FIRST YEAR!

LOW GROWING—EASY PICKING

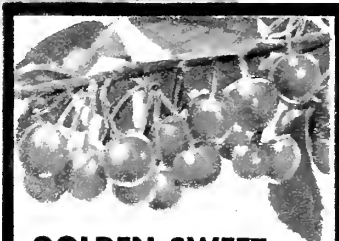

Grows much lower than Montmorency—about 10 to 12 ft.—and still produces a full-sized crop. Trees never get so tall but what fruit can be picked from the ground. Perfect for restricted back yards.

BIG CROPS IN 3 YEARS

Ideal commercial cherry. Gets in full bearing in 3 or 4 years. Fruit is often larger than Montmorency and quality as good or better. Will bear anywhere from Georgia as far north as cherries will grow. Absolutely hardy. Fruit turns black-red before ripe. Do not pick when red as they are not ripe and will not have size nor flavor they should have.

SOLD ONLY BY HENRY FIELD

PRICES: 2 to 3 ft. \$1.29 ea.; 3 for \$3.78; 5 for \$8.15; 10 for \$11.80, all postpaid. 3 to 3½ ft. \$1.49 ea.; 3 for \$4.38; 5 for \$7.16; 10 for \$13.80, all postpaid. 3½ to 5 ft. \$2.10 ea.; 3 for \$5.98; 5 for \$9.75; 10 for \$19.00, express not prepaid.

GOLDEN SWEET

AN53—My new yellow sweet cherry. It never fails to be loaded down with a big crop of golden yellow cherries. Flavor is just as fine as any Bing cherry you ever tasted, but because the cherry is yellow the birds don't eat the fruit. Why more people don't plant this cherry I don't understand. It shows how much we go by color. Everybody thinks a sweet cherry ought to be black.

Prices: 2 to 3 ft. \$1.39 ea.; 3 for \$4.08; 5 for \$6.65, postpaid. 3 to 4 ft. \$1.59 ea.; 3 for \$4.68; 5 for \$7.65, postpaid. 4 to 6 ft. \$1.98 ea.; 3 for \$5.67; 5 for \$8.95, express not prepaid.

The Heavy
Bearing

MONTMORENCY

AN55—The standard by which all cherries are judged. Big, rich-red fruit, always loads down the trees. Juicy but firm for pies or preserves. Good to eat right off the tree, and if you have any left over they will always bring a premium on the market. Montmorency cherries have been the favorite cherry since I can remember and I think they always will be. Prices: 2 to 3 ft. \$1.10 ea.; 3 for \$3.48; 5 for \$5.65; 10 for \$10.80, postpaid. 3 to 3½ ft. \$1.39 ea.; 3 for \$4.08; 5 for \$6.65; 10 for \$12.80, postpaid. 3½ to 5 ft. Quick bearing size not prepaid (too big to mail), \$1.79 ea.; 3 for \$5.25; 5 for \$8.49.

HENRY'S SPECIAL BARGAIN CHERRY COLLECTION

AN93X—All 3 for only \$3.89, postpaid

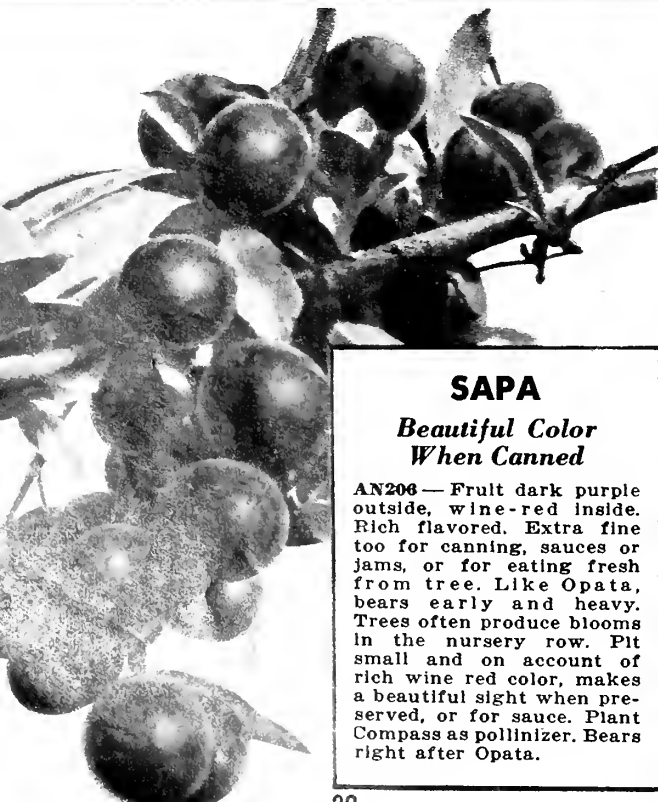

BLACK TARTARIAN

AN50—Giant black sweet cherry. Rich purplish black berries that have a delicious flavor. The best known and most popular of all sweet cherries. Prices: 2 to 3 ft. \$1.39 ea.; 3 for \$4.08; 5 for \$6.65, postpaid. 3 to 4 ft. \$1.59 ea.; 3 for \$4.68; 5 for \$7.65, postpaid. 4 to 6 ft. \$1.98 ea.; 3 for \$5.67; 5 for \$8.95, express not prepaid.

EARLY RICHMOND

AN51—The first cherry, always appreciated because so early. Super-hardy and a heavy bearer. Fruit medium size, shiny red, and often called the "May Pie Cherry." Prices: 2 to 3 ft. \$1.19 ea.; 3 for \$3.48; 5 for \$5.65; 10 for \$10.80, postpaid. 3 to 3½ ft. \$1.39 ea.; 3 for \$4.08; 5 for \$6.65; 10 for \$12.80, postpaid. 3½ to 5 ft., express not prepaid, \$1.79 ea.; 3 for \$5.25; 5 for \$8.49.

SAPA

Beautiful Color
When Canned

AN206—Fruit dark purple outside, wine-red inside. Rich flavored. Extra fine too for canning, sauces or jams, or for eating fresh from tree. Like Opatas, bears early and heavy. Trees often produce blooms in the nursery row. Pit small and on account of rich wine red color, makes a beautiful sight when preserved, or for sauce. Plant Compass as pollinizer. Bears right after Opatas.

WANETA

Hansen's Most Famous

AN208—The most famous of all Hansen's Hardy Hybrid plums. Fruit big, bright red outside and crisp, juicy, sweet yellow inside. Heavy bearing; sure bearing, superhardy. You can't go wrong on this one.

Hardy PEACHES

I've watched peach trees and crops a good many years. Some varieties are pretty sure bearers and some aren't worth a rap. You can be sure I'm not offering you shy poor bearers. Listed on this page are the varieties I plant and believe in.

Plant 15 feet apart, or 190 trees to the acre. Plant peaches as fillers in your apple orchard.

PEACH SEEDLINGS

Peach Bargain

AN607—Have a few Peach seedlings this year. Of course, you don't know what you'll get when you plant them, maybe a huge beautiful fruit and perhaps a small sugar sweet one.

They tend more to produce small peaches of a honey sweet taste and a grand flavor. They grow fast, cost little and are hardy. Plant them in the hen yard, around the vegetable garden, as a windbreaker or tall hedge.

GOLDEN JUBILEE

Extra Early Red & Yellow Freestone
AN102—Beautiful new red and with good size. Harder than most and growing more popular each year. Flesh is yellow, tender, juicy and sweet. Ripens July 20th. Along with Red Haven, among the finest of all early peaches.

RED HAVEN

AN107 — (FREE-STONE.) Extra early flaming red Peach with golden flesh. Will color up all over and ready to ship to distant markets while still firm. Trees bear young and heavily. Self pollinizing. Very fine flavor. Good to eat fresh or canned. I have tried it in my own freeze box and find it does not discolor or turn brown.

FUZZLESS-BERTA

Henry's "Exclusive" Peach Without Fuzz

AN120—Plant patent No. 479 owned by Henry Field. An absolutely fuzzless peach. This is a brilliant colored peach, having a bright red cheek on a brilliant yellow background with a skin as smooth as a plum and much more edible. The flavor of Fuzzless-Berta is distinctly that of Elberta. Fruit is rather dry—not dripping wet and absolutely freestone. Small stone—thick layer of meat. It will hold its own with any peach in the world on all points, and on top of that has absolutely no fuzz on the skin. Extremely strong growing and hardy. All these Fuzzless-Bertas are of our own growing and I want to call your attention to our new low price this year. Want to get as many of you as possible to try it. 3 to 4 ft. \$1.10 ea., postpaid; 4 to 6 ft. \$1.39 ea., express not prepaid; 5 to 7 ft. \$1.98 ea., express not prepaid.

Henry Field's Hardy CHERRIES

The varieties of cherries listed in my catalog are only those that do best. I am very particular in my choice of them. All are extra heavy rooted, well branched, and will soon be producing good crops for you.

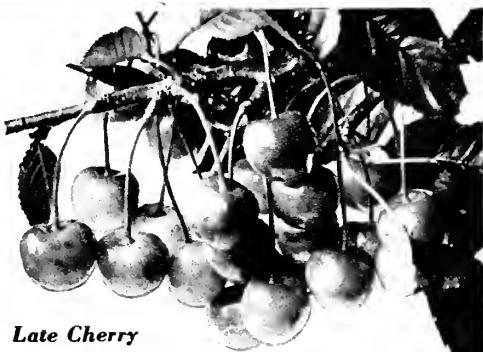

Note the big fat caliper (the diameter of the tree at the butt). It seems the trees grew shorter but thicker this year. We always like a good stout trunk on a tree ourselves and we think perhaps you'll like these trees even better than the usual ones—they look and are so sturdy.

Our cherries are always budded on a hardy understock to give a long-lived, heavy bearing tree.

Set 18 feet apart, each way, or 130 to the acre. Keep the ground around them cultivated if you can, but cherries are one fruit that will do very well, even when surrounded by a heavy sod.

SOUR CHERRY COLLECTION

AN95X—With food prices as high as they are, here is the chance to have a stock for your own jellies, preserves, canning, pies, sauce and what-not right on your own place. A few dollars spent for trees now will give you an abundance of fruit for half a life time. This offer is two 3 to 3½ ft. New Mont-More cherries and one 3 to 3½ ft. Early Richmond for only \$3.79, postpaid.

Late Cherry for Preserves

ENGLISH MORELLO

AN52—The big dark red, rich flavored late cherry excellent for preserves. Leave on tree until almost black and they are delicious. Ripen in July. Extremely hardy. Prices: 2 to 3 ft. \$1.19 ea.; 3 for \$3.48; 5 for \$5.65; 10 for \$10.80, postpaid. 3 to 3½ ft. \$1.39 ea.; 3 for \$4.08, 5 for \$6.65; 10 for \$12.80, postpaid. 3½ to 5 ft. Hardy PLUMS

No fruit is more delicious or healthful than plums. No fruit is quicker, heavier bearing, or surer bearing than these better varieties of plums listed here. Plant 18 ft. apart, 130 trees to the acre. Ideal to plant in chicken yard for shade where they do extra well. If possible plant two or more varieties of plums

to insure cross pollinization. The variety Compass is a good pollinizer.

These are the famous hybrid plums of Prof. Hansen. He developed them for the severe Dakota weather, so they will stand any degree of coldness.

Bear very heavily, branches often break with fruit. Come into bearing early—often 1st year after planting. Fruit is delicious. Try them all if you can.

UNDERWOOD

The Giant Freestone

AN207—(American Type.) My favorite at Centerville. Bears regular and fruit is immense. Ripens in July. Red freestone, good to look at and delicious to eat. Hardy north or south, even into the Dakotas and Canada.

OPATA

Bears 1st Year

AN205—Bears often the year after planting. Reddish purple skin, yellow inside. Limbs are almost entirely hidden by clusters of fruit—so heavy you must watch you don't break the limbs. Grows on any soil. Ripens July 10th.

HANSKA

The Big Freestone

AN203 — (Apricot Plum.) Big reddish purple plum with sweet apricot perfumed yellow meat. Freestone. Bears right away after planting. Ripens in August. This tree makes extraordinary rapid growth.

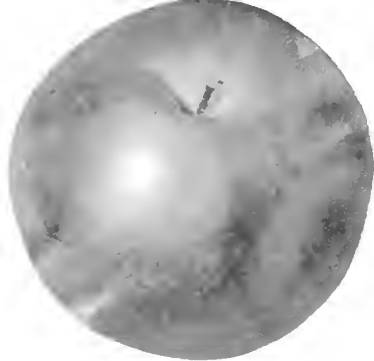

OKA

AN204—A cross combining the size of the plum with the delicious flavor of the cherry and plum. Developed by Hansen. Often bears 1st year. 5 to 6 ft. Set 8 to 10 ft. apart and you get loads of fruit in a small space. Fruit rich red inside and out. Grows in any climate and always bears. Oka will dry like a prune.

Russian Green Gage

AN218—Glad to get this variety back in my catalog. Here's what the encyclopedia of hardy fruits says about it: "For the qualities that gratify the sense of taste, richness of flavor, consistency and texture of flesh, abundance of juice, and pleasant aroma, the fruits of Green Gage are unsurpassed." Guess I can't add much to that except to say that the trees are thrifty.

JONATHAN

AN8—It's famous for its good appearance and perfect quality. It's brilliant red, well-shaped, and is good for cooking or EATING. Best of all, it keeps well with little or no care, which means you can have good apples all winter.

To most people home wouldn't be home without a Jonathan apple tree in the yard.

Yellow TRANSPARENT

The Yellow Early Summer Apple

AN18—Excellent for both cooking and eating. Clear yellow, crisp and splendid flavor. Always a big crop and bears soon after planting. Ripens in July. Bears the earliest in the season of all apples.

RED DELICIOUS

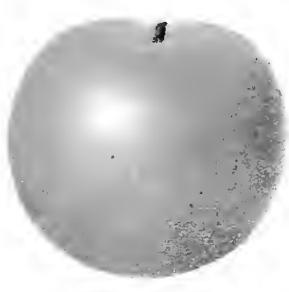

First Choice of All Winter Apples

AN11—The improved, early coloring, big Red Delicious. Colors up full red two weeks ahead of Delicious. A big, wonderful flavored, hardy, perfect, eating apple. Always brings a premium on the market. The "pear" shaped apple with 5 points at the base. If you could have but one apple, you should choose Delicious.

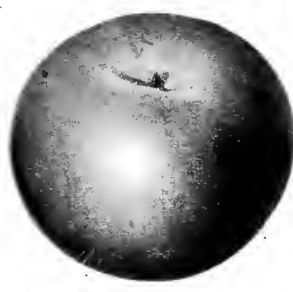

The Popular WEALTHY

AN15—Good color, and hardiness. A big, red striped, tender, juicy, high quality apple. Always bears heavily. Ripens in September but is good 2 weeks before ripe. Has been one of the favorite apples for many years. Plant lots of Wealthy.

YELLOW DELICIOUS

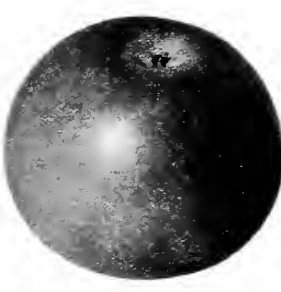

AN17—The big bright yellow. Great big bright colored, best of all yellow apples. Bears when very young, thrifty, and an all around good apple. Beautifully shaped and appearing apple for market. Good keeper. Late fall and winter. One of the best for commercial orchardist.

RED DUCHESS

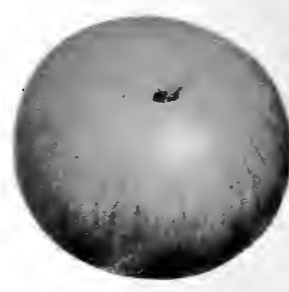

Best for Cooking JUICY RED FRUIT

AN4—Best cooking summer apple. America's choice of mid-summer apples. Fine cooking qualities. Makes delicious pies or sauce. Almost solid red in color, round in shape. A must-have variety.

Stayman's Winesap

AN14—The largest Winesap, and I think the best. Red striped, high quality fruit. Winesaps are generally considered the best flavored and best keeping apples and Stayman's Winesap is one of the best. With a little care, you can keep Winesaps for use all winter, clear up into April.

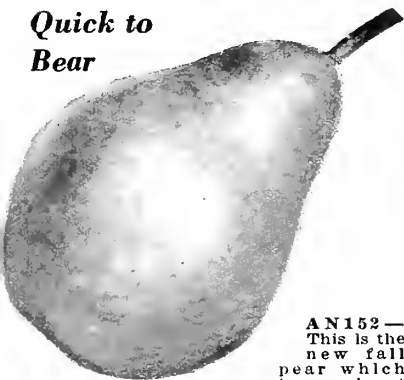

ANOKA Bears First Year

AN1—Bears first year after planting. Earliest apple in the world. Stands cold like an Eskimo. Fruit red, streaked yellow. Tree never gets very big so makes a fine back yard tree. Originated by Prof. Hansen.

TWIN COLLECTION: AN43X—1 ea. of Anoka and Stayman Winesap. \$1.29 (2 to 3 ft.), postpaid.

NEW! Douglas Pear

Quick to Bear

AN152—This is the new fall pear which bears almost at once after planting. Generally loaded year after year.

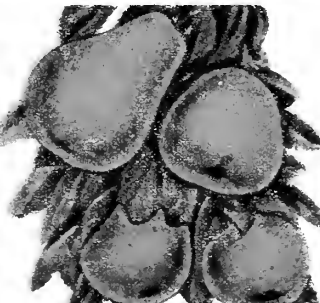

Fruit is large, yellow, and may be allowed to stay on the tree until fully ripe. You don't have to bother wrapping them. This is the most blight-proof of all the pears. Price same as other varieties although generally a premium is asked for this fine new pear.

SUGAR PEARS

The Sweetest of All

AN155—These are SECKEL or SUGAR PEARS. As sweet a flavor as its name "Sugar Pear" suggests. Good right off the tree and for desserts. Small in size but large in quality. A russet coat covers greenish yellow skin.

KEIFFER

The Winter Pear—Good Keeper

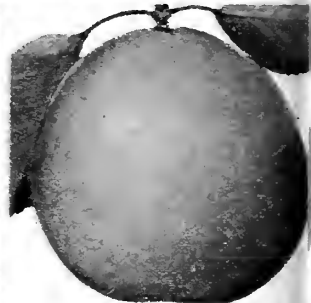

AN154—A winter pear of high quality. Extra good keeper, heavy bearer. Lots of good gold and red color. Large fruit. Narrower at top but more uniform than Bartlett. Good pollinator.

The Giant BARTLETT

The Earliest Pear of All and Most Popular

AN150—Fanciest and finest of all pears. Rich golden yellow with rich pink blush. Good keeper, and shipper. Early. Pointed top and wide at base.

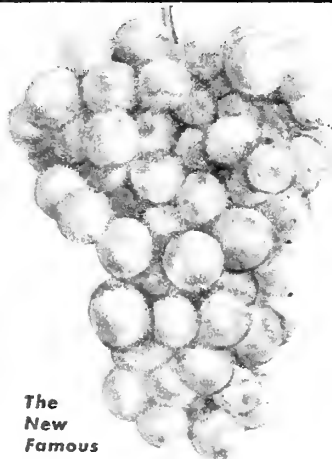

ORIENT

Blight Resistant Pear

AN160—A midseason variety recommended for planting throughout the middle states. The fruit is large, often 3 1/2 in. in diameter. It handles well when hard ripe. Flesh creamy white of good texture, mild flavor. The tree is a vigorous grower, medium stocky. Fine for canning or for eating from the hand.

McINTOSH RED

AN9—To many the finest flavored apple I list. Bears for years and years. Beautiful red apples often with darker red blush, fragrant and of highest quality. A fall apple which will keep well into the winter in storage. Drouth and cold weather do not affect it.

GRIMES GOLDEN

AN6—The hardy winter yellow apple. Beautiful even rich golden color, crisp and tender. Fine flavor. Improved with keeping. Almost brown, and large size. Very hardy type. The finest yellow winter apple you can have for keeping. Will keep all winter with a little care and flavor seems to keep on improving the longer it is kept.

MAIDEN BLUSH

A Good Eater or Cooker—Fall
AN10—Yellow with crimson blush. A good eating and cooking apple. Ripens just before Wealthy.

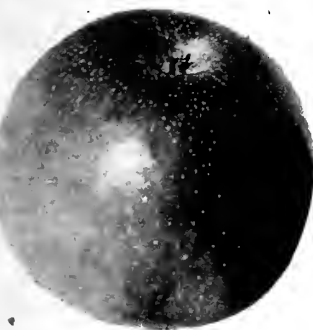

FIRESIDE

AN21—This is the coming apple, the super Delicious introduced by the University of Minnesota. As you know, Delicious will not grow well in the north. Fireside has all the good points of the Red Delicious, plus hardiness. It is: (1) Of better quality; (2) Hardy; (3) Tree large, vigorous and strongly branched; (4) Fruit large, bright, attractive red over a greenish yellow brown; (5) Keeps all winter; (6) Annual bearer.

SNOW APPLE

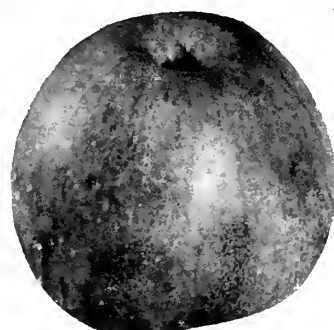

The Red and White Fleshed Fall Apple
AN13—(Fameuse). Few apples more refreshing or beautiful than Snow. Flesh snowy-white, stained with crimson. One of the finest eating apples.

THE FAMOUS RED WINESAP

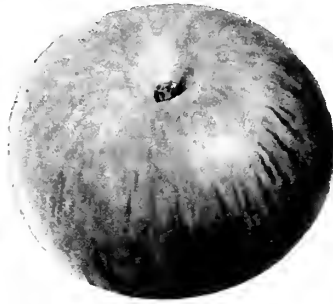

The Juicy Winter Apple—Keeps All Winter

AN12—These are the bright red apples with the splendid flavor and lots of juice. They keep all winter in fine shape. Favorite variety for years.

THE NEW JOAN

AN7—Disease resistant apple introduced by Iowa State College. My choice of the new apples. Beautiful, big, bright, pure shiny red fruits just load down the tree. Has Jonathan blood, but brighter red and heavier bearing. Bears farther north.

BEN DAVIS

The Old Favorite Winter Apple

AN2—The old standby winter apple. Heaviest bearing of all apples. Keeps all winter, and excellent to plant with other apples as it is an ideal pollinizer. Red striped.

JUICY EASY-TO-GROW HARDY PEARS

Everybody should have two or three pear trees. They grow upright, take so little space and are always loaded. Plant both summer and winter pears. Wrap the winter pears in paper and forget them until mid-winter. See how good they taste then.

These are big heavy, well-rooted trees, ready to grow and will bear worlds of fruit. Set 16 feet apart. About 170 trees to acre. Don't need much space.

CRABS for Beauty and Fruit

DOLGO

Beautiful Fruit Tree

AN3—Probably the finest crab ever introduced for canning whole, as sauce, or pickles and for jelly. At the same time it is one of the most beautiful of the flowering crabs. The well-shaped trees are covered with glistening snowy-white blossoms in the spring and gleaming red, fine quality fruit in abundance in the fall. Bears young and regularly. One of Prof. Hansen's recent introductions from South Dak. Exp. Station—so is extremely hardy. One or two of these trees should be on every farm.

PRICES SAME AS REGULAR APPLES

WHITNEY

AN16—An extra big and extra fine one. Fine for preserves, pickling, jelly and apple butter. Good enough to eat right from the tree.

GRAPES

Grow them on a fence, on an arbor, or in your vineyard. Plant 6 to 8 feet apart in rows 6 feet apart and be sure to try all of them. Each variety is superior for some reason and comes into bearing at different times so you have grapes all season. One of the collections I have may be just what you want. All plants are big, heavy rooted vines—none better.

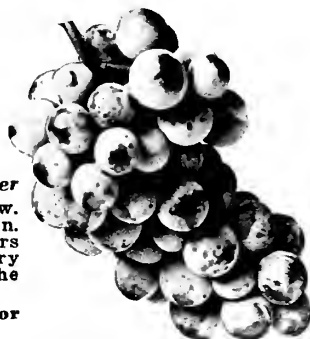

BETA

The Hardy Grape—Very Heavy Yielder

AN350—The hardest grape I know. Grows in Minnesota without protection. Fine for arbors. Grows fast and bears heavy. Fruit not so large. Clusters very sound with a nice flavor—having the tang of a wild grape.

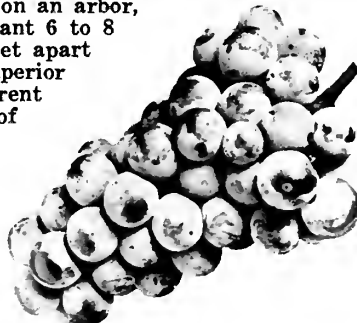

2 for 69c; 4 for \$1.29; 8 for \$2.29; 12 for \$3.15; 25 for \$5.19, postpaid.

MOORE'S EARLY

The Earliest Black

AN355—Very early, rich black variety always loaded and always enjoyed. The first mammoth clusters taste so good picked right from the healthy, vigorous vines. Does well over the middle west. Fruit very large. Price: 2 for 69c; 4 for \$1.29; 8 for \$2.29; 12 for \$3.15; 25 for \$5.19, postpaid.

SOME HELPS FOR GOOD ROSES

I have had the best results when customers work peat moss into the soil when they are planting their roses for extra fine results. Peat moss helps to lighten a heavy soil and holds moisture during the hot dry summer months.

FEED YOUR ROSES WELL

Roses are heavy feeders, and well rotted barn yard manure is recommended in their planting or Sheep-o-lizer, which is pulverized sheep manure, can be thoroughly mixed in the soil as you plant to furnish the right amount of plant food.

SUMMER CARE OF ROSES

Give your roses regular cultivation during the summer months. Peat moss worked into the soil will help as a mulch. Don't be afraid to cut long stems on your roses. It will help to keep the rose bushes compact and bushy in appearance. Use plenty of Henry Field's Bug Dust or Rose Dust if your roses need spraying of any kind.

ROSE DUST

4023—Best dust I know for roses. Keeps them really clean and blooming. 1 lb. in dust gun, 75c; 3 lb. bag \$1.50, postpaid.

4044—Or 1 lb. in dust gun plus 1 1/2 lb. bag (2 1/2 lbs. total), both for \$1.50.

First With New Germicidal Lights

Yes, I am leading the parade again with the latest in the new inventions. I have had special ultra-violet lights installed in our big modern shipping department in the nursery and the rays instantly kill any germ or fungus spores. Just another reason why I can send you better roses than 'most anyone else. And it doesn't cost you anything extra.

Henry Field's BABY

DAINTY POLYANTHUS DWARFS

The bushes of these roses are absolutely covered with hundreds of blooms all summer long 'til freezing weather. Even harder than Hybrid Teas. The best plant for a cemetery. Set a group of 3 at each corner of the lot. Dwarf compact growing.

Prices: 89c each; 3 for \$2.39; 6 for \$4.19, postpaid.

AN442—CATHERINE ZIEMET. Always covered with its dainty little double white roses and fine cut foliage.

AN443—ELSE POULSEN. Always in bloom. Big clusters of apple blossom pink. A hardy bush rose.

AN444—GOLDEN SALMON. A vivid salmon colored, heavy blooming variety. Blooms all summer steadily and continues 'til ground is almost frozen.

AN445—IDEAL. The deep black-red baby rambler. Blooms so profusely it hides the leaves. Fine for filling stations, beds and cemeteries.

AN446—TRIOMPHE ORLEANS. Finest of all red Baby Roses. Free flowering in big clusters.

NEW FLORIBUNDA BABY ROSES

(Dwarf Baby Roses with Hybrid Tea Blooms)

New large flowered cluster roses. I think that for all purpose roses, these are the finest roses I list in my catalog. They grow in bush form like the Baby Roses but bear flowers as big as Tea Roses. Look like them, too. Bloom all summer. Hardy. Beautiful in shrub planting.

Prices: 89c each; 3 for \$2.60; 6 for \$4.70, postpaid.

AN447—GRUSS AN AACHEN. Flowers more like tea roses with dainty pointed buds on individual stems. The creamy-pink flowers cover the bush from spring 'til heavy frosts.

AN448—RED LAFAYETTE. Large tea rose like flowers of a brilliant flaming red, either in clusters or borne singly the entire summer. Stands dryness like no other rose. Fine for cut flowers. Long, pointed buds, and wide spreading flowers.

AN440—MISS EDITH CAVELL. Red, semi-double scarlet-red blooms shaded darker. This rose makes a very strong bushy plant loaded with flowers all summer.

AN450—"THE SWEETHEART ROSE"—(Cecil Brunner). Small, exquisitely formed buds and flowers of light pink with a yellow base. Blooms all summer.

AN449—FLORADORA. The gayest of all the Floribundas. Always in bloom. A brilliant cinnamon-red. As glamorous under artificial light as in the garden. Price: \$1.25 each; 3 for \$3.35, postpaid.

THE TINY ROSE

Roulette or Tom Thumb

Ten Good Reasons for Growing the Roulette "Fairy Roses"

1. Tough and quite hardy.
2. They bloom all summer long.
3. Resistant to plant troubles.
4. Take up small space in garden, window or porch box.
5. Perfect for beds, border or rock garden.
6. Make fascinating bouquets in miniature containers.
7. Beautiful to wear in hair, as boutonnieres, necklaces or bracelet.
8. Bloom for weeks indoors under an inverted jar or glass globe before planting in garden.
9. Make tiny rose garden with pathways, arches, seats the size of back seat of your car.
10. They make a complete rose garden in miniature.

BN500—NEW RED ROSE ROULETTE. Striking new ruby-red fairy rose. Blooms all summer in the garden. Grand for any out-of-door planting in full sun. Perfectly hardy, and as double as any tea rose. Price: 89c each; 2 for \$1.59; 4 for \$2.98, postpaid.

BN501—WHITE ROSE ROULETTE. Dainty miniature double white rose which contrasts beautifully with the new Red Rose Roulette listed above. Simply covered with tiny, thimble-like roses. Price: 89c each; 2 for \$1.59; 4 for \$2.98, postpaid.

BN502—PINK ROSE ROULETTE. The original beautiful and fragrant Roulette rose. Soft pink double tiny tea-rose flowers. Grows about 10 inches high and blooms all summer. Price: 89c each; 2 for \$1.59; 4 for \$2.49, postpaid.

BN503—BRAND NEW GOLDEN YELLOW ROSE ROULETTE. Golden yellow from the heart of the flowers to the tips of the petals. Perfect miniature of a tea rose. These are the famous new Brownell roses you have heard so much about. They're new super-hardy hybrid teas that absolutely won't kill out even in temperatures that dip 25 degrees below zero. Think of that! Because they are so hardy we guarantee them unconditionally to live through one year and not to winter kill. Best of all, they are free blooming, long stems with flowers that last a long time. More bloom than ordinary hybrid teas. Prices: \$1.75 each; 3 for \$5.00; \$18.00 per dozen, postpaid.

AN964—LILY PONS. White with a pure lemon yellow center. Large graceful flowers. Vigorous free bloomer. One of the hardest. Feature of the garden in the cold Northwest.

AN960—V FOR VICTORY. Large, very double yellow fragrant rose constantly blooming. One of the most outstanding roses. Maintains its bright yellow color.

AN962—BREAK O' DAY. Orange to apricot. Large, double flowers. Vigorous free bloomer.

AN976—TIP TOES. Delightful mixture of red, orange and pink tints, spicelike fragrance.

AN977—CURLY PINK. Matchless in size and form of bloom, beauty of cluster, vigor, foliage, hardness and performance. Large, two-toned pink bouquet on a single stem.

AN978—RED DUCHESS—Beautiful shade of rose-red. Very fragrant with colorful, persistent foliage. A robust and sturdy sub-zero plant.

AN979—LAFTER. Sparkling orange shades and yellow, semi-double in clusters.

AN980—VELVETIER. Semi-double, frequently in clusters. Gorgeously impressive with its depths of dark red, velvety luster.

AN969X—SPECIAL COLLECTION OF BROWNELL SUB-ZERO HYBRID TEA ROSES—1 each of Tip Toes, Lily Pons, V for Victory and Break o' Day, all 2 year old field grown No. 1 plants, for \$6.50, postpaid.

HARDY CLIMBING BROWNELL ROSES

Now! Climbing Hybrid Teas

The everblooming hybrid tea roses have been taught to climb. Now you can have the big double blooms of the hybrid teas covering your walls and fences. Blooms are the same as the bush form.

Remember Climbing Roses are not climbers in the sense that the Ivy is. They cannot support themselves and need to be tied up to the trellis, fence, or other support. They make a beautiful display when planted along a boundary fence or wall, when planted so that they can ramble over and completely hide an old stump or boulder, or when used on arbors, trellises or other supports in the garden or against the house. When planting around a house keep the plants out 3 ft. from the foundation. The ground is too dry any closer than that. Trim to 12 in. from the ground when first planted. Usually takes about 3 yrs. to get a climber well established. They need plenty of water, more than bush roses.

Trim out some of the oldest canes each year just after the blooming season.

Prices: \$1.09 each; 3 for \$2.98; 6 for \$5.29, postpaid.

These are the glorious new colors in Iris—reds, oranges, and pinks.

BN289—**PIUTE**—A brilliant maroon red. One of the finest. This iris lists for 50c most anywhere.

BN217—**INDIAN CHIEF**—The always popular, striking red flowers, with standards pinkish red, falls deep rich velvet red. People seem to like this better than any iris I sell.

BN255—**DOGROSE**—Beautiful clear pink, a silver medal winner, and one of the best in its color.

BN256—**RED ORCHID**—The best red iris I have ever seen, har none. It's an early bloomer, intermediate type. Immediately attracts attention of all who see it in our fields.

BN261—**WINE GLORY**—Glorious red and purple mixture. Sparkles like a glass of old Port Wine.

BN290—**DELPHI**—Red toned white bi-color. Falls cherry red and white. Beautiful combination of colors.

BN236—**NOWETA**—A beautiful blend of soft pink and yellow.

Red & Pink Iris Mixture

BN469X—Want to call your attention to this mixture this year. Only fine named varieties are included. This is absolutely the best red and pink mixture I have ever put out and you'll agree it is at a bargain price.

Try at Least Four of These Giant Peonies

These are the finest of the peony world. Huge blooms, fragrant, free-blooming—MUCH IMPROVED OVER THE OLD-FASHIONED PEONY. Prices are about ½ what is usually charged for these varieties. INDIVIDUAL PRICES SHOWN ON EACH VARIETY. There is a tremendous shortage of peonies this year. Take my advice and order early.

Choice Varieties—All Big 3 to 5 Eye Divisions—Labeled

BN305—KARL ROSENFELD. Brilliant velvety crimson. Compact grower, stately habit. An excellent bloomer. Late. 59c each; 3 for \$1.49, postpaid.

BN303—AME. DE VERNEVILLE. Bomb type purest white with carmine flecks. Very early, fragrant. 59c each; 3 for \$1.49, postpaid.

BN306—FRANCES ORTEGAT. Big dark crimson, mid-season peony. 59c ea.; 3 for \$1.49, ppd.

BN323—MARY BRAND. A fine peony originated in the northern regions. This peony came from Faribault, Minnesota, and is one of the very best of all dark reds. Striking in size and effect. Lasting as a cut flower. Makes a great mass of vivid dark crimson. 98c each; 3 for \$2.79, postpaid.

BN311—DOUBLE RED FERN LEAF PEONY. This is one of the scarcest of all peonies and I have had an awful time trying to get enough plants to work up a stock. It blooms early in May here in Shenandoah. Doesn't grow very tall and is surrounded by finely cut, ferny foliage, much like cosmos. I am going to list this peony at \$1.50 each and I don't think you will find it listed for less than \$3.00 in any of the few catalogs carrying it.

BN301—FELIX CROUSSE. Rose type, late midseason. Its flowers are bright, brilliant, dazzling ruby red. Exceptionally fiery, bright and effective. 59c each; 3 for \$1.49, postpaid.

BN316—GENERAL BERTRAND. Popular old-rose pink with a shining salmon center. You will like this one. 59c each; 3 for \$1.49, postpaid.

BN319—ROSE FRAGRANS. Immense bomb type deep pink. Very, very fragrant, very large and very late. Flowers after most of the others are gone. 59c each; 3 for \$1.49, postpaid.

BN317—LONGFELLOW. High rating. Very double. Midseason. Rich crimson. Considered one of the best reds. 98c each; 3 for \$2.79, postpaid.

BN308—FESTIVA MAXIMA. Early snow white with fleck of red on center petals. Immense flowers. 59c ea.; 3 for \$1.49, ppd.

BN339—LIVINGSTONE. Soft rose pink, center petals crimson flecked. Rose type. Large, compact, late. 69c each; 3 for \$1.69, postpaid.

BN340—EUGENE VERDIER. An ideal pink variety, coming into bloom early midseason. Semi-rose type. Opens a fresh delicate hydrangea pink with primary petals lighter and the center a flushed crimson. Fragrant. 69c ea.; 3 for \$1.69, ppd.

BN341—GROVER CLEVELAND. Dark crimson, fine flower, upright stems, medium height. Extra good for garden effects. Late. 69c each; 3 for \$1.69, postpaid.

How to Plant Windbreak

Plant, if possible, 100 to 150 feet away from the house for best results. Plow a deep furrow where trees are to go and tamp seedlings in

furrow carefully. Haul some water to the trees, if you can.

Trees should be 6 to 8 feet apart in rows 8 to 10 feet apart for best results. Plant in staggered (zig-zag) fashion for best protection.

ELM

Genuine

Siberian Strain!!!

Every bit of my seed for these Chinese Elms originally came from Siberia, where only the HARDEST of trees can survive. (Stand temperatures of 30° below.) Don't be fooled with common Chinese ELM. Plant the GENUINE HARDY SIBERIAN CHINESE ELM you get from FIELD'S.

These Trees Are DROUGHT RESISTANT!

Drive where you like—the one tree that will grow and grow is the Chinese Elm. Drought doesn't hurt them. Poor soil doesn't hurt them and extreme temperatures only seem to make them thrive.

This is the

FAST GROWING STRAIN

This is the strain of Chinese Elm that grows from 8 to 10 FEET PER YEAR. Plant this year and next year you have a windbreak or shade tree ½ grown. What's more—you'll have the shade or windbreak the rest of your life. Chinese Elm are LONG LIVED—some trees still exist over 200 years old.

Giant ROOTED Trees CAREFULLY GROWN, DUG and PACKED

I'm proud of my Chinese Elm and take care of them. The trees you get from me will be carefully grown, carefully dug with a large root system and carefully packed against breakage. You'll be pleased 100%. Last year over 2,000 people voluntarily wrote to thank me for the fine Chinese Elms I sent them.

WINDBREAK BARGAIN

200 CHINESE ELM \$3.19

AN782X—Here is a special deal in little 9 to 12 in. Chinese Elm. They grow fast and I have a lot of them. Just stick a spade in the ground, plant one at each side of the spade cut. Tramp them in well and if both grow after they get 2 ft. high either chop one out, which you can well afford to do at my price in this bargain, or transplant one to another location. This is a mighty cheap way to get a good section of a windbreak started. I am going to make a special offer of 200 9 to 12 in. Chinese Elm seedlings for \$3.19, postpaid. This is only a little over 1½¢ per plant.

CHINESE ELM TREE SPECIAL!!!

AN775X—3-6 FT. TREES

This is My Best Bargain in Chinese Elms. It was so dry last summer that some of my Chinese Elm Trees didn't grow the way they should have. The trunks didn't get as thick and there are some crooks in them that they didn't grow out of—be all right in another year, though. Don't want to replant them so as I grade them out will throw them in a separate pile and sell to you at

PUSSY WILLOWS

Grow Them Yourself

AN718—Remember when you used to bring home Pussy Willow Catkins in the early spring? You can have them at home. Grow them yourself. Mine are large, fuzzy and gray all along the stems. They swell to immense size and then turn yellow when they bloom. Stands wet ground or dry. Easy to grow. Plant 10 ft. apart. 59c each; 2 for \$1.00, postpaid.

CRIMSON KING MAPLE

Reddest of All

AN755—Here's a brand new maple originated in Europe. It's patented (Plant Pat. No. 735). Beautiful red all summer long. Much redder than Schwedler's. Has been under observation in America for ten years and has kept its brilliant coloring all through the season. A real novelty. If you want something for the neighbors to talk about, this is it. Not many to offer—order early. 6 to 7 ft. size, \$3.98 each, prepaid.

LINDEN

The Basswood Tree

AN701—Most formal compact growing tree. Beautiful and hardy with round compact top, large heart-shaped leaves that give dense shade. Wonderfully fragrant flowers. It is a rapid grower and a very desirable tree for street or yard planting. Plant a few for variety. 4 to 5 ft., \$1.29 ea.; 2 for \$2.29. 5 to 6 ft., \$1.59 ea.; 2 for \$2.98; 6 to 8 ft., \$1.98 ea.; 2 for \$3.79.

NORWAY MAPLE

The Perfect Street Tree

AN740—Round headed tree that seldom grows more than 30 ft. tall. Hard wood that is not subject to wind and ice breakage. Dark green, thick foliage. Just the right sized shade tree for the small houses they are building today. 5-6 ft., \$1.69 ea.; 2 for \$3.19.

NEW! SILVERLEAFED LOMBARDY POPLAR

Long-Lived Silver Pyramidal

AN703—(Bolleana type). We are now able to offer you a new type of pyramidal poplar with delightful silvery grey bark, with leaves which are green on the top, and silvery white underneath. When the wind plays on this tree, it is a beautiful sight indeed. Grows just like Lombardies in its live-forever habit. It will live much longer than most pyramidal trees of this type, extremely hardy in all kinds of weather, fast growing. Used for borders across the back of the lot, set about 6 feet apart, or in groups of three in the corners of the lot for accent. The supply of these trees is very limited. Price: 3 to 4 ft. trees 59c each; 3 for \$1.49, shipped postpaid. 4 to 5 ft., 69c each; 3 for \$1.89, express not prepaid. 5 to 6 ft., 79c each; 3 for \$2.10, express not prepaid.

RED FLOWERING PEACH

AN721—At last we are able to secure for you a Flowering Tree for your lawn that will be more beautiful than any tree you have ever seen. Immense, rich, red double flowers cover the plant the same time the peaches bloom. Sometimes the trees will set fruit. They can be planted any place peaches will grow. Grows rapidly and oftentimes blooms the first year. It would be ideal to plant in a shrubbery border for height, or makes a most beautiful specimen on the lawn. I saw a big one in full bloom last spring in Nebraska City, Neb. Had been growing there a long time.

heavily. Dig a very big hole as the roots are generally large. Set just as deep as they stood in the nursery row. Firm the soil well and water thoroughly. Water from time to time during the first summer unless thorough heavy rains.

THOMAS BLACK WALNUT

AN726—They are thin shelled, easily cracked walnuts, best known and most satisfactory improved budded black. Hardy anywhere that walnuts will grow. Bears when very young, often producing nuts the first year after planting. Nuts are thin shelled, easily hulled, kernels fine color and excellent flavor, easy to crack out in halves and quarters. Trees also make fine shade. A mature tree will produce 15 to 40 bushels which sell for \$1.00 or more per bushel. Plant the trees 40 to 50 ft. apart. 2 to 3 ft., \$1.79 ea.; 3 for \$4.98, ppd. 3 to 4 ft., \$2.25 each; 3 for \$6.49, ppd.

NATIVE BLACK WALNUT

AN747—The well known favorite, priced so that everyone can have them. Nuts fine for eating and cooking, wood the best for cabinet work. 2 to 3 ft. trees, 39c each; 3 for 98c, postpaid.

BUTTERNUT

AN704—Cousins of the Black Walnut, and one of the most popular and best eating nuts. It bears large nuts with a rich buttery flavor. The Butternut makes a very fine tree as well. Its wood is greatly esteemed for furniture and interior trim. 2 to 3 ft. plants, 49c each; 2 for 89c, postpaid.

SHAGBARK HICKORY

AN744—These are the grand old Shagbark nuts so beautifully flavored, so much a favorite with everybody. When I go out after nuts in the woods in the fall I always hunt for Shagbark. So why not plant some on your own place and you won't have to go out and hunt for them, they will be right there. Young trees about 12 in. high, 49c each; 3 for 89c, postpaid.

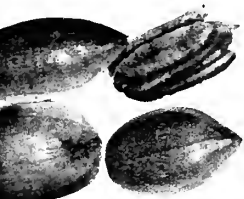

HAZELNUTS

AN712—One of the finest, easiest to crack kind of nuts we can grow here and it grows all the way along up north, too. It fruits heavily each year, is hardy in any climate. Besides its annual crop of nuts, it makes a fine ornamental shrub turning red and yellow in the fall. There is a place for these around every home, and the children's children as well as you folks will enjoy eating the nuts. 18 to 24 inches. 39c each; 3 for 98c, postpaid.

HARDY PECAN

AN719—This is a native type and very hardy. Besides its heavy yield of fine quality delicious nuts, it makes a beautiful ornamental tree. A very vigorous grower. Make your shade trees double purpose trees. 2 to 3 ft. \$1.19 each; 3 for \$3.19, postpaid.

TO BEAUTIFY YOUR HOME

HOW TO PLANT SHRUBS

No need to say much. Every nursery order I send out has complete instructions easy to follow. Mostly, low growers are set 2 ft. apart, medium growers 3 ft. apart, and tall growers, 4 ft. apart. Set out 18 inches from foundation. Spread roots out well, tamp earth back solidly, and prune as indicated to make bushy growth.

Why Field's Shrubs are Better

Got tired of telling you shrubs are 12" to 18" high or 18" to 24". You don't care about that. Good roots and branches are what you care about. You don't care a rap for a big, spindly shrub with poor roots. So here's how I grade plants.

I grade out only the largest, strongest shrubs with the largest, heaviest root systems. The smaller ones are not for sale. Only two sizes—Select and Extra Select. Both BIG. You get the best when you order from Henry Field.

All Shrubs Inspected

All my shrubs are carefully inspected, once

when dug and again before they are shipped on your order. Absolute quality is insured. All bad shrubs are destroyed. All are carefully wrapped and packed in special moss to arrive in the best possible condition.

All My Shrubs are Hardy

These are the world's finest, hardy shrubs. All are selected because they give color and beauty with the least effort in any kind of condition. Easy to grow. No special care needed.

Hardy HONEYSUCKLE VINES

HALL'S HONEYSUCKLE

AN808—Beautiful and yet the hardest of all vines. Masses of fragrant white and yellow flowers from late spring throughout summer. Foliage is extremely shiny and glossy. Excellent, too, to use to stop washes, or for places where grass won't grow. Will grow anywhere and cover anything. Select vines, 39c each; 2 for 69c, postpaid.

SCARLET TRUMPET HONEYSUCKLE

AN807—Valued for both its foliage and flowers. The plant is covered practically the entire summer with orange-red trumpet shaped flowers which are very showy. The foliage is a glossy shiny green, and a semi-evergreen. This vine will grow any place, even up big trees, and it is ideal for using over the porch, particularly if in a somewhat shaded location. Select vines, 39c each; 2 for 69c, postpaid.

HENRY'S HARDY "GOLDEN SUN"

AN805—Here's a brand new vine that's perfect. Found this vine growing in the Ozarks, brought it to Shenandoah and it's as hardy here as all the other Honeysuckles. Most fragrant of all. Foliage big, round, glossy green way into winter. Fast growing. A mass of golden trumpet flowers in June and July. 98c each, postpaid.

"PINK FLAME" HONEYSUCKLE

AN806—This new Honeysuckle is a mass of color from early summer to killing frost with its long flowers (tube shaped), a flame of rich pink on the outside and bright yellow inside that simply cover the plant. Delightfully fragrant. Foliage almost evergreen. Extremely hardy—will grow anywhere. Price: Ex. Select vines 79c each; 2 for \$1.39, postpaid. Propagation Rights Reserved.

CHINESE BEAUTY BUSH

Loveliest of All the Flowering Shrubs

AN515—This graceful, vigorous, arching, branched plant was recently introduced from China. The leaves are small and pointed and branches are loaded with bell shaped pink flowers in June. Grows 5 to 6 ft. Extra Select Plants: 69c each; 3 for \$1.89, postpaid.

WEIGELA-ROSEA

AN573—(Pictured). The big, round, dense, dark green shrub with hundreds of pink blooms in June. Foliage rich and heavy. For breath-taking beauty this shrub can't be surpassed. 4 to 6 ft. EXTRA SELECT PLANTS: 49c each; 3 for \$1.29; 5 for \$1.98, postpaid. AN588X—Weigela collection. 1 Weigela rosea and 2 Weigela-Eva Rathke. All for \$1.29, postpaid.

WEIGELA-EVA RATHKE

AN572—Bright red, bell-like flowers cover the plant in June and keep coming off and on all summer. Valuable in any planting for its big, dark green, glossy leaves. Best in partial shade. Grows 3 to 5 ft. Extra Select plants, 59c each; 3 for \$1.59; 5 for \$2.49, ppd.

2 SNOWBALL BUSHES

*1 New Fragrant Pink
1 White*

GIANT WHITE SNOWBALL

AN556—(Pictured above.) Grows 8 to 9 ft. Balls of bloom like giant Snowballs. An old favorite but very popular. Extra Select plants, 69c each; 3 for \$1.89; 4 for \$2.39, postpaid.

NEW FRAGRANT PINK SNOWBALL

AN555—(Viburnum Carlesi) Grows 5 to 6 ft. high. A new shrub that's truly a beauty. The old-fashioned Snowball we all loved so well now in a lovely soft shade of pink. Extra Select plants, \$1.19 each; 2 for \$2.29, postpaid.

TWO DEUTZIAS — 1 Tall, 1 Dwarf

PRIDE OF ROCHESTER

AN518—(The Tall Deutzia). Grows 6 to 8 ft. Pure white, bell shaped flowers all up and down the upright stems in June. Extra hardy with attractive pointed light green leaves. Extra Select plants, 39c each; 3 for 98c; 5 for \$1.49, ppd.

GRACILIS

AN519—(The Dwarf Deutzia). 2 to 3 ft. Low growing type of this hardy shrub. You can hardly see the pretty foliage in June for the lovely white blooms. Plant with Spirea Anthony Waterer for low groups. Extra Select plants, 49c ea.; 3 for \$1.29; 5 for \$1.98, ppd.

SNOWBERRY—DOUBLE PURPOSE SHRUB

Bloom in Spring, Berries in Fall

AN557—SNOWBERRY. Grows 2 to 4 ft. A double purpose shrub having dainty rose colored blooms in the early spring which are followed in the late summer and fall with clusters of big white waxy berries. The berries are extremely showy, producing an effect like no other shrub. An excellent shrub for a shady location. Extra Select plants, 39c each; 3 for 98c; 5 for \$1.49, postpaid.

LILAC SPIREA

AN562—SPIREA BILLARDI — Here's the spirea with big, pink lilac-shaped blooms borne on the ends of each branch. Blooms all through the summer. A shrub that you should know and plant. Grows 3 to 4 ft. Extra Select: 39c each; 3 for 98c; 5 for \$1.49, postpaid.

BRIDAL WREATH

AN566—VAN HOUTTEI. Always my most popular shrub. Hardy, with beautiful arching habit of growth; the branches just covered with pure white flowers in early spring. Grows every place. STANDARD: 29c each; 5 for 98c. SELECT: 35c each; 3 for 98c; 5 for \$1.49. EXTRA SELECT: 45c each; 3 for \$1.19; 4 for \$1.49, postpaid.

ANTHONY WATERER

Dwarf Red Spirea

AN561—Grows 2 ft. America's most popular low growing shrub. Covered all summer with big bright red blooms, compact growing with many branches. An ideal shrub to fill in front of the taller growers. Extra Select: 39c each; 3 for 98c; 5 for \$1.49, postpaid.

BLUE SPIREA

Hardy New Bluemist

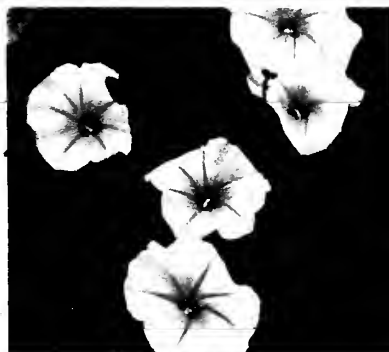

AN577—A striking, low growing 5 ft. shrub from Minnesota that blooms all summer and fall. Silvery green foliage and spirea-like flowers. Very few have had the opportunity to grow it. Absolutely nothing like it. Price: 69c each; 2 for \$1.19, postpaid.

BITTERSWEET VINE

With the Bright Berries

AN800—This true red berry Bittersweet which is so beautiful in the fall. Foliage is a very attractive glossy green and covered with fiery, orange-red berries. Plant two of these together for pollination if possible. Select vines, 39c each; 2 for 69c, postpaid.

MOONFLOWER VINE

AN812—At last—a moonflower that is hardy and comes year after year. Like Scarlet O'Hara, only with large white flowers and PERMANENT. Covers a trellis in a year and is there forever. Opens at noon into immense pure white flowers. Foliage—rich, dark green. Has one big bulbous root. Does not spread. Just keeps getting bigger. 34c each; 3 for 89c, postpaid.

PURPLE WISTERIA

AN813—Sure to bloom because it's grown from blooming plants. Don't buy cheap seedlings that may not bloom. A magnificent vine, becoming more beautiful each year and lasting for generations. The flowers are fragrant and come in big purple clusters shaped like grapes with long, narrow, attractive foliage. Far superior to washed-out lavender color of common Wisteria. Come in clusters in May-June, a perfect bower of beauty. 49c each; 2 for 89c, postpaid.

SILVER LACE VINE

The Rapid Grower

AN814—Grows like a race horse travels—25 to 30 ft. the first summer. Foliage perfectly clean. Prettiest white flowers just literally cover the entire vine from the ground to the tips. Requires a warm, sunny exposure and well-drained sandy soil, fairly rich. If planted under these conditions its growth is astounding. Will cling to any kind of a support and will cover an unsightly building, wall or barn in 2 years time. Quite new, but a leader everywhere. Select: 55c each; 2 for 98c, postpaid.

PRIMROSE CREEPER

6G49—Grows very rapidly, vines clear
 across and around the pool. Blooms
 are brilliant yellow and often has
 from 20 to 30 blossoms at once. Easy
 to keep over winter. (Rich soil, shal-
 low water.) Each 29c; 3 for 65c,
 postpaid.

WATER LETTUCE

6G50—Grows into large rosette
 of fluted velvet green leaves. No
 bloom, but one of the most in-
 teresting of all plants because of
 its growing habits and unusual
 green color. Good for fish to
 spawn on and the roots make ex-

CANARY FEEDING SCHEDULE

REGULAR FOODS are seed, water, grit and cuttle bone, these should be fed every day of the year and in addition the following:

Monday ¼ level teaspoonful of cod liver oil health food in separate treat cup.
Tuesday Regular foods.
Wednesday ½ level teaspoonful of conditioner food in treat cup.
Thursday Regular foods.
Friday ¼ teaspoonful song restorer in treat cup.
Saturday Regular foods.
Sunday ¼ level teaspoonful of song restorer Or—Small amount of fresh celery leaves (leaves frost bitten are poison) Or—fresh, well washed dandelion leaves.

Maw Seed... can be fed twice a month on Wednesday instead of conditioner. ¼ treat cup maw seed.

All these special foods are deliciously flavored and birds will often tease for more. At this temptation don't weaken, remember, birdie has had enough if fed as directed.

NOTICE—Lettuce, medicated bird biscuits, apple, etc., are not advised with this diet.

1949 Will Be a BIG Chicken Year

Henry Field

GROW BETTER BRED CHICKS

GET YOUR SHARE OF PROFITS

My Chicks Are Bred for "FARM CONDITIONS"

Quality is as important in baby chicks as it is in seed. And it's cheaper to grow the best, just like it is with seed. That's why more and more growers are coming to Henry Fields for their chicks, because they know that quality has been my policy for 60 years, and they're bred for "FARM CONDITIONS."

Any way you look at it, it pays to buy from a man that's had experience. You can't learn everything about the baby chick business over night, just like you can't grow chickens without experience, as you know.

My flocks aren't "just ordinary." They're top-notch, BLOOD-TESTED, breeding stock for the baby chicks I send out—the kind that really grow for you and make you money.

I send my men out personally to cull every flock—as often as is necessary. Only after scrupulous inspection will I accept eggs for hatching.

Bred for "Farm Conditions" means H. F. chicks will do well in YOUR farm yard.

You can be proud of H. F. chicks on your range and know they'll make you money.

Get the Most by Growing the Best

With breeding stock that I know has the best body type, high-producing laying ability, good health and vigor, it's no wonder that I say that BETTER BREEDING MEANS BIGGER PROFIT.

Like with anything else at Henry Fields, you can be sure of quality and 100% satisfaction. That's my promise, and it's lived up to.

Henry Field Baby Chicks Are Bred for FARM CONDITIONS

I don't try to fill you up with fancy terms and pedigrees. All I claim is that my baby chicks are bred for FARM CONDITIONS—the kind you want to do well on YOUR FARM.

CHICKENS MAKE MORE MONEY per \$1.00 of Feed Cost

Most of us chicken growers don't keep good enough records to know exactly what it costs us to raise our flock. So, I thought you'd be interested in the records of 107 Iowa farmers who reported to IOWA STATE COLLEGE* on feeding costs for all their livestock. For each \$1 of feed, here's what their livestock returned:

POULTRY	\$1.74
DAIRY	1.62
HOGS	1.60
BEEF FEEDER	1.26
BEEF RAISER	1.25

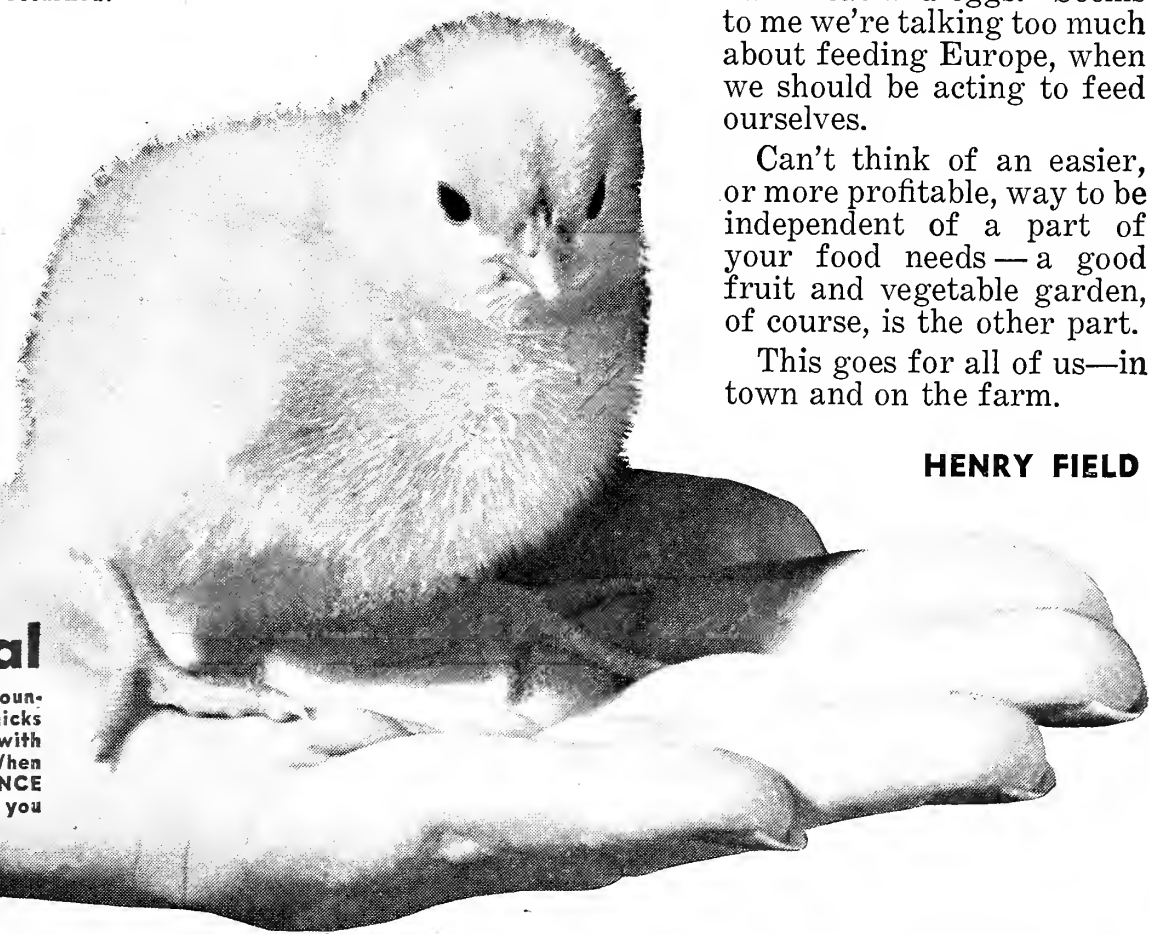

Guess that answers our question, with poultry way out in front on dollar returns per \$1 of feed. So I guess we'll have to grow more chickens than ever—and OF COURSE, Henry Field's BETTER-BRED Baby Chicks are the best to start with, so I'll be waiting for your orders. Get 'em in early, and get 1st choice on delivery dates.

* Published in Iowa Farm Science, October, 1947.

I Guarantee

100% Live Arrival

Henry Field is known throughout the whole country for the vitality of his chicks. Producing chicks for over 30 years has provided experience with which few other hatcheries can compare. When you get chicks from Henry, you KNOW IN ADVANCE they will be healthy and worth all or more than you pay for them.

Here's Why I Think You Should Grow Chickens This Year

There seems to be certain down to earth things that make it profitable to grow chicken meat and eggs. First, is a plentiful supply of home grown feed. Second, is a proper balance of storage chickens and eggs. Third, is the right government support price.

And fourth, is the will to get the order in.

If I've analysed the situation right this year, the first three of these conditions is RIGHT. Certainly, we have the biggest grain crop in history—no question about it, there should be plenty of feed.

Second, the U. S. Department of Agriculture tells us that we have been drawing meat and eggs out of storage at an alarming rate—to the point where a shortage is definitely in sight, if not already here.

Third, support prices continue the same, in spite of the downward trend of grain prices.

And here's something extra. There was a full ONE-THIRD fewer baby chicks hatched last year. And that means just that many fewer hens.

What Does It Mean?

What does it all add up to? You can answer that as well as I can. I think it means that this will be one of THE BEST years to make money growing chickens. If all the conditions are RIGHT, and if there are FEWER hens on the farm, there can be no other answer.

So take action on the 4th condition yourself. Get your order in. Get it in early. It looks like there'll be a terrific shortage of baby chicks.

I want my customers to have theirs, but the only way I can be sure of it is for you to order early.

KEEP HOUSEHOLD EXPENSES DOWN WITH CHICKENS

One thing we can all do to keep down expenses these high priced days is to grow chickens and supply a big part of our own meat and eggs. Seems to me we're talking too much about feeding Europe, when we should be acting to feed ourselves.

Can't think of an easier, or more profitable, way to be independent of a part of your food needs—a good fruit and vegetable garden, of course, is the other part.

This goes for all of us—in town and on the farm.

HENRY FIELD

Note the healthy vigor of this flock of young White Rocks

WHITE PLYMOUTH ROCKS

"The Best All-Around Chicken"

- Snow-White
- Fast-Maturing
- Pin-Free
- High Egg-Laying Ability
- Famous for Meat Quality
- Easiest of All to Raise

WHITE PLYMOUTH ROCKS

Henry Field's Giant Type White Plymouth Rocks have a beautiful snow-white plumage and very fast maturing and rapid feathering, and will dress out at almost any age, yellow-colored, free from pin feathers, which makes them exceptionally fine for broiler purposes. The White Rocks are one of the most popular all-purpose breeds due to their meat qualities, and their egg-laying ability.

Where We Ship To

Transportation is so difficult these days that we do not recommend shipping farther than 600 miles away from Shenandoah. This is roughly everything within the 4th postal zone. Don't like to disappoint a lot of you good customers who live a long ways away, but this seems most satisfactory for now. You wouldn't want us to send you chicks that may not reach you in 100% Henry Field condition.

FIELD'S NEW HAMPSHIRE
"Leghorn of the Heavy Breeds"

Henry Field's New Hampshires can almost be called the Leghorn of the heavy breed for they are very heavy egg producers and combined with their heavy weight, they are hard to beat. They are noted for fast maturing, rapid feathering and have the vigor and hardiness of the White Leghorn and they have replaced the Leghorn on many farms, due to the size and rapid growth. Remember, large brown eggs bring top market prices.

WHITE WYANDOTTES
Early to Market

Henry Field's deep breasted White Wyandottes are the first to go to market. They make exceptionally good broilers and will reach some 2 to 3 lbs. quicker than almost any other variety. They are exceptionally good rustlers and many of our farm friends say that they almost make their living on any farm finding their waste feed around the farm. They are the all-purpose bird and you will find that they are very husky, hardy, and easy to raise and mature very rapidly.

Henry Field's
BLACK AUSTRALORPS

We crossed the rooster of this breed with Field's famous large type White Leghorn hens to produce our Austra-White Crosses.

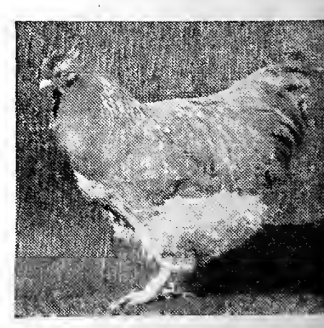

The breed is famous for its massive size, early body maturity and great egg laying ability. They're good rustlers and the black plumage means good insurance against loss from foxes and hawks.

If you try them once you are convinced for good.

Barred PLYMOUTH ROCKS
Dual-Purpose Chicken

Henry Field's Barred Plymouth Rocks have proven their money making ability on many farms. They are large in size, fast maturing, rapid feathering and make exceptional fine broilers or heavy roasters and are also good producers of large brown eggs. They are one of the oldest of the All Purpose breeds and have proved very profitable on many farms.

GIANT BUFF ORPINGTONS
Good Winter Layers

Henry Field's Giant Buff Orpingtons are exceptionally good winter layers due to their massive bodies and heavy plumage. These winter eggs come when the market is usually the highest. Our Buff Orpingtons are one of our heaviest varieties of chickens and have a beautiful golden color. They make exceptionally good heavy capons or heavy roasters. If you are interested in winter eggs or heavy meat birds be sure to order Field's Giant Buff Orpingtons today.

These are Henry Field's famous breeds of baby chicks. They are the best and the most "growable" you can buy anywhere. I recommend them wholeheartedly, and know they will do well for you. You can always depend on 1st quality at Henry Fields—in baby chicks, just like in seed or nursery stock.

Field's Famous "Large-Type"

WHITE LEGHORNS

Leghorns Are Profitable

For many years the White Leghorns have been recognized as the heaviest producers of white eggs. They require less feed and less room per bird than almost any other breed. Field's Leghorns are noted for being the large type (not beefy) full of vigor and are great rustlers. They come from the finest breeding flocks in this part of the country and have been rigidly culled to insure you the kind of Leghorns that will make you the most money.

Bred for Eggs

Cockerels Ready in 8 to 10 Weeks

And don't forget, Leghorn Cockerels usually cost you less but make fine broilers, reaching 1 to 1½ pounds by 8 to 10 weeks. Price poultry is, they'll make you good money, too.

2 CROSSES That Are Real EGG-PRODUCERS

AUSTRA-WHITE

- Lay Sooner
- Are Healthier
- Lay More
- Grow Faster
- Go to Market Sooner
- Lay Larger Eggs

The Austra-White cross is the most popular cross for people wanting the tops in meat and egg production. By breeding Australorp males to Leghorn hens we can give you a heavy cross which not only has plenty of vigor but also matures quickly. The laying flock can be kept on less feed than some other varieties, and your laying flock mortality will be much less in most cases.

LEG ROCK CROSS

Combines Good Points of

WHITE LEGHORNS and WHITE ROCKS

By mating some of my outstanding White Leghorn males with some of my White Rock females I am producing the Leg Rock crosses. Combining all the good points of these two great breeds gives you a bird that has all the size of the White Rocks and the egg laying ability of the White Leghorns.

It's Easy to Figure How Much Paint You Need

Measure the distance around the building and multiply by the height to the eaves. Add to this figure the sq. ft. in the gables (just multiply width of base of gable by one-half the height). Subtract sq. ft. of window and door areas. Now you have the total square feet you want to paint. Divide this by the number of sq. ft. one coat will cover, per table below. If you want to put on two coats, double the figure.

Spread is governed by texture and porosity of the surface, method of application, temperature and other factors. So these figures may vary 10% either way.

Henry Field Seed & Nursery Co., "MIDWEST'S LEADING SEEDHOUSE," Shenandoah, Iowa

The Best grade is superior in all ways in purity and germination.

The Standard or Choice grade is re-cleaned seed and differs from the Best grade by a percent or two lower germination and purity test.

Country Run Seed may be good with some cleaning. It usually contains a little of everything and often times weed seed. We do not offer it for sale.

About Inoculation

When you plant a legume, inoculate it if you can. The legumes (alfalfa, clover, lespedeza, soybeans, etc.) take nitrogen out of the air and put it in the soil, thus improving it. By inoculating the seed before planting, you increase the ability of the plant to improve your soil tremendously, to say nothing of the vastly increased yields you get the first year.

Full directions come with each package. Buy the one hushel size package for one bushel of seed, etc. Be sure to state the seed you want it for so you will get the correct inoculation.

Garden peas and beans, Lupines and Sweet Peas not only yield far more, but improve your soil too, if inoculated.

About Seeding Alfalfa

Alfalfa seed needs a well prepared, firm seed bed. When ground is plowed, firming the seed bed by rolling it is very important and highly recommended. If moisture is favorable, about 1/2 inch is right depth for planting.

Average number of cuttings per year would be three, cutting when the Alfalfa is one-tenth to one-fourth in the bloom stage.

Korean Lespedeza

It is at its best in July and August, the hot summer months. It will grow on the poorest soil where it has been impossible to get other clover to grow. Sow 12 to 15 lbs. hulled seed per acre just as early as you can get on the land. Makes an excellent orchard cover crop. If you sow unhulled seed, sow 20 to 25 lbs. per acre.

Ladino Clover

A giant size White Dutch Clover. It is a perennial legume that grows from two to three times the size of regular White Dutch. Makes an excellent ground cover. Will stand lots of pasturing and is especially recommended to sow on old pastures. Seeding rate —1 to 2 lbs. of Ladino per acre, either on an old pasture or with new seeding mixture.

Birdsfoot Trefoil

Henry first introduced it to the Midwest in 1942 with small sample packets. Two types are known at present. The narrow leaf strain for pasture and the broad leaf type for hay. Birdsfoot Trefoil can stand poor soil like Lespedeza. Also a lot of drought and adverse conditions. Plant on a seed-bed like Alfalfa, at rate of 4 to 5 lbs. per acre.

It is hardy, permanent, stands the driest of droughts, the hottest summers, and the coldest winters. It is the first green grass in the spring, the last in the fall and stays green all summer when other grasses are dry. It is very high in feeding value; will carry from 50-100% more livestock per acre than Blue Grass. It is a grass and so it cannot poison the stock. Sow either fall or spring using 15 to 20 lbs. per acre. Have a firm, well-packed seed bed, harrow in lightly and roll well if at all possible. Do not cover too deeply—1/4 to 1/2 inch is plenty.

Sudan Grass

A popular annual that will grow on almost any soil. Plant late after the ground is thoroughly warmed up. Have a firm seed bed and drill it in, or you can broadcast the seed and harrow it lightly. The first cutting for hay is usually made after the first heads appear until it is in flower, second cutting just before frost. Allow it to cure thoroughly. Don't pasture after frost kills plants in fall.

Sweet Sudan

Sweet Sudan is a cross between regular Sudan and Leoti, a sweet sorghum. A more vigorous grower than common Sudan, higher yields, finer stems and it stools more freely. Sweet Sudan has a sweet, juicy quality and more disease resistance. Can be pastured as safely as regular Sudan. Sow about corn planting time. Soil should be warm. Use 20 lbs. per acre for best results.

Atlas Sorgo

One of the highest yielding forage crops known. Almost the same feeding value as corn and due to the long, leafy, sweet, and juicy stalks and green heads, cattle eat every bit of it with a relish. Normal planting rate is 5 to 6 lbs. per acre. When Atlas is to be used as cured fodder or silage, the seed should be permitted to reach the hard dough stage before the crop is harvested. Do not use for pasture except in the winter when the plants are completely cured.

Norkan

Norkan is selected from a cross of Atlas Sorgo and Sumac Cane. Similar in appearance to Atlas but does not grow as tall and is 10 days earlier in maturity. Extra Sweet. Plant 10 to 12 pounds per acre corn planter row width.

Gurno

A grain sorghum that will give you a huge yield of grain in a hurry. It is a white seeded sorghum that's combine type and early. And it's one of the earliest of all, maturing in 60 to 80 days to make a heavy yield even if planted late.

Stands drought, resists chinch bug injury,

Henry Field Seed Planting Chart

is not susceptible to root rot and stands well after maturity.

Plant like corn, 5 lbs. per A.

Cherokee Oats

A medium tall, yellow, early oat. Plump kernels and a thin hull. Stiff straw and weighs out better in test weight per bushel. Stands up on rich soil, and the stiff straw gives a long period for safe harvest. Earlier than Clinton.

Combination Seedings

(Ideal for Sowing Together)

Brome and Alfalfa—12 lbs. of Brome and 4 lbs. Alfalfa per acre. Heavy yielding, high feeding value. No chance of bloating.

Brome and Korean Lespedeza—15 lbs. of Brome and 5 lbs. Korean Lespedeza per acre. Especially good on hilly, poor soil. Stands heat and drought.

Catch Crops

Dwarf Essex Rape—Can be sown until the middle of August, excellent hog pasture.

Buckwheat—Can be sown until the middle of July, yields 30-35 bushels per acre.

White Proso Millet—A high yielding grain millet. Makes wonderful chicken feed, can be sown up to the middle of July.

Crops for Low Wet Ground

Reed's Canary Grass—Heaviest yield on wet or flooded ground.

Alsike—Best legume for wet ground.

Red Top—Second best grass for wet land.

Crops for Poor Soil

Mammoth Red Clover—Vigorous grower and will produce where other red clovers fail.

Soybeans—Good cash market. Richest protein grain. Use either as grain or hay.

Korean Lespedeza—Will yield heavily in poorest soil.

Timothy—Very valuable because will grow on poor soils. Good in mixtures.

Pasture Crops

For Dry Land—Brome, Brome Pasture Mix, Crested Wheat.

For Hog Pasture—Rape, German Millet, Hog Pasture Mix, Sudan, Rye Grass.

For Quick Pasture—Hurry Up Pasture Mixture, Rye Grass, Hubam, Sweet Clover, Sudan Grass and Rape.

For Permanent Pasture—Brome, Brome and alfalfa mixed, Lespedeza, Ladino, Blue

Grass, 50-50 Permanent Pasture Mixture, Crested Wheat Grass, Timothy and Red Clover, and Timothy and Alsike.

For Summer Pasture—Brome, Lespedeza, Sudan, Brome and alfalfa mixed and Sweet Clover.

For Bargain Pasture—Good but Cheap Pasture Mixture, Sudan Grass.

For Winter Pasture—Rye.

Good Bee Pasture—Hubam.

Good Goat & Sheep Pasture Combination —2 lbs. Alsike, 1 lb. Birdsfoot Trefoil, 1 lb. Lespedeza per acre.

About Millets

For Hay

German Millet—Stands most hot, dry weather.

Siberian Millet—Earliest maturing one.

For Grain

Early Fortune—Large seeded, orange red.

White Proso—Good chicken and hog feed.

About Sorghums

Grain Types

Midland—Best grain yielder of the combine types.

Early Kalo—Ex. good grain yielder.

Martin Milo—Will yield under wide variety of conditions of soil and weather.

Fodder Types

Sumac Cane—Sweet, juicy, leafy. Medium.

Early Best.

Black Amber Cane—Sweet cane, earliest maturing.

Early Orange Cane—Sweet and juicy, early maturing.

Dual Purpose Types

Good for both grain and fodder.

Atlas Sorgo—Heaviest fodder yielder of all, outyields corn for fodder or silage.

Axtell—Early selection of Atlas. 10 days earlier.

Norkan—Like Atlas only 10 days earlier.

Gurno—Best dual purpose. Heavy grain yielder. Sweet stalk fodder.

Hegari—Good grain yielder, excellent for bundle feeding.

Combine Types for Grain.

Early Kalo—Good grain yielder.

Midland Milo—Best combine type.

Martin Milo—Good combine type.

Gurno—Extra early. Heavy yielding white grain.

CRESTED WHEAT GRASS	20-24	15-20		March-April	Aug. 15-Sept. 30	1/2-1 in.	June July	300-500 lbs.	Pasture.	Strictly dry land grass. Will stand extreme drought and cold. Prevents soil erosion because of its deep roots.
FLAX	56	30-40		April		1-1 1/2 in.	July	10-20 bu.	Grain—straw for paper pulp.	
LESPEDeza-KDREAN (ANNUAL)	60	12-15		Feb., March, April		1/2 in.	Sept.-Oct.	300-500 lbs. 1 1/2 tons hay	Pasture—fine sour soil legume. Use to rebuild soil. Korean reseed itself heavily even though you pasture. Cut it closely. Makes excellent orchard cover crop.	Every farm should have some Lespedeza. Gives excellent pasture when everything else dry. At its best during July and August. Will grow in poorest soil where nothing else will.
SERICEA (PERENNIAL)	60	12-15		Feb., March, April		1/2 in.	When in full bloom			
MILLET	50	30		May 10-July 15		1 in.	For hay when feathering out	20-25 bu. grain 1-1 1/2 tons hay	Pasture, grain and hay.	Chiefly used as catch crop when additional feed needed, or crops down out. Especially good hog or chicken feed.
DATS	32	64		Feb. 15-April 10		1 in.	July	40 to 70 bu.	Grain.	
RICHARD GRASS	14	15-20		Feb. 1-June 1	Aug. 1-Sept. 1	1/2 in.	Before full bloom	200-400 lbs.	Pasture.	Very succulent—does especially well on upland soil.
POPCORN	56		6-8	May		1-2 in.	Oct.-Nov.	1,200-3,000 lbs.		
RAPE (DWARF ESSEX)	50	6-8		April 1-Aug. 15		1/2-1 in.			Pasture especially, for hogs and all live stock except cows.	Every farm should have a few acres. Makes excellent hog pasture. Use domestic Dwarf Essex for best results.
RED TOP	14	15-20		Feb. 1-June 1	July 15-Sept. 30	1/2 in.	When in full bloom	1-1 1/2 tons hay	Pasture and hay.	Yields heavily on low, wet ground.
REEO CANARY GRASS	24	12-15		Feb.-April	Aug. 1-Sept. 30	1/2-1 in.	When in full bloom	2 to 3 tons hay	Pasture and hay.	Heaviest yielder of all grasses on wet or flooded ground.
RYE GRASS	24	25-30		Mar.-May		1/2-3/4 in.	When in full bloom		Pasture—cover and nurse crop.	Quick growing annual. Good in mixtures to give tender perennials protection until they are well started.
RYE—SPRING	56	60-90		March-May		1/2-2 in.	July	15 to 30 bu.	Pasture.	
WINTER	56	60-90			Sept.-Nov.	1-2 in.	July		Fall Pasture and Grain.	
SORGHUM—GRAIN TYPE	50	60	5-6	May-June		1-1 1/2 in.	Sept.	30-50 bu.		
ATLAS SORGO	50	60	5-6	May-June		1-1 1/2 in.	Sept.	15 tons	Forage, grain and hay. Harvest after seeds reach hard dough stage. Shock, stack and store until well cured. Do not use for pasture except in winter when plants are completely cured.	Highest yielding forage crop known. Almost same feeding value as corn. Cattle eat every bit of long, leafy, sweet and juicy stalk. Both grain and forage of very high quality.
FDDDER TYPE	50	60-80	20-30	May-June		1-1 1/2 in.	Sept.	15-18 tons		
SOYBEANS	60	90-120	60-90	May-June		1 1/2-2 in.	Sept.	15-35 bu. gr. 1-3 tons hay	Hay and grain. Cut for hay in soft dough stage, for grain when pods fully matured.	Cash crop with ready market. Richest grain in protein, makes fine hay crop, grows well on poor soil. Stock relish greatly. Builds up soil.
SUDAN	50	20-25	10	May 10-July 1		1/2-1 in.	1st cutting as coming into bloom; 2nd just before frost.	Hay 2 tons per cutting	Hay and pasture—2 cuttings of hay a season, or you can take one cutting and pasture, or pasture first and then take cutting. Plant when ground is warm.	If you allow Sudan to grow at least 2 ft. tall you need not fear poisoning. Makes splendid crop on weedy soil and will choke out weeds. Popular annual. Strictly hot weather crop.
TIMDTHY	45	12-15		March-April	Aug. 15-Oct. 30	1/2-1 in.	June-July	1-1 1/2 tons hay Seed 2-5 bu.	Hay or pasture.	Very hardy—will grow on all kinds of soil and under all kinds of conditions. Very valuable in mixtures to insure a stand.
WHEAT, SPRING	60	120		March-April 15		1-3 in.	July	15 to 30 bu.	Grain.	
WINTER	60	90		Fly Free date to Oct. 20		1-3 in.	July	20 to 35 bu.	Grain.

Be Sure to INOCULATE with "Nitragin"

All Clovers, Alfalfa, Beans and Peas
Makes Them Yield More—Start Faster

Don't spend good money for clover and alfalfa seed, without inoculating it. It not only DOES BETTER, but MUST BE INOCULATED TO TAKE NITROGEN FROM THE AIR AND PUT IT IN YOUR SOIL.

Makes better clover stands and heavier yields of crops to follow. You should inoculate even if land was inoculated before.

When ordering, always state name of seed.

Field's New HYBRID ELM

Has All the Good Points of the American Elm and Chinese Elm—None of the Bad

This Tree Only 3 Years Old

Immune to Dutch Elm Disease

Supply very limited. When we run out I will book your orders for fall delivery. H. F.

The Perfect Cross for Shade Trees—No finer cross could be made for a shade tree than to combine the permanence and beauty of the American Elm with the rapid growth of Chinese Elm.

Resembles American Elm—Its leaves are very large, dark green. The bark is smooth and a medium grey color. The branches are identical to the American Elm—straight and strong. It does not break in a high wind.

Grows 8 to 14 Feet Per Year!—It has this habit from the Chinese Elm, but has far outstripped it. Records show they have grown as much as 14 feet in one year.

100% Hardy—Hot weather, cold weather—it's all the same to this new Hybrid. Not even the tips of the branches were hurt in the Armistice Day freeze in 1940 which took so many of our trees here in Shenandoah. Where ordinary varieties killed out, the Hybrid Elm was not hurt the slightest. And hot or dry, growth doesn't stop.

Limited Supply—There are no trees available in the United States when our limited supply is exhausted, so I urge you to reserve the trees you want as early as possible.

"They Bloom in the Garden like They Do in the Greenhouse."

HENRY FIELD'S

Hardy ZINNIA

"It Blooms Year After Year"

BN380—(Helianthus Loddon Gold.) This is one of the nicest new perennials I've seen in a long time. Enormous golden-yellow double flowers exactly like big zinnias scattered over a bush plant that grows 4 to 5 ft. high. Golden blossoms show up beautifully against the rich green of the large heart-shaped leaves. Everyone who sees it, wants it. Blooms from August to freezing time. Price: 59c each; 2 for \$1.00; 5 for \$2.39, postpaid.

More blooms per plant than almost any other flower.

Henry's Hardy

FUZZLESS-BERTA

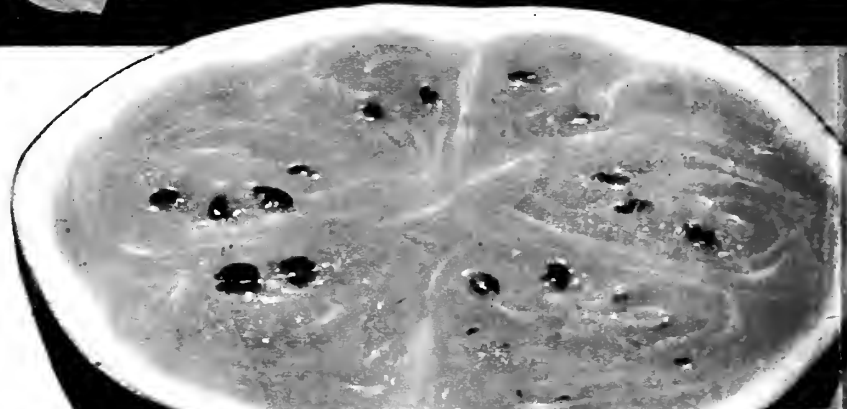

The Peach Without Fuzz

AN119—Don't need any fancy defuzzing machine for it. Skin is as fuzzless as a plum, and twice as tender. Carries the blood of Elberta, J. H. Hale and other fine peaches. Fruit is finest peach flavor and quality you ever tasted. Small pit, absolutely free-stone, very hardy and fairly early. Tree grows larger than most. Bears very heavily. The first orchardist to get a quantity on the market is going to make a fortune. If I were younger, I'd do it myself and not sell any trees.

Prices: 3 to 4 ft. \$1.10 each, postpaid; 4 to 6 ft. \$1.39, not prepaid.

Something New Under the Sun

Henry Field Plant Patent No. 479.

HYBRID DIXIE QUEEN WATERMELON

726—The sweetest, firmest, most delicious melon you have ever eaten. Fruits are uniform in shape, usually weigh from 35 to 50 lbs. Withstands dry weather and stays in eating condition longer than the ordinary Dixie Queen. Ripens in mid-August. You must try this one. Price: Pkt. 25c, postpaid.

HENRY FIELD'S New DELAWINE APPLE

AN33—It isn't often I get a chance to tell you about a "brand new" Apple like my DELAWINE. And if you order early so you get one, you'll really have something to tell the neighbors about. It looks exactly like Red Delicious, points and all, but it has the fine flavor of the best Stayman Winesap you ever ate. Wonderful texture. Healthy, hardy grower. Only 1 size this year and only ONE to a CUSTOMER. 2 to 3 ft., \$1.49 each, postpaid.

Henry Field's HYBRID CUCUMBER

370—A new slicing cucumber highly resistant to mosaic and downy mildew. Bears abundantly long after other types have ceased. Handsome dark green fruits, 8 in. or more long, rather square at the ends with small seed cavity. Flesh is crisp and of excellent quality. Price: Pkt. 25c, postpaid.
